

Design Proposition

KEEP PUBLIC SERVICE OPEN WHEN TECHNOLOGY STOPS

FIG.01

AI SYSTEMS STOP · BASIC SERVICES STAY OPEN

TWO ENTRANCES · ONE STAFFED SERVICE AREA · ONE VISIBLE RESEARCH-AND-OPERATIONS CLOSURE BOUNDARY

Along the corridor, each AI service has a public-service entrance, a research and equipment operations entrance, and a staffed service area. Public access, human advice, and basic services remain open when AI systems or equipment are paused for maintenance.

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · NOT FOR DAZHONGSI LOCATION CLAIMS

Diagnosis and Renewal Potential

LAYER EXISTING EVIDENCE • CLASSIFY RENEWAL AFTER FIELDWORK

FIG.07

EXISTING RESOURCES • RENEWAL SCREENING

INVENTORY BEFORE CLASSIFICATION • NO PARCEL OR BUILDING RENEWAL CLAIM WITHOUT SURVEY AND RIGHTS EVIDENCE

Two concept studies can proceed to field verification. Dazhongsi awaits official evidence; no location or renewal-potential claim is made here.

The inventory separates verified public context, design-stage resources, and field-data gaps. Five renewal classes define the method; no parcel or building is classified before survey, condition, use, and rights are verified.

Overall Structure

ONE PUBLIC SERVICE CORRIDOR • THREE DISTINCT CONCEPT DESIGNS • 13 SERVICES

FIG.02

SIX ZONES • ONE PUBLIC SERVICE CORRIDOR

LAND-USE CLASSIFICATION AND SERVICE ROLES ARE SHOWN SEPARATELY • UNITS ARE NOT STATUTORY PARCELS

- Z01 • 09**
Proposed Commercial and Business Service Area
- Z02 • 0702**
Proposed Community Service Facilities Area
- Z03 • 0803**
Proposed Cultural Facilities Area
- Z04 • 0802**
AI Origin Technology Transfer Zone
- Z05 • 1401**
Proposed Park Green Space
- Z06 • 0802**
Proposed Zhongzhiyuan Research Area
- DAZHONGSI • DESIGN AFTER OFFICIAL EVIDENCE**

16 concept-design units, eight reference building footprints, and 2 deferred-design units support this proposal; they are not statutory parcels, surveyed buildings, ownership units, regulatory controls, or development rights.

One public service corridor links three distinct responses: controlled testing at Zhongzhiyuan, technology transfer and community service at AI Origin, and a non-boundary, non-quantitative station-area walking and public-space concept at Dazhongsi.

PROVISIONAL ROUGH BOUNDARY • NOT AN OFFICIAL REDLINE • NOT FOR DAZHONGSI LOCATION CLAIMS

Key Areas

CONTROLLED TESTING • TECHNOLOGY TRANSFER • STATION-AREA CONNECTIONS

FIG.03

THREE DISTINCT KEY-AREA RESPONSES

CONCEPT PLANS • REFERENCE SECTIONS • DESIGN-DEVELOPMENT PRECONDITIONS

Zhongzhiyuan compares a 10–8–24 m module. AI Origin compares a 14–10–16 m module and requires a written coordination interface with the existing Talent Service Mobile Station. Dazhongsi compares function, building action, mobility, public space, operations, and start conditions without calculating area or development capacity.

PROVISIONAL ROUGH BOUNDARY • NOT AN OFFICIAL REDLINE • NOT FOR DAZHONGSI LOCATION CLAIMS

13 SERVICES • 13 ACCESSIBLE ROUTES • 3 INDUSTRY TESTS • STOP CONDITIONS FOR EVERY SERVICE

Five primary user groups and thirteen AI services cover technology transfer, industry tests, walking and accessibility, cultural guidance, participation, safety, health navigation, and resource management.

PROVISIONAL ROUGH BOUNDARY • NOT AN OFFICIAL REDLINE • NOT FOR DAZHONGSI LOCATION CLAIMS

A / 2026.08.16

FIG.09

KEY-AREA FORM · FRONTAGE CONTROLS

COURTS, PUBLIC GROUND FLOORS, LOGISTICS SIDES, AND BROKEN MASSING · NO INVENTED HEIGHT, STOREY, SETBACK, OR RETENTION CLAIM

ZHONGZHIYUAN · TEST COURT

AI ORIGIN · TECHNOLOGY TRANSFER + COMMUNITY COURT

- 01

Place accessible public ground floors on park and community edges
- 02

Place research, tests, equipment operations, and logistics behind
- 03

Break continuous massing with courts, gaps, and roof segments
- 04

Height, storeys, setbacks, fire, and heritage controls remain pending

Zhongzhiyuan and AI Origin prioritize continuous public ground floors, place research and equipment logistics behind, and break massing with courts, gaps, and roof segments; numeric controls remain pending.

Mobility and Infrastructure

SEPARATE PUBLIC ACCESS, EQUIPMENT LOGISTICS, AND EGRESS

FIG.04

PUBLIC NETWORK FOR WALKING · PARKS · SERVICES

PUBLIC MOVEMENT, STAFFED SERVICE, AND EQUIPMENT OPERATIONS ARE ORGANIZED SEPARATELY · ALIGNMENTS ARE CONCEPTUAL

Public access, equipment logistics, egress, and research and equipment operations closure are organized separately. Parking, utilities, fire safety, and rail connections require surveys and specialist review.

PROVISIONAL ROUGH BOUNDARY · NOT AN OFFICIAL REDLINE · NOT FOR DAZHONGSI LOCATION CLAIMS

Key Indicators

STATE CURRENT VALUES AND THEIR LIMITS

FIG.05

KEY INDICATORS AND THEIR LIMITS

PROVISIONAL BOUNDARY FOR DESIGN COMPARISON • STATUTORY CONTROLS REQUIRE OFFICIAL DATA

PENDING OFFICIAL EVIDENCE: FAR • TOTAL FLOOR AREA • STATUTORY COVERAGE • HEIGHT • ROAD AREA • SETBACKS

Current indicators compare design structure and are not statutory controls. Official boundaries and planning controls require coordinated updates to land use, buildings, movement, public space, and phasing.

Identity, Rights, and Next Steps

WORKING NAME • OFFICIAL EVIDENCE AND SPECIALIST REVIEW PRECEDE DELIVERY

FIG.06

WORKING NAME AND VISUAL IDENTITY

A RAILWAY LINE, THREE KEY AREAS, AND TWO ENTRANCES FORM THE IDENTITY • NO THIRD-PARTY MARKS

	PARK GREEN #557A59		SERVICE BLUE #466B8B		

USAGE RULES

- 1 Use full bilingual terms publicly; keep letter codes only in structured data
- 2 Entrance signs name public service, staffed service, and research and equipment operations
- 3 Show provisional areas, concept dimensions, and pending evidence in grey
- 4 Before publication, the participant checks the name, fonts, and graphics and obtains professional advice if required

Jing-Zhang Public Service Corridor is a working design name. The name, fonts, graphics, and sources require item-level rights review before publication; official boundaries, planning controls, survey, ownership, fire safety, utilities, budgets, and operators remain next-stage preconditions.
