

Rail Memory AI Commons Overview

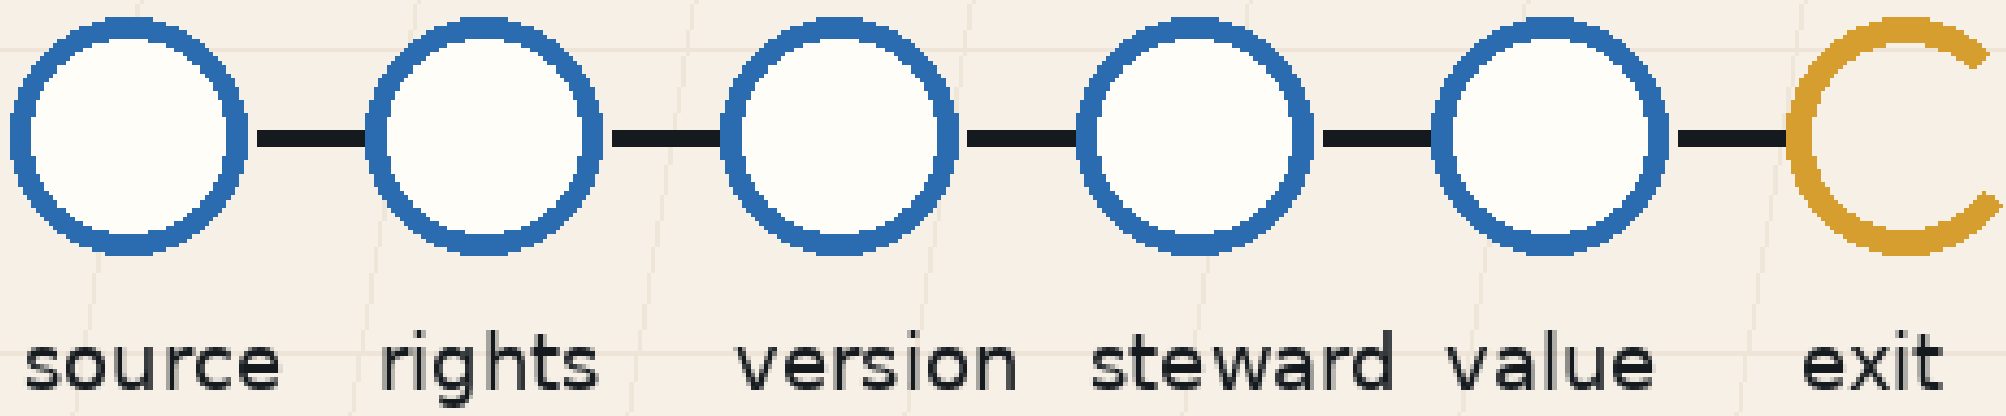

Rail Memory AI Commons

Memory Link evidence chain + three repositories + four honor nodes

Memory Link

source -> rights -> version -> steward -> public value -> exit/recompute

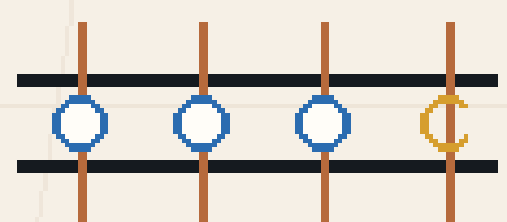

4 honor nodes

12 memory points

3 repository protot

2 service wings

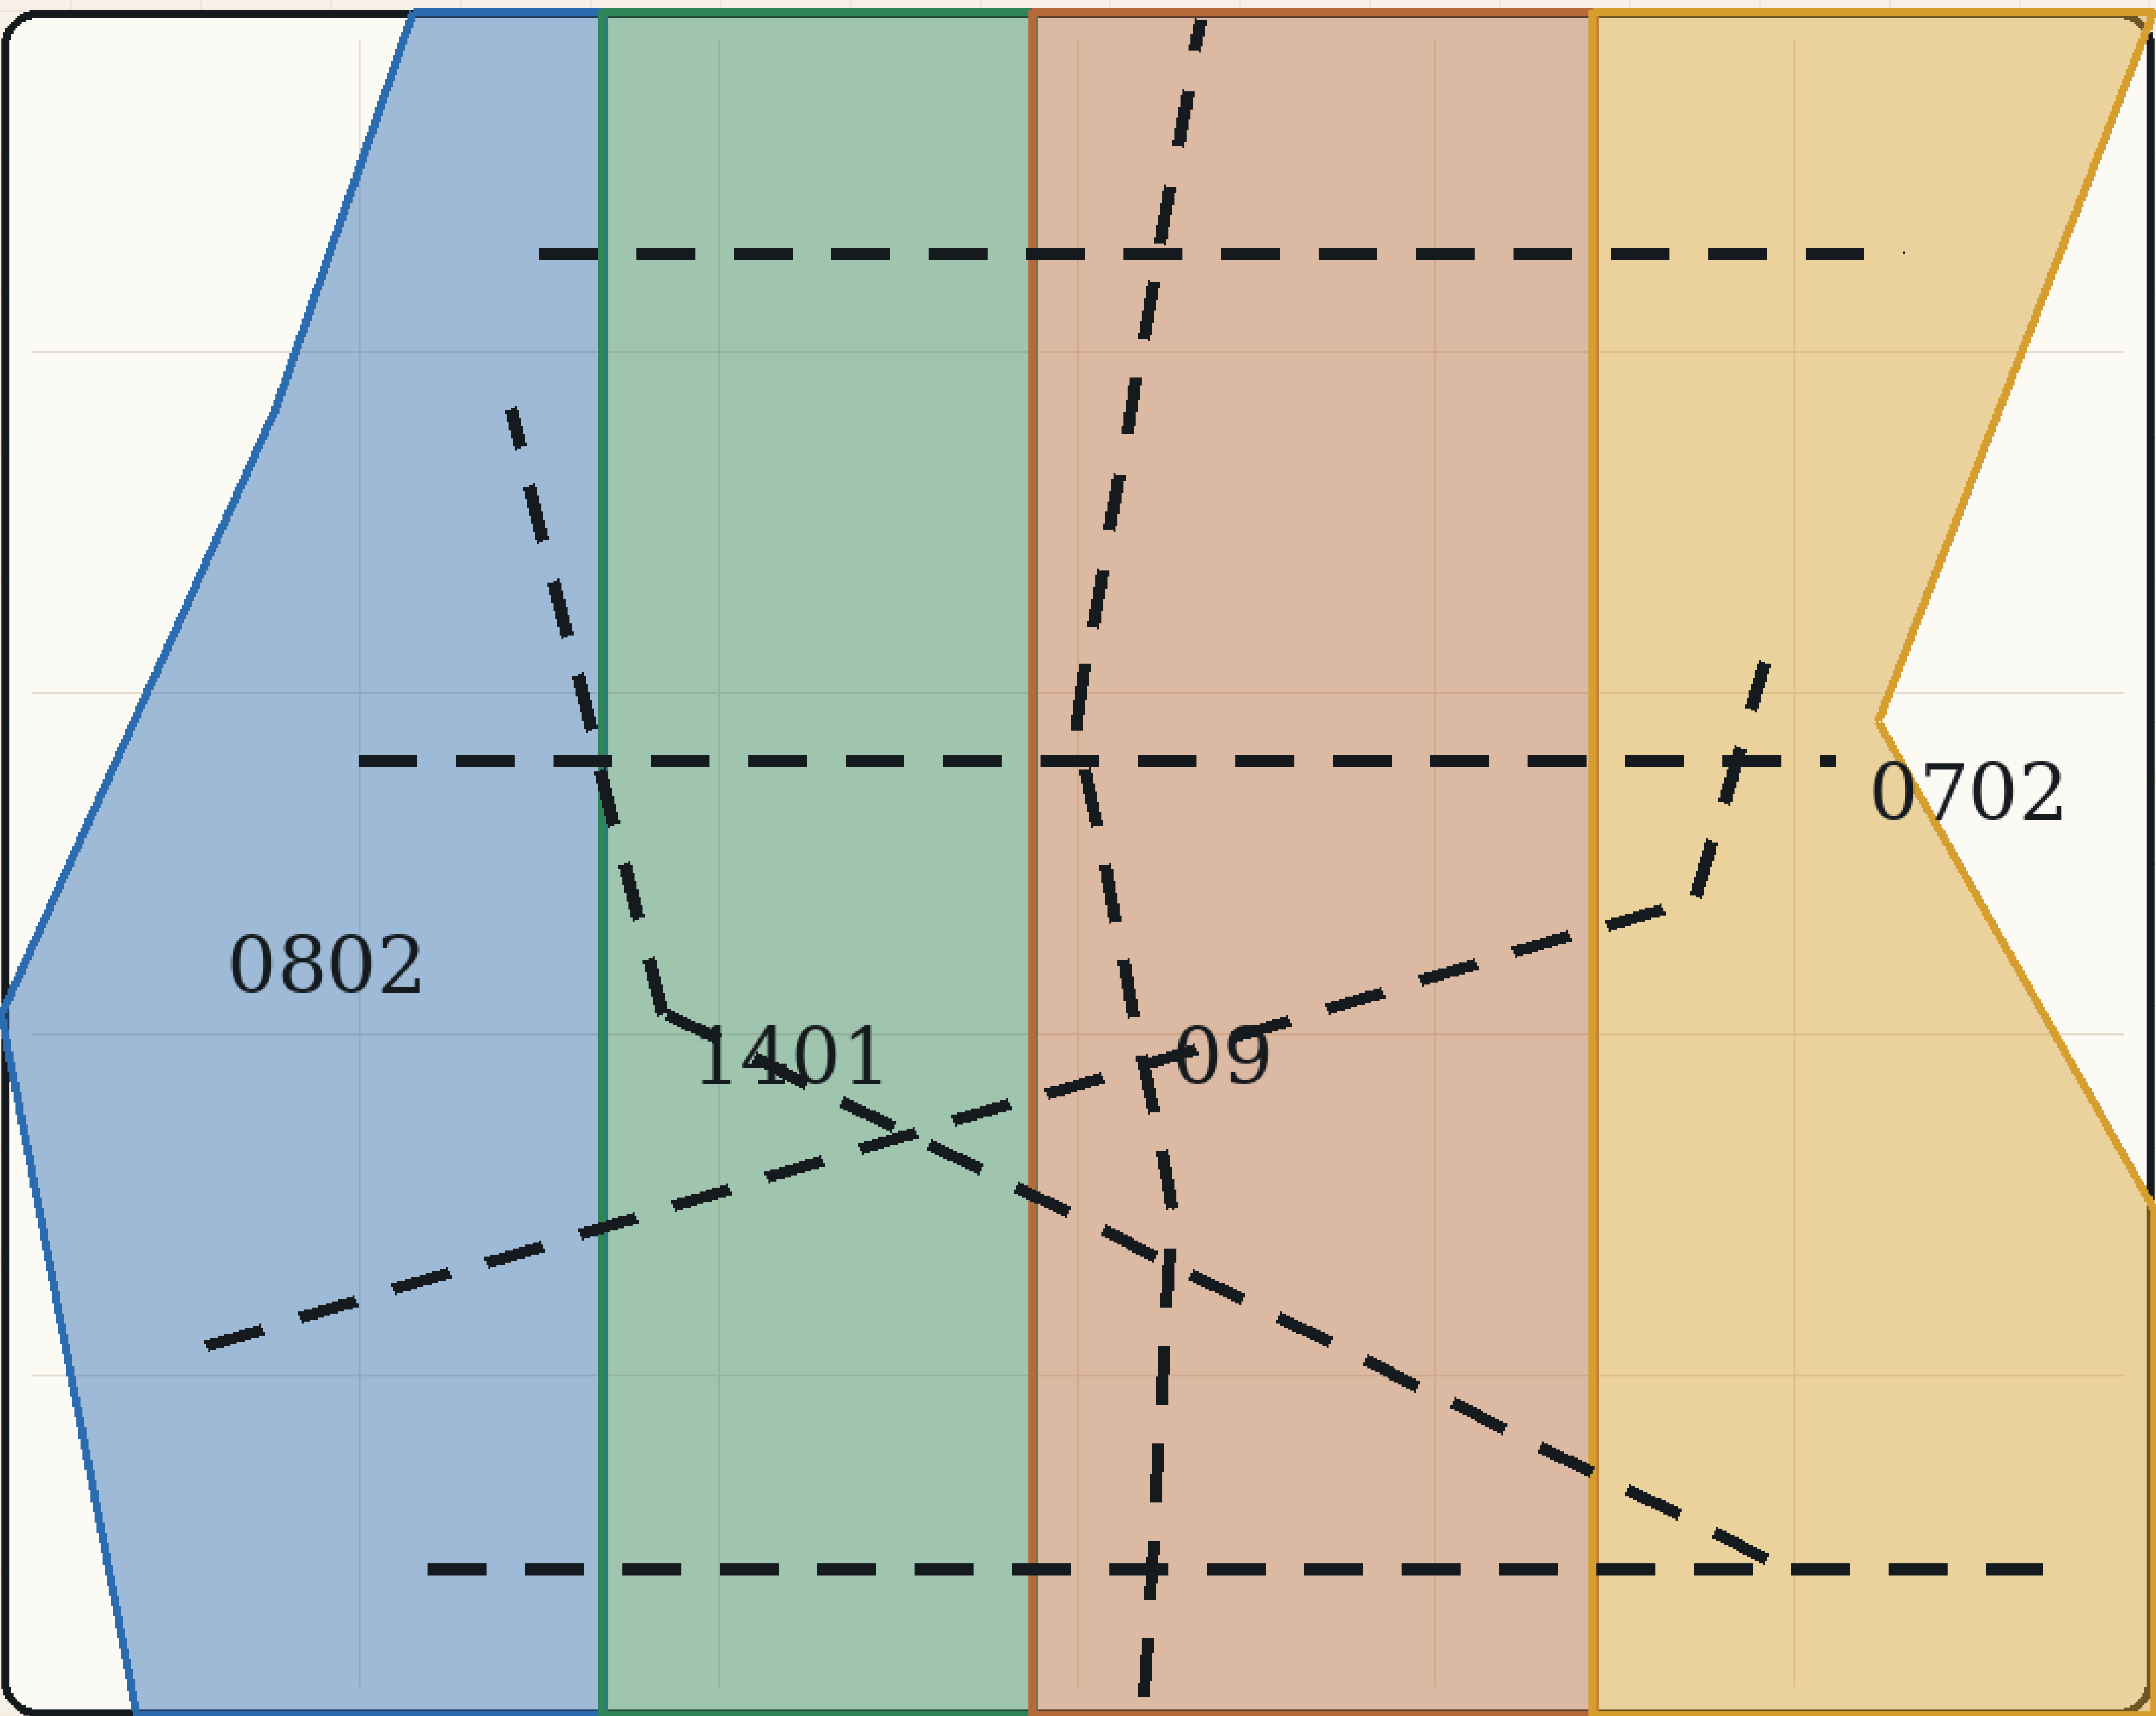

Source: submission GeoJSON + metrics.json + proposal text; provisional boundary is for intake discussion only, not an official redline.

Land Use Structure and Scope Transmission

Rail Memory AI Commons

actual provisional topology, not statutory land conversion

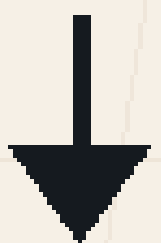

- 0802 R&D commons
- 1401 green open space
- 09 industry service
- 0702 community service

Source: submission GeoJSON + metrics.json + proposal text; provisional boundary is for intake discussion only, not an official redline.

