

# Centennial Jingzhang · Community New Rail

Three scopes + three key areas + AI public space index (provisional boundary)

All geometry based on provisional boundary; does not replace official redline

Zhongzhiyuan / Al Origin/Dazhedongjue-jingzhongdiedegay-waidiShuoal markagje Qnot-offipathagjeNot official redin

### Concept Land-Use Structure

5 horizontal bands + 1 Jingzhang green wedge; not a regulatory plan

Source: agent generated design + brief enums  
Status: All geometry based on provisional boundary; does not replace official redline / regulatory plan.

Concept land use powers legitimacy. A neighborhood's high biodiversity concept is a badge of citizenship, not a red line.

### Core Metric Recompute & Evidence Chain

All from submitted GeoJSON recomputed in EPSG:4548; awaiting official regulatory plan

Source: geometry/\*.geojson + metrics.json  
Status: All geometry based on provisional boundary; does not replace official redline / regulatory plan.

Official controls (FAR / height / density / green ratio / setback) = status=unknown, awaiting official regulatory plan.

AI-empowered legacy-neighborhood renewal · Concept package · Not official redline

1909 → 2026

In 1909, Zhan Tianyou's Qinglongqiao switchback proved China could build its own modern railway — the origin of technological sovereignty.

In 2026, the AI innovation belt must answer: how does a city organize itself in the intelligent era? — the next century's urban paradigm origin.

Five Don'ts

- Don't break the old: preserve legacy texture; no total demolition.
- Don't disturb: embed AI silently; avoid surveillance feel.
- Don't exclude: youth / elderly / children / disabled all share.
- Don't copy: every neighborhood gets a unique AI scenario.
- Don't overpromise: all controls / FAR / redlines await official data.

Three Affirmatives

- Connection: legacy neighborhoods join the AI era like joining railways in 1909.
- Stitching: the two sides cut apart by the railway a century ago are re-joined.
- Education: AI makes legacy neighborhoods the first beneficiaries of the global AI innovation belt.

Wayfinding & Symbols

Jingzhang elements (rail / timetable / station names) + AI elements (data flow / node / interface). Avoid commercial / religious symbols, unauthorized typefaces / trademarks / images.