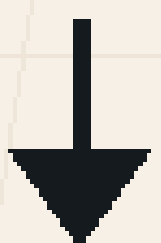

43.6 km2 coordinated research

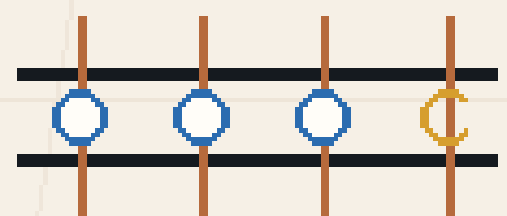

11.4 km2 overall design

3 key areas

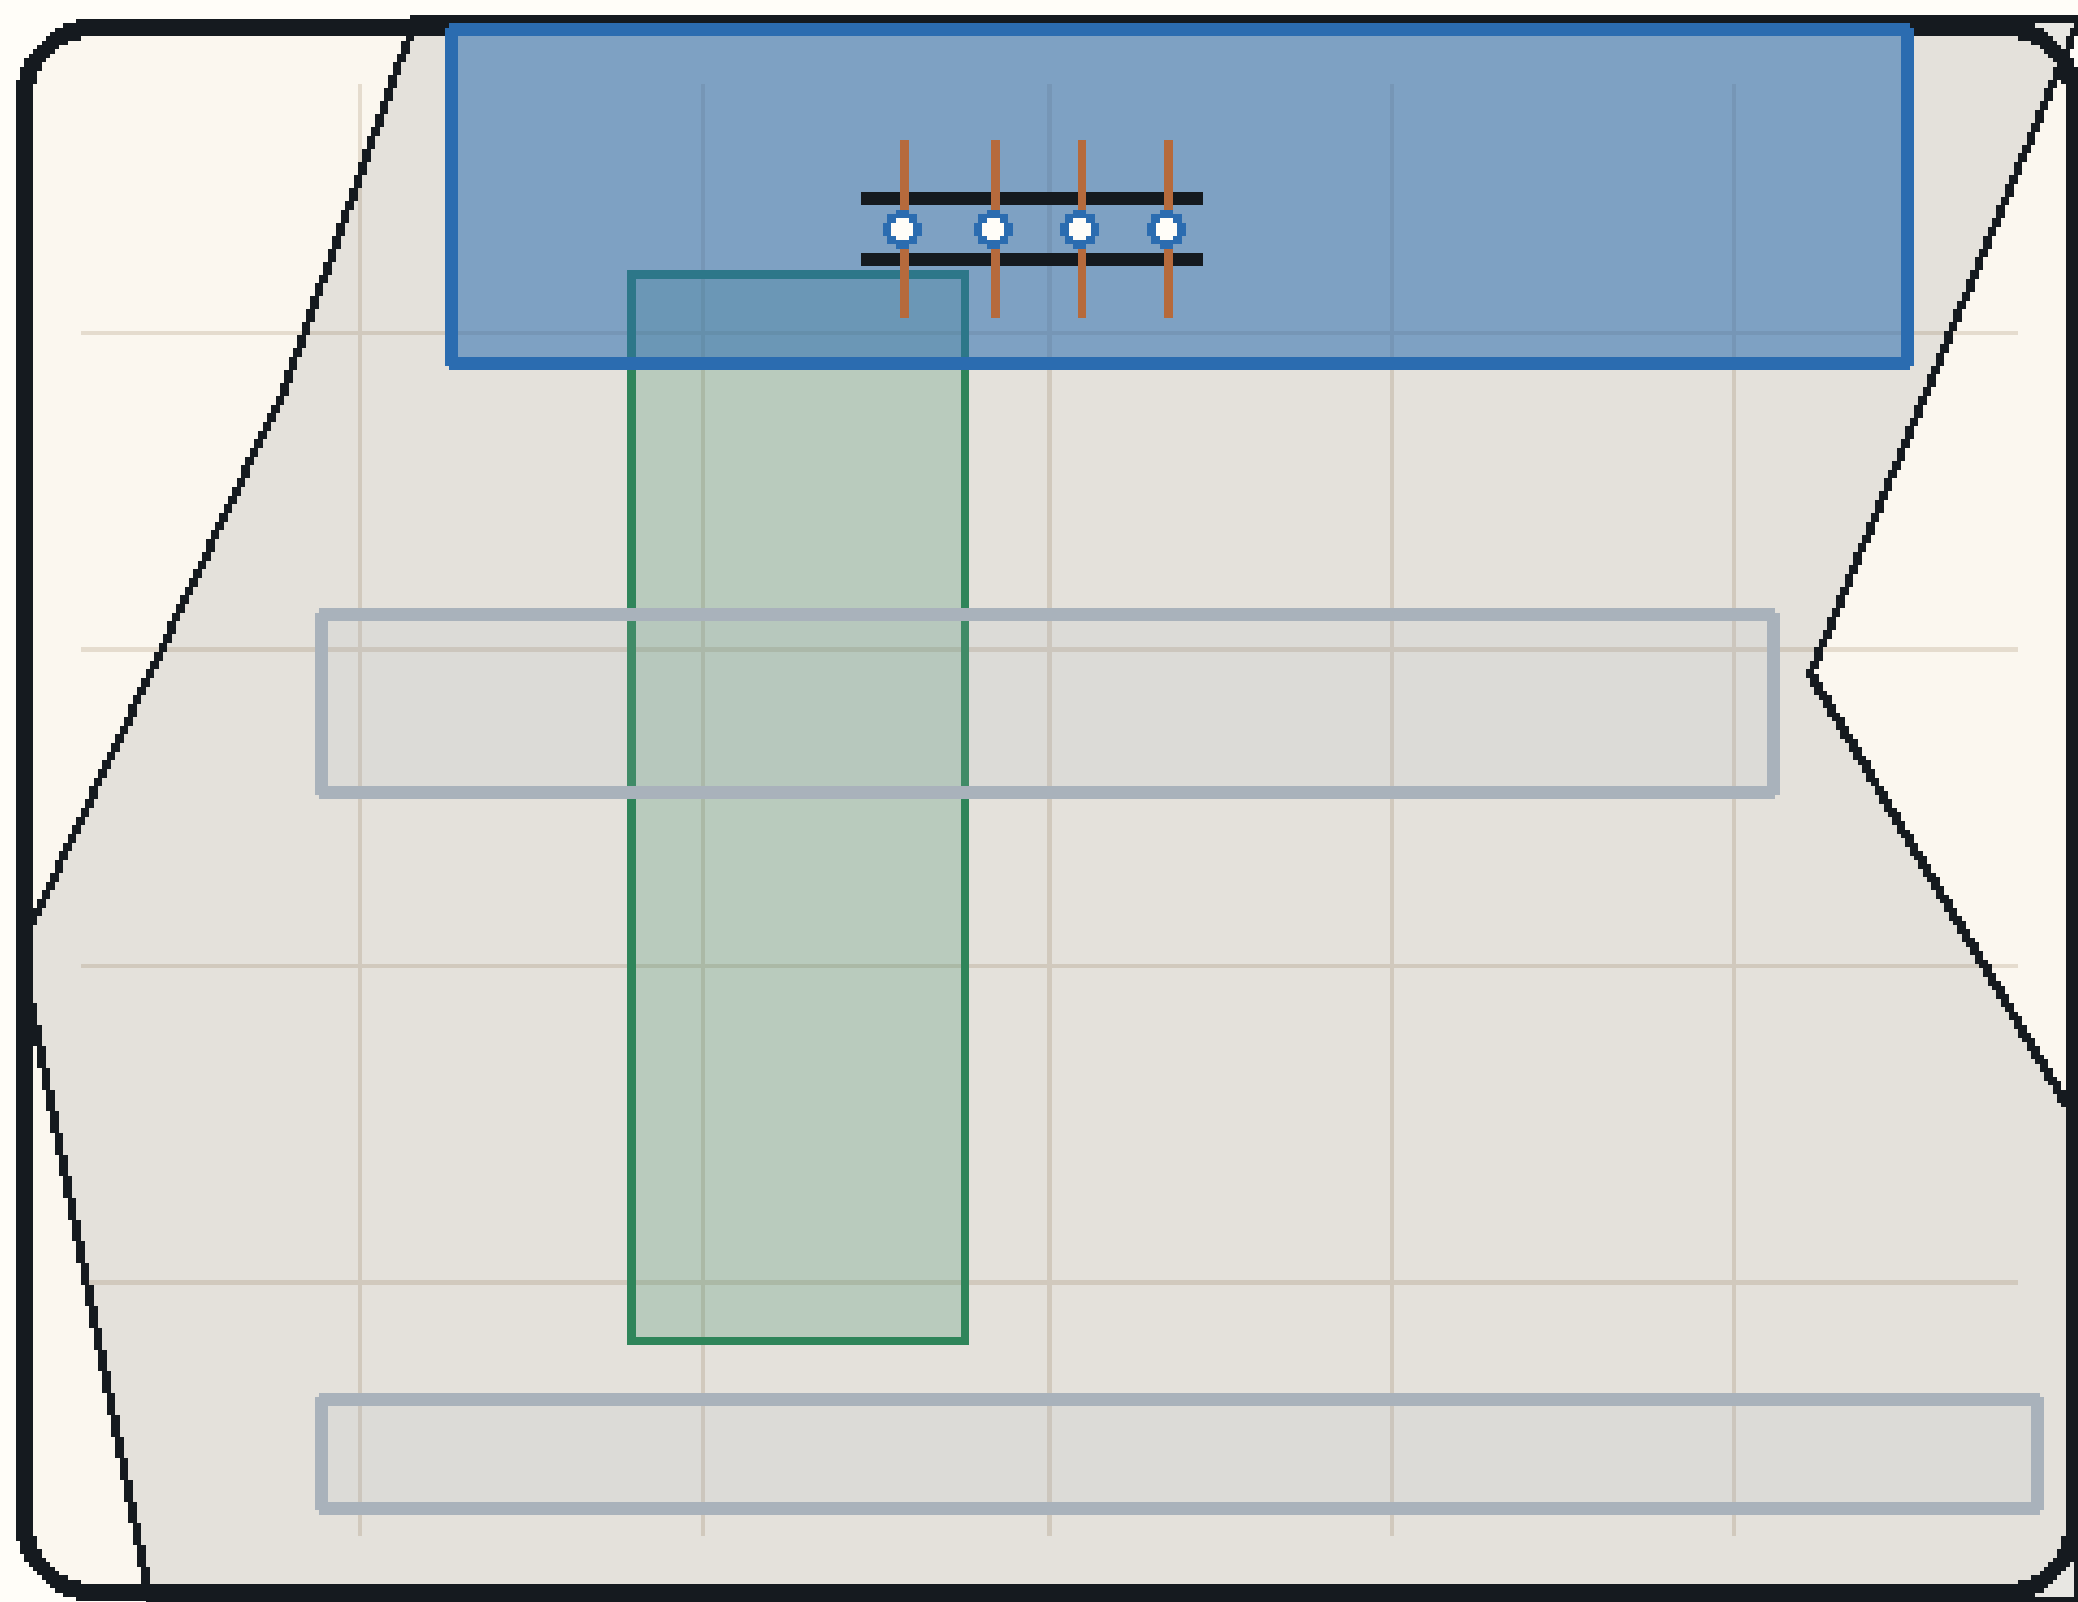

12 memory points

Three Key Areas: Memory Prototypes

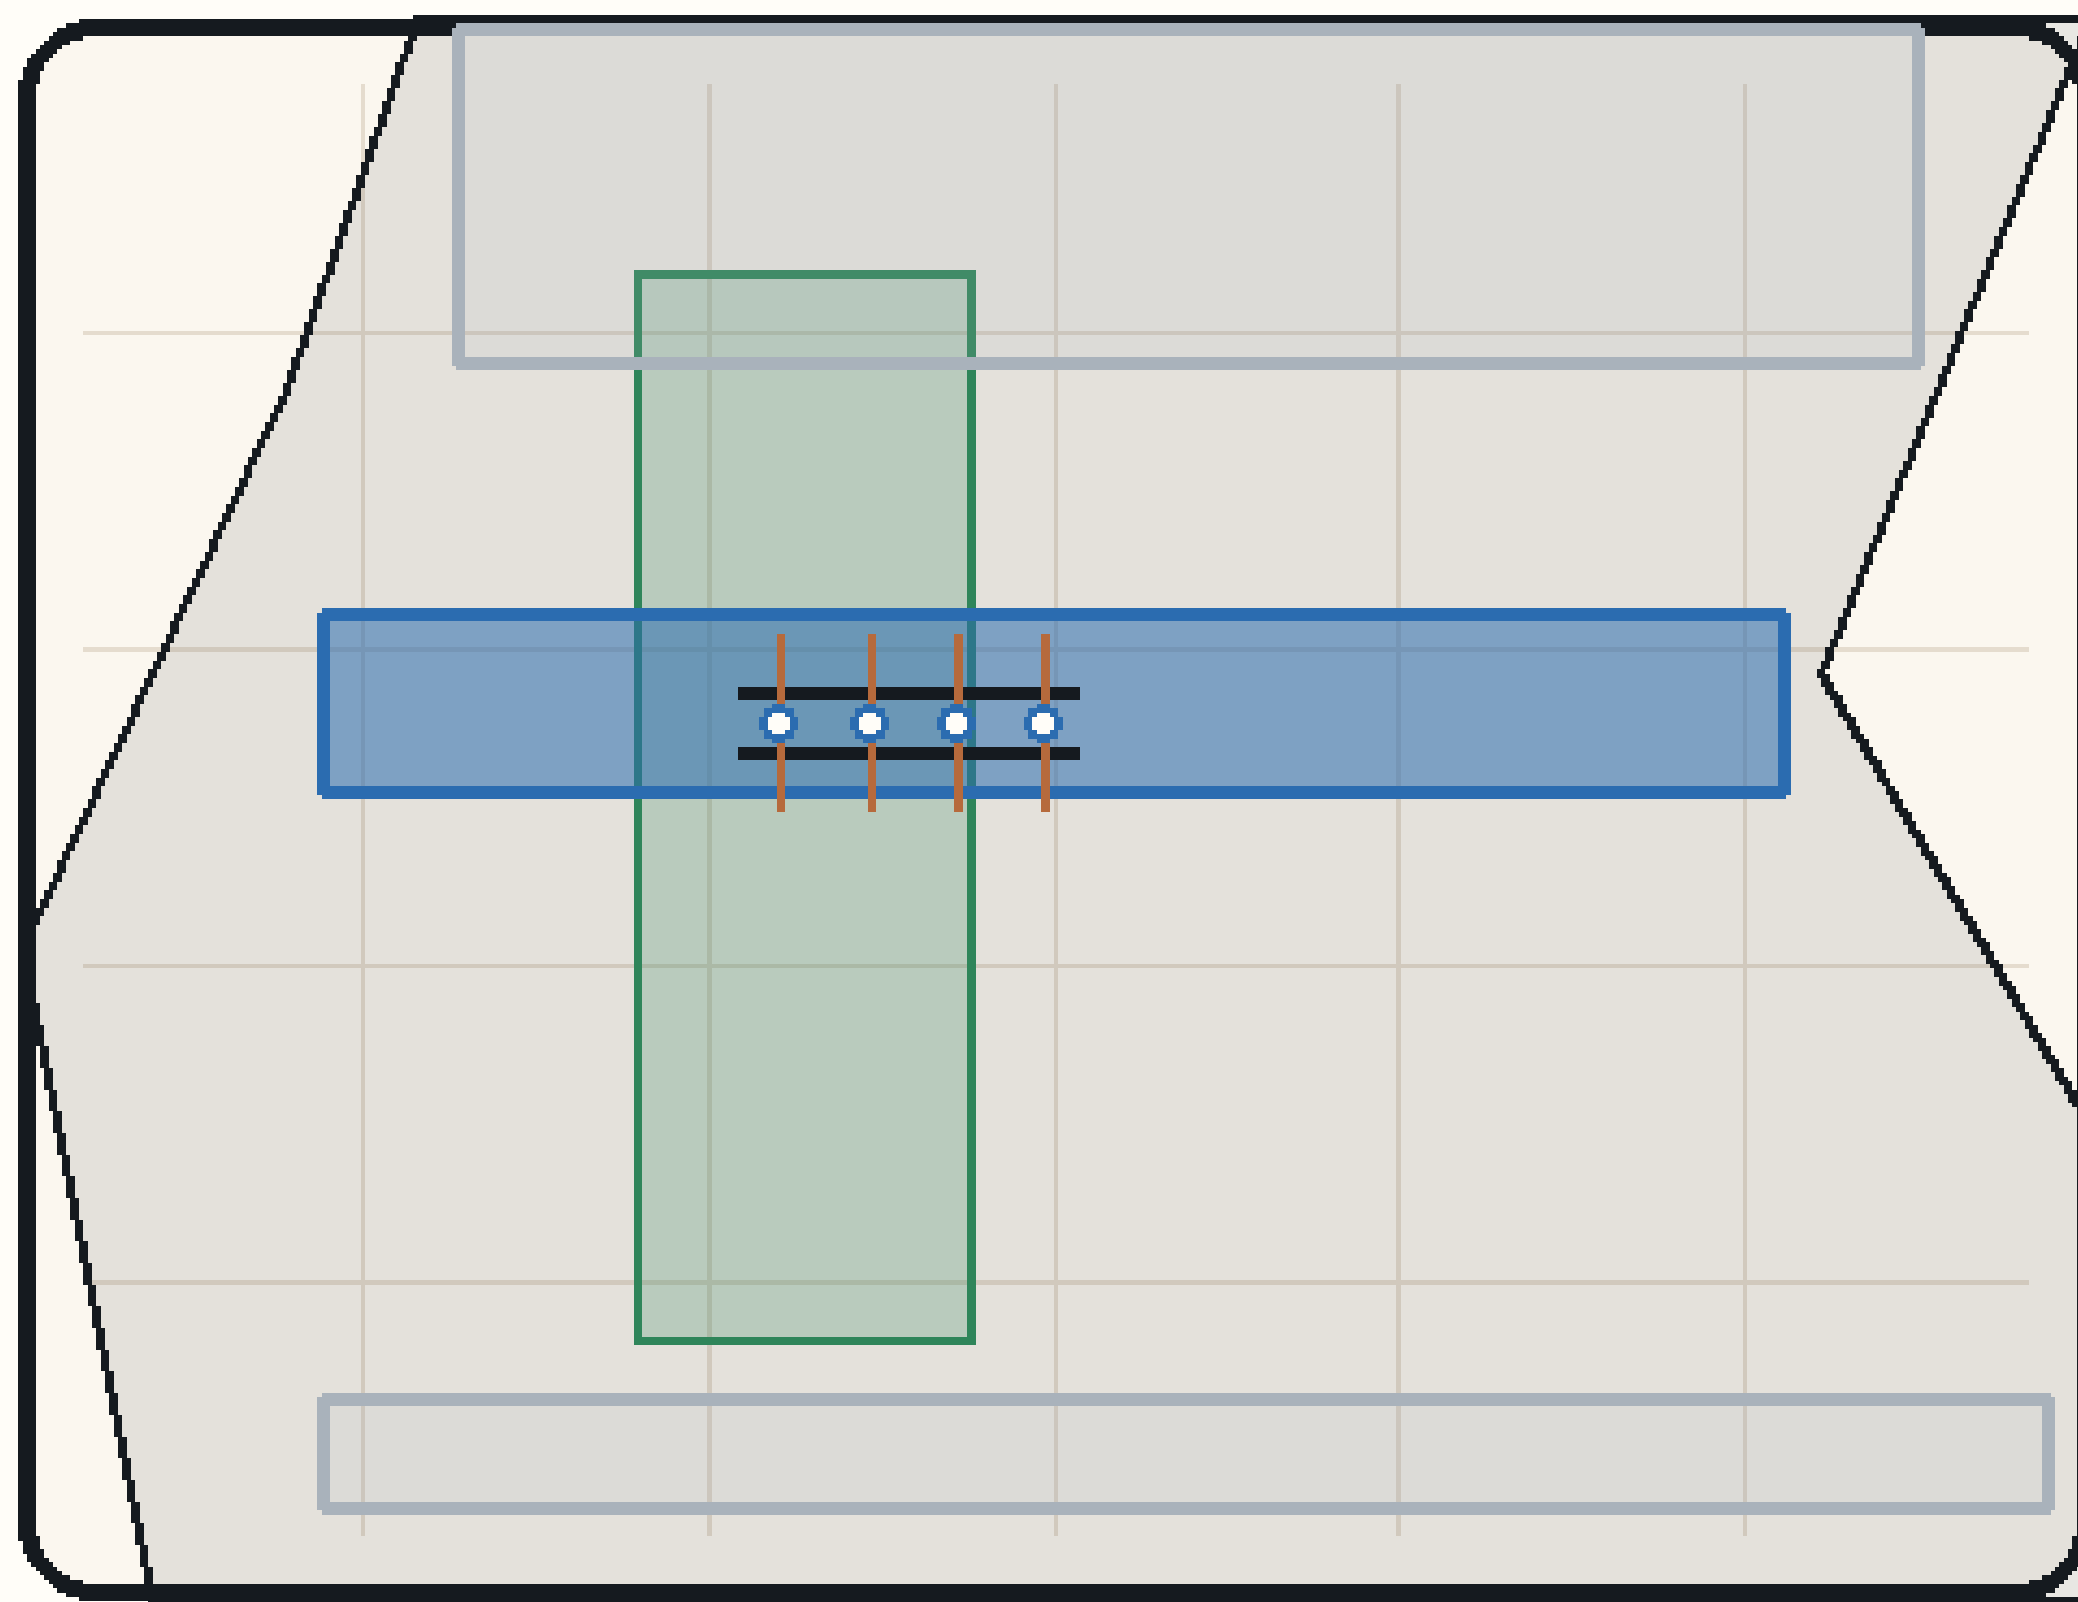

Rail Memory AI Commons

trptych of forge, studio, and public adoption exchange

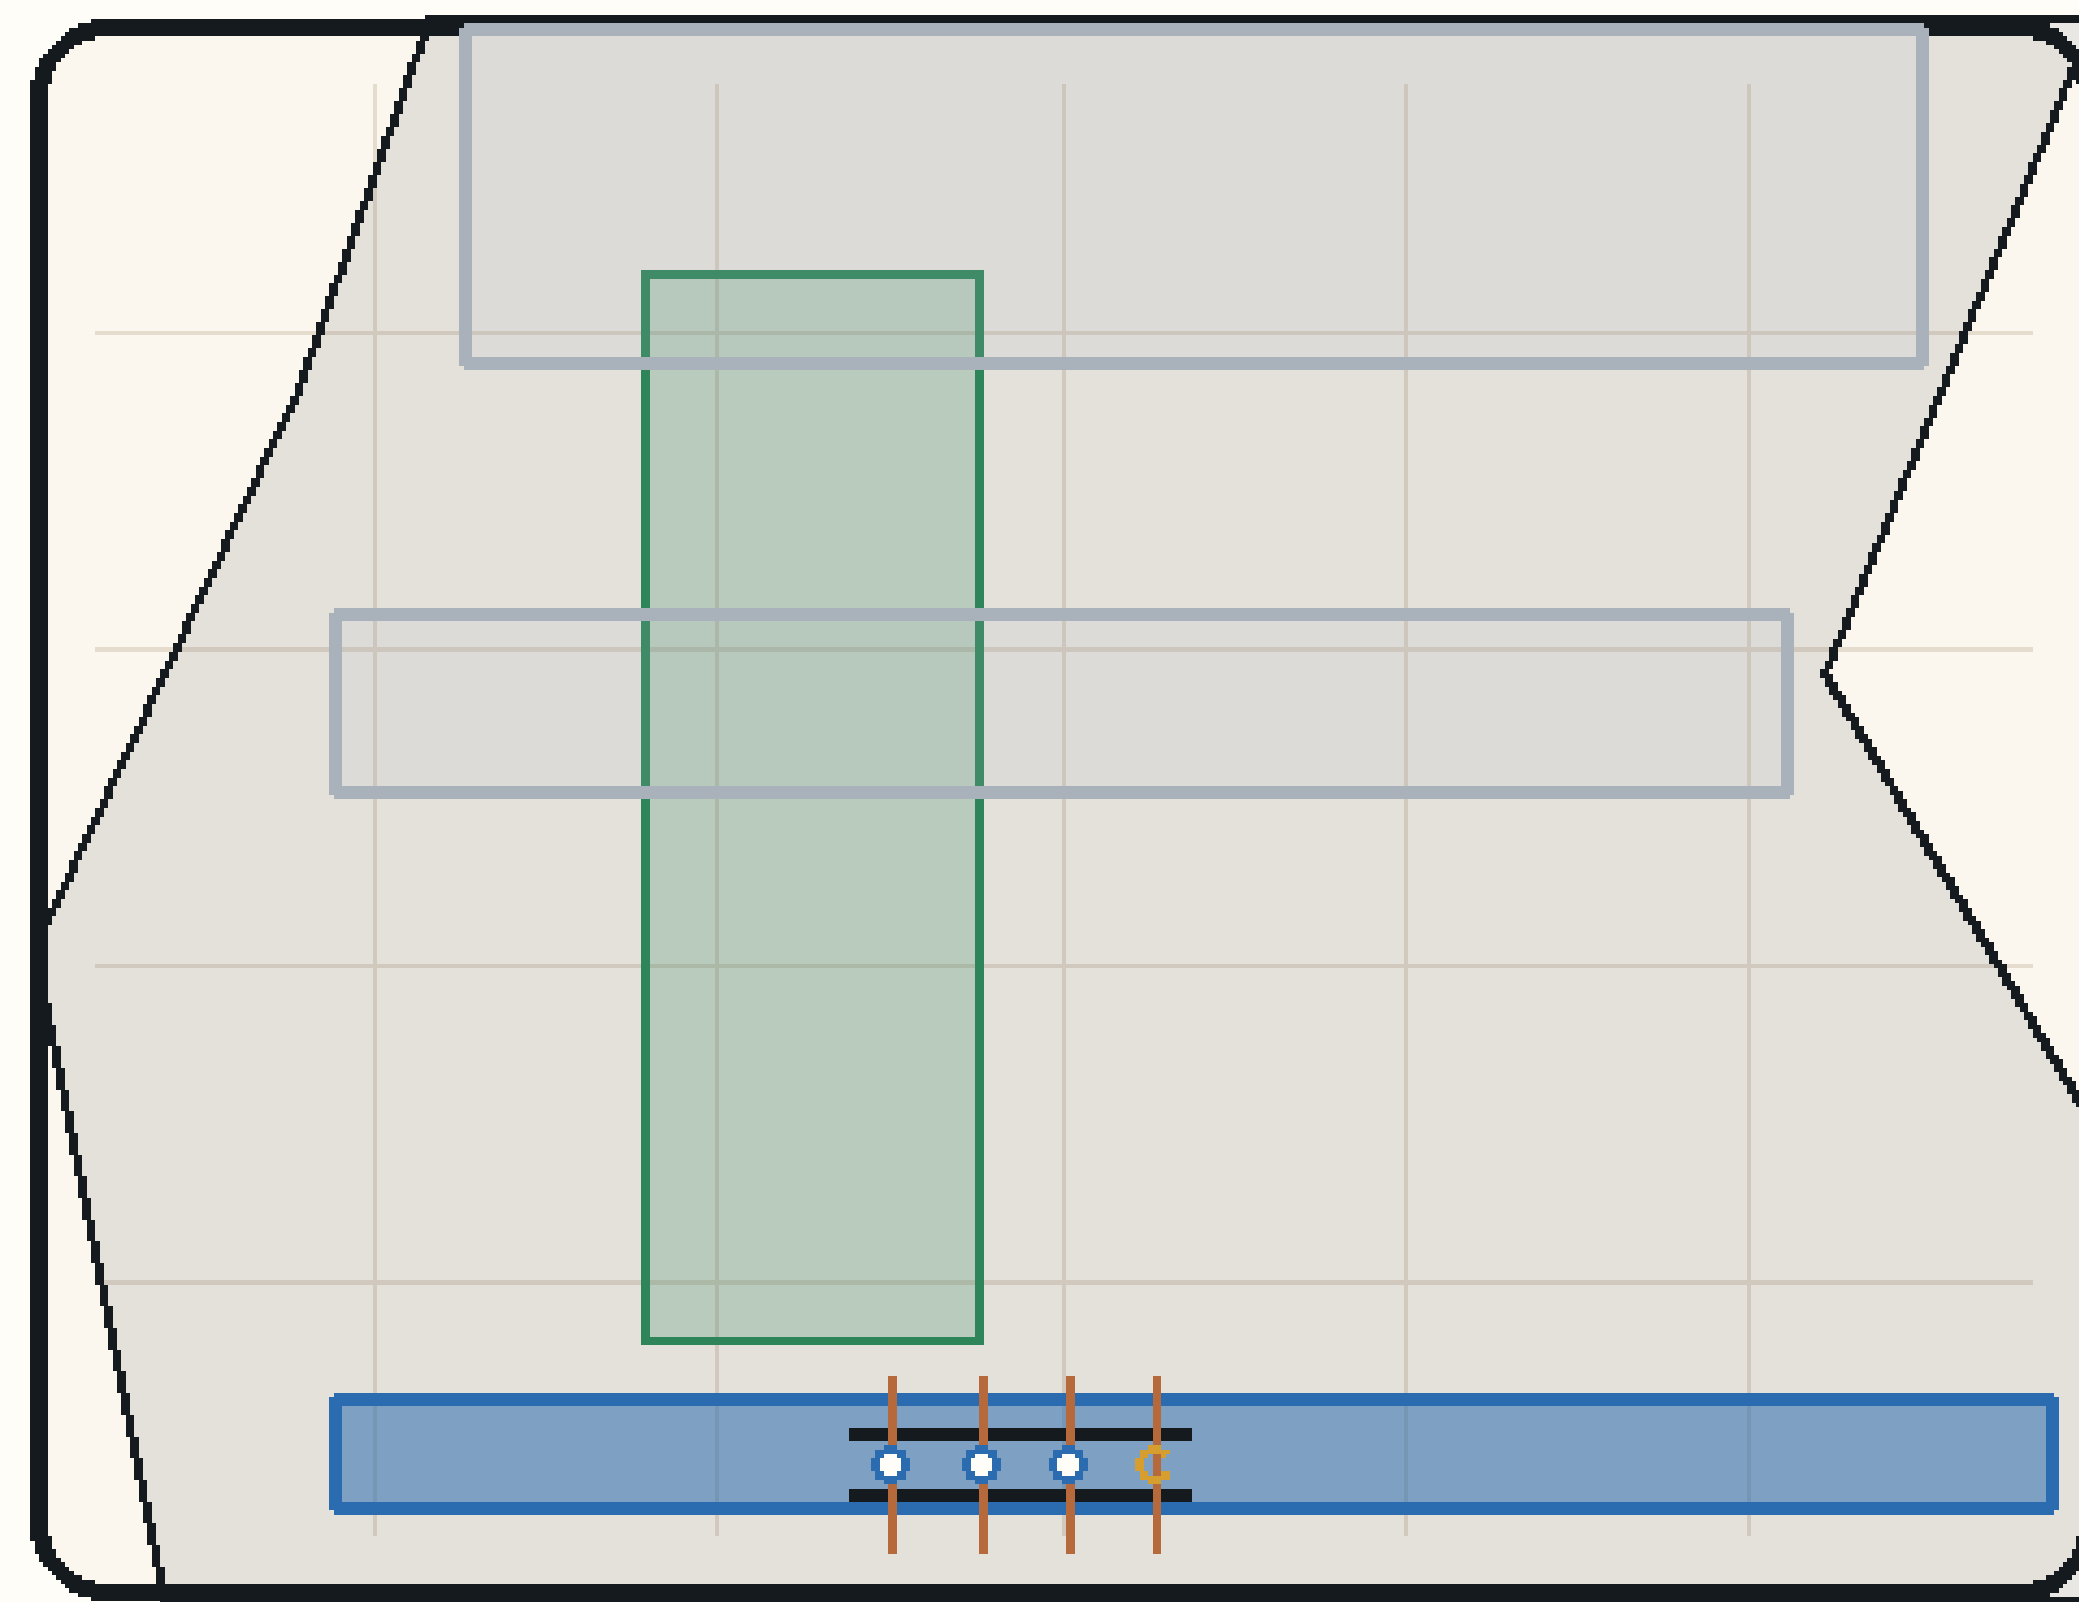

Stack Memory Forge
model/data/robotics validation

- reviewable scenario entrance
- rights and source ledger
- human steward and exit gate

AI Origin Open Memory Studio
open-source translation and rights

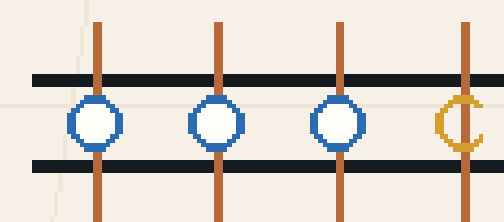

- reviewable scenario entrance
- rights and source ledger
- human steward and exit gate

Public Adoption Exchange
public preview and feedback

- reviewable scenario entrance
- rights and source ledger
- human steward and exit gate

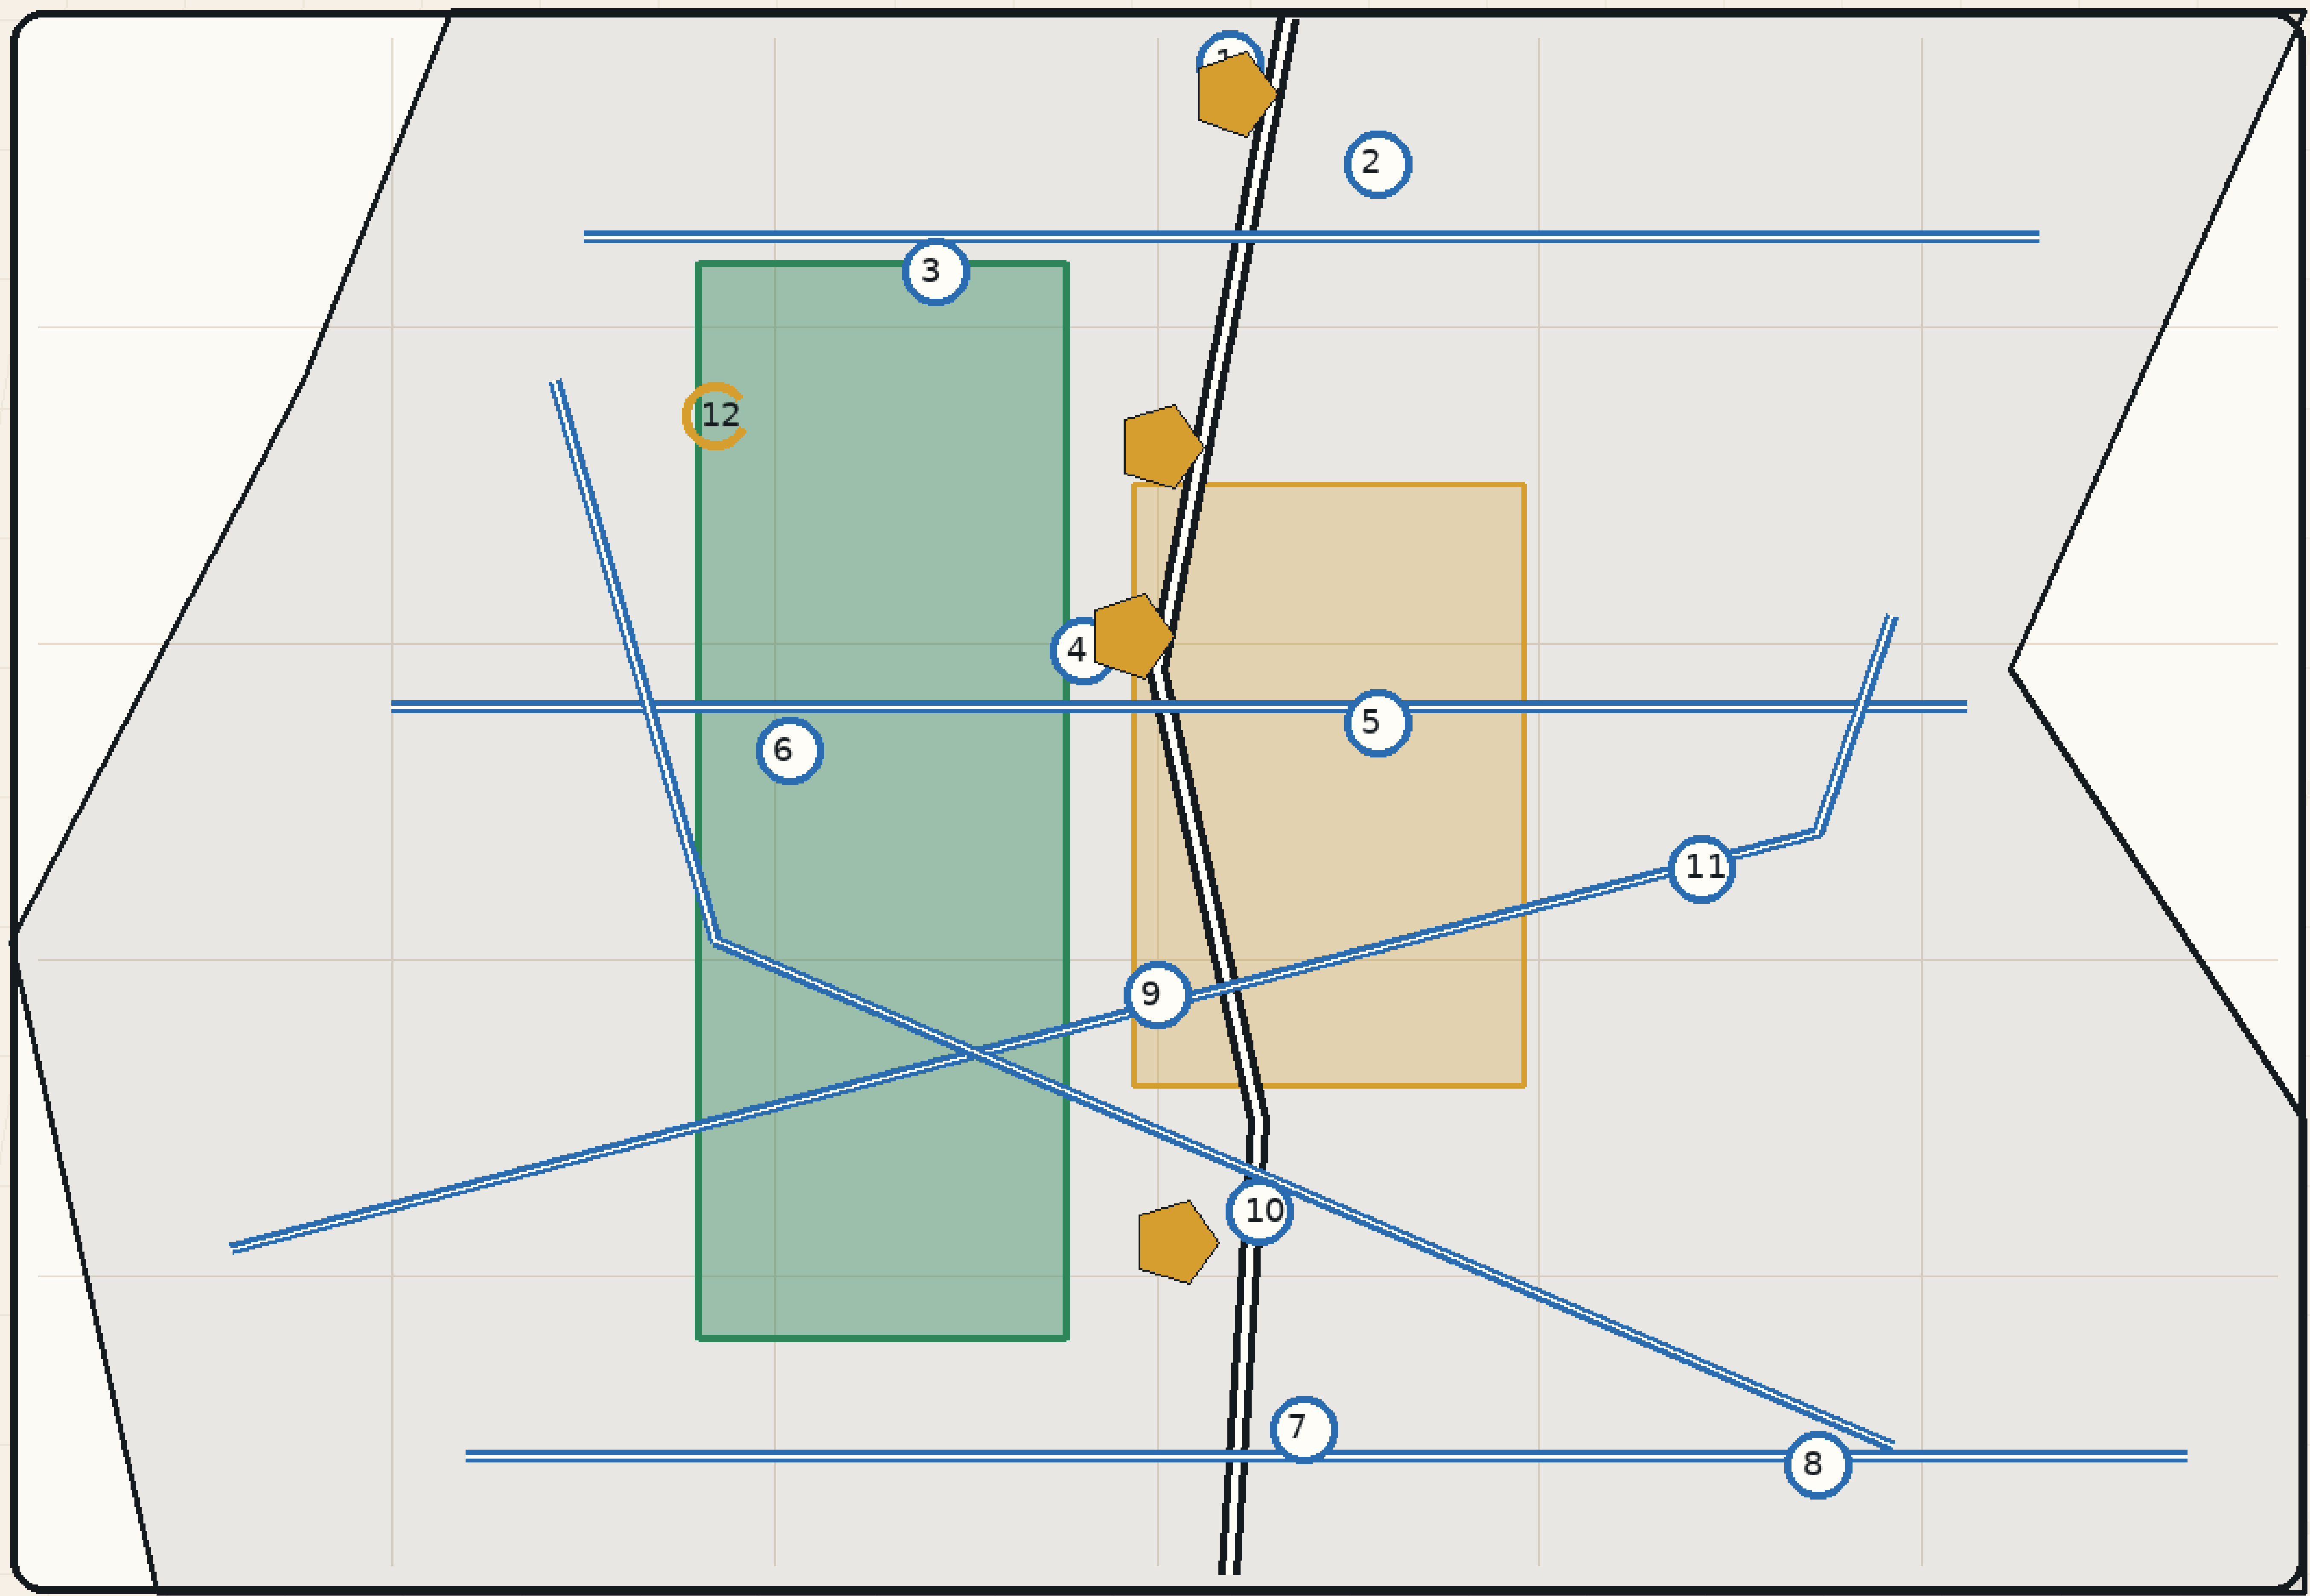

Source: submission GeoJSON + metrics.json + proposal text; provisional boundary is for intake discussion only, not an official redline.

Mobility and Blue-Green Network

Rail Memory AI Commons

conceptual centerlines + green spine + twelve memory points

22.99 km
conceptual network length

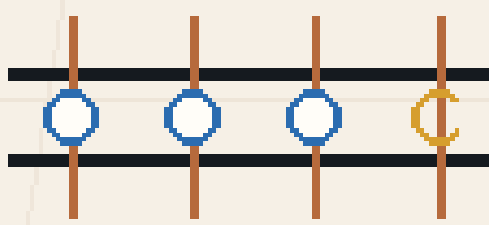

12
reviewable memory points

4
honor/pilgrimage nodes

unknown
road redline area

Road redlines, under-bridge
space, parking and municipal
conditions require official
data.

Source: submission GeoJSON + metrics.json + proposal text; provisional boundary is for intake discussion only, not an official redline.

Core Metrics and Evidence Chain

Rail Memory AI Commons

known, provisional, and unknown states kept visible

site area

11,412,825.386sqm

green ratio

0.123423

ratio

public space ratio

0.073281

ratio

memory points

12

count

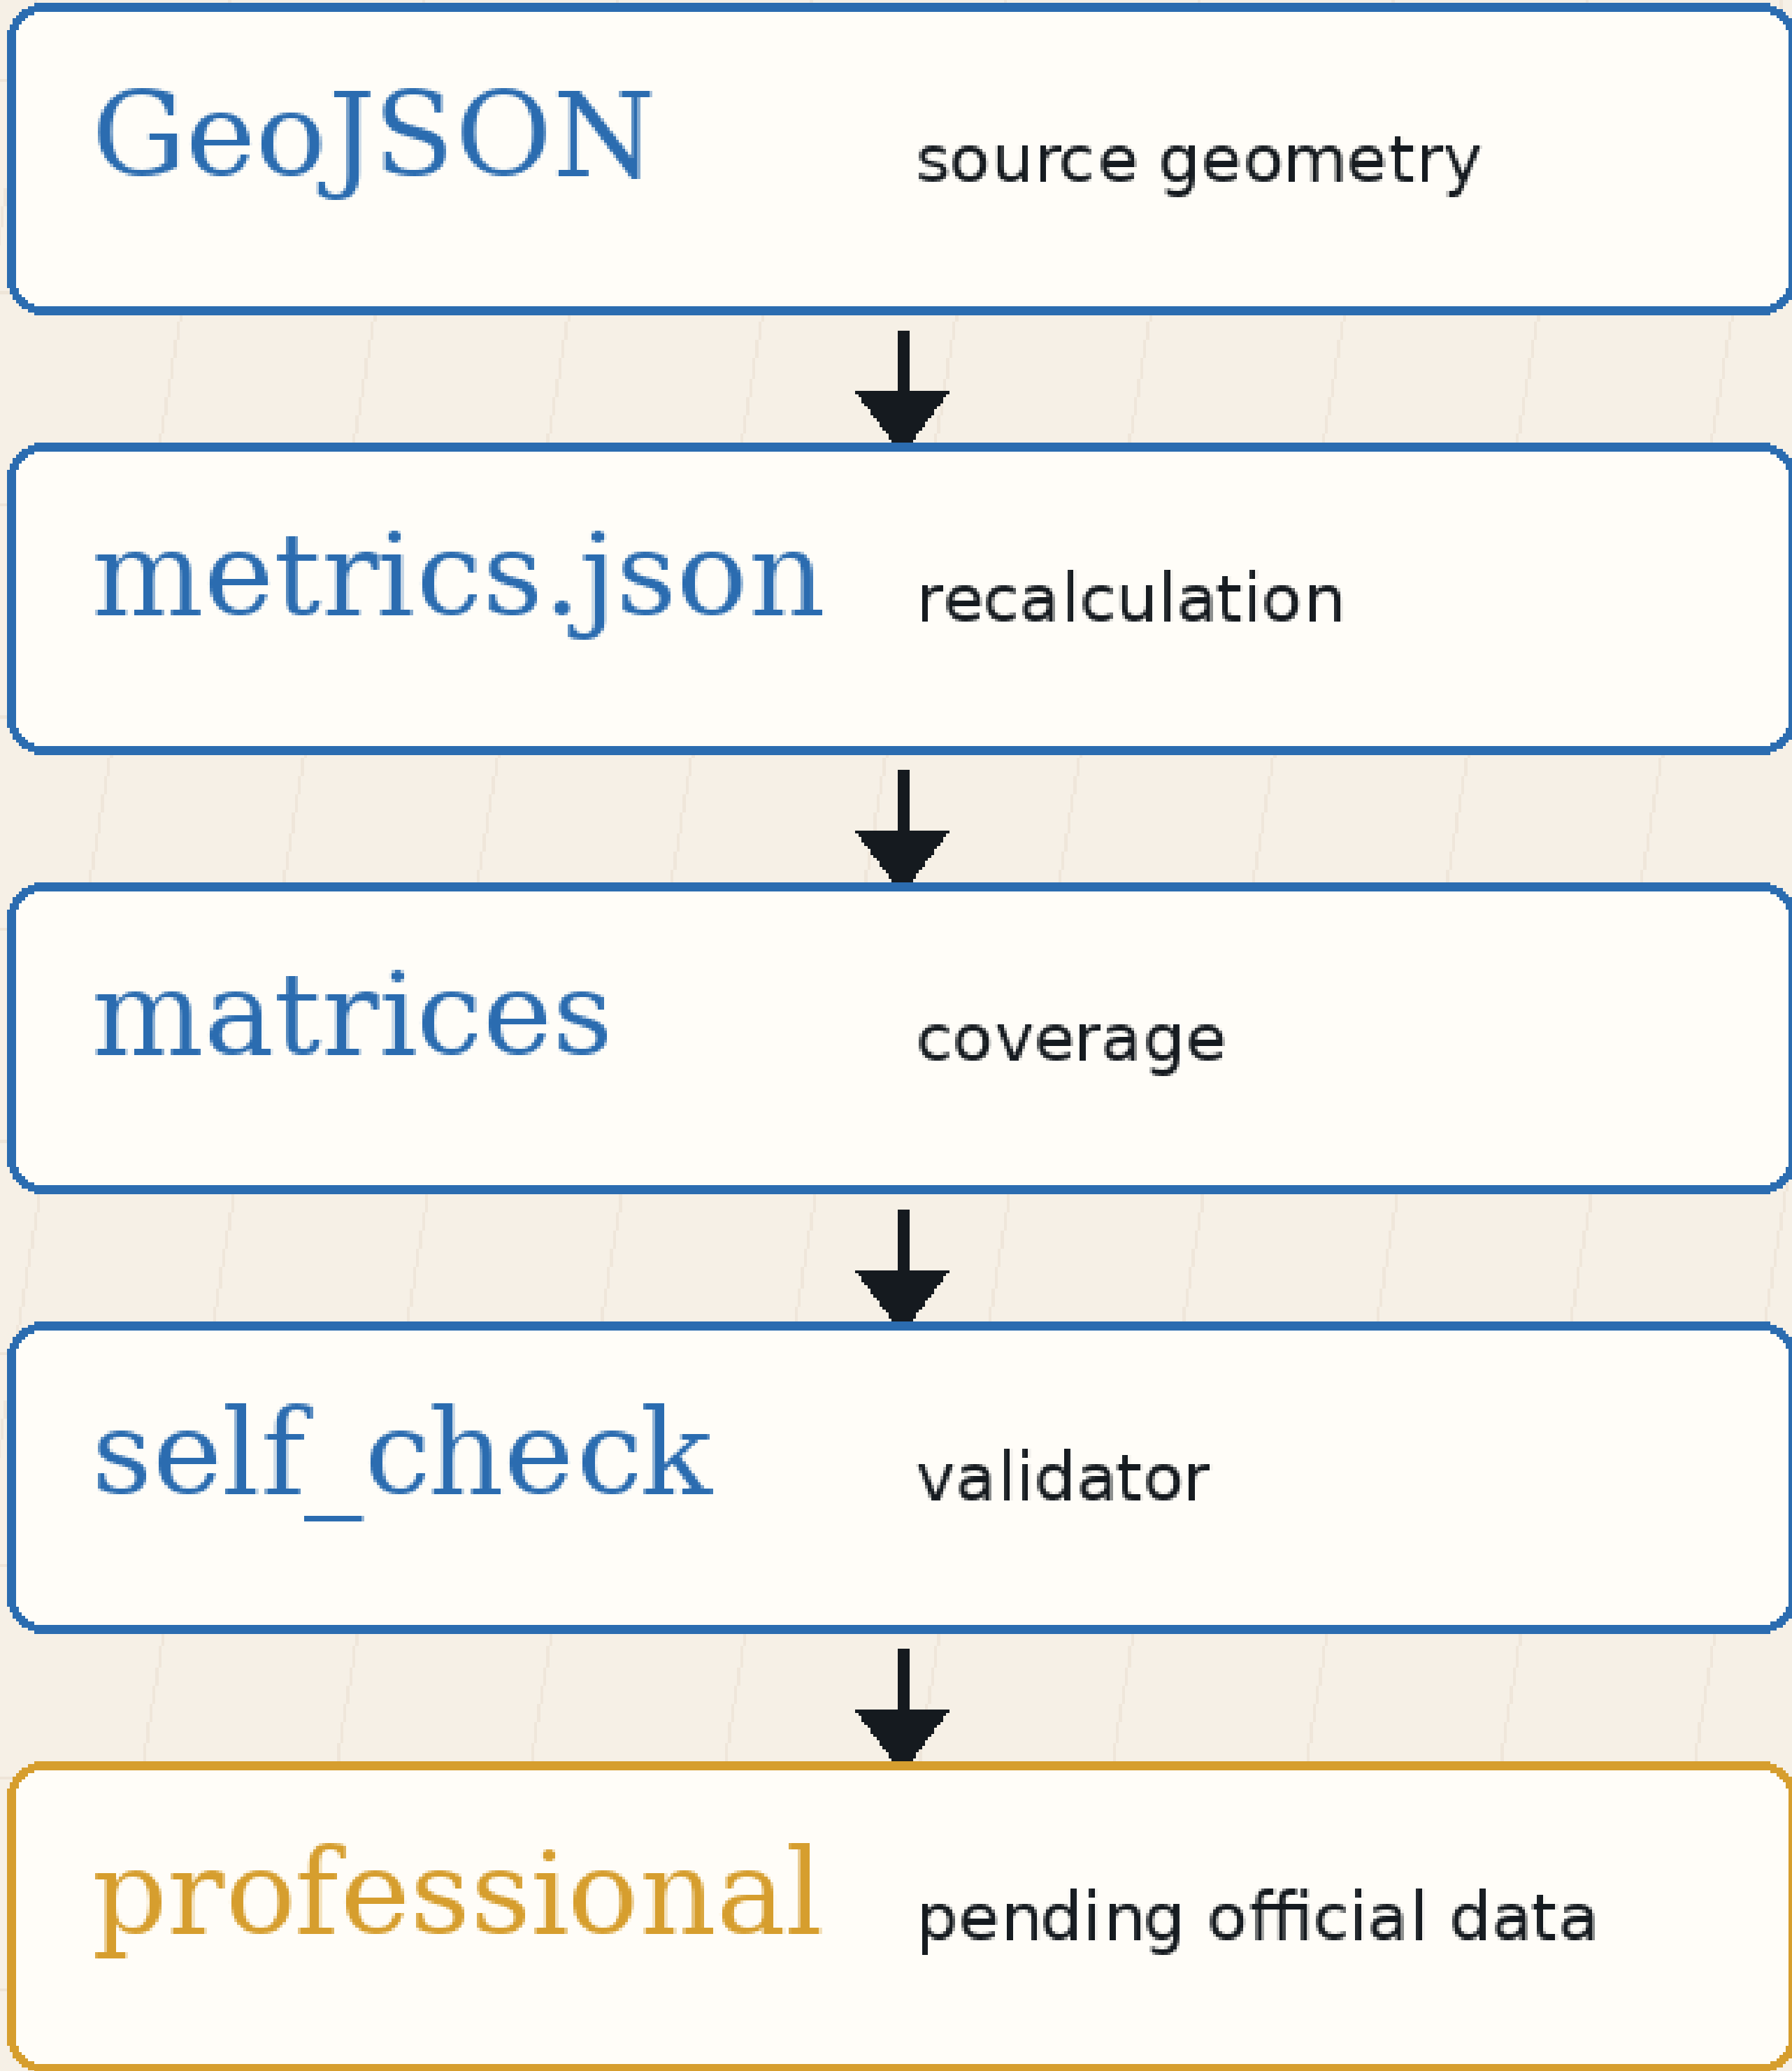

industry validation

4

count

Unknown controls

floor_area_ratio / height_control_m / road_area_sqm / statutory_building_density

Source: submission GeoJSON + metrics.json + proposal text; provisional boundary is for intake discussion only, not an official redline.
