

Origin · Converging Intelligence

Centennial Jing-Zhang AI Innovation Belt — One Spine, Three Cores, Three Veins

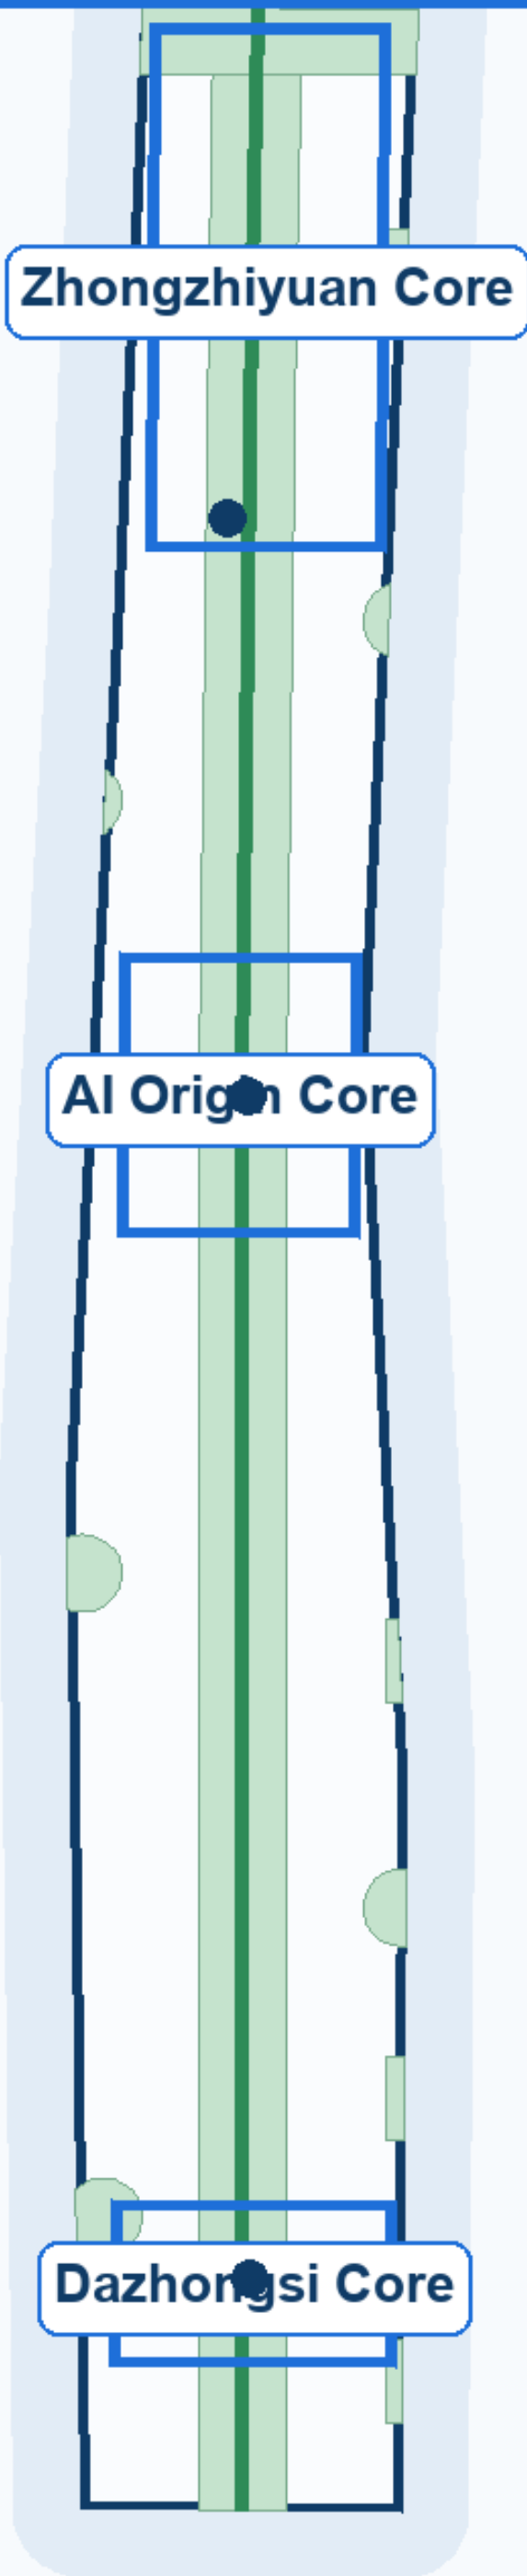

Tinxyoo · GLM-5.3 · formal
provisional boundary

Origin · Converging Intelligence — Overview

One spine, three cores, three veins along the Jing-Zhang heritage corridor

Legend

- Blue-green
- Key area (provisional)
- Spine greenway
- Public anchor

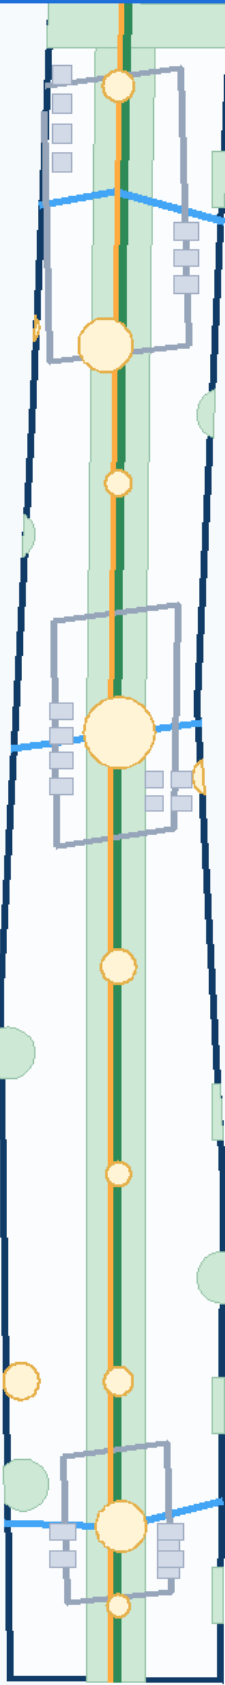

Basemap: submitted geometry layers; provisional boundaries, not official redlines

Mobility × Blue-Green Network

One spine, two loops, three stitches across the corridor

FIG.04 / MOBILITY

- Blue-green
- Spine greenway
- East-west cycle stitches
- Core service loops
- Accessible pedestrian spine
- Public nodes
- Innovation clusters

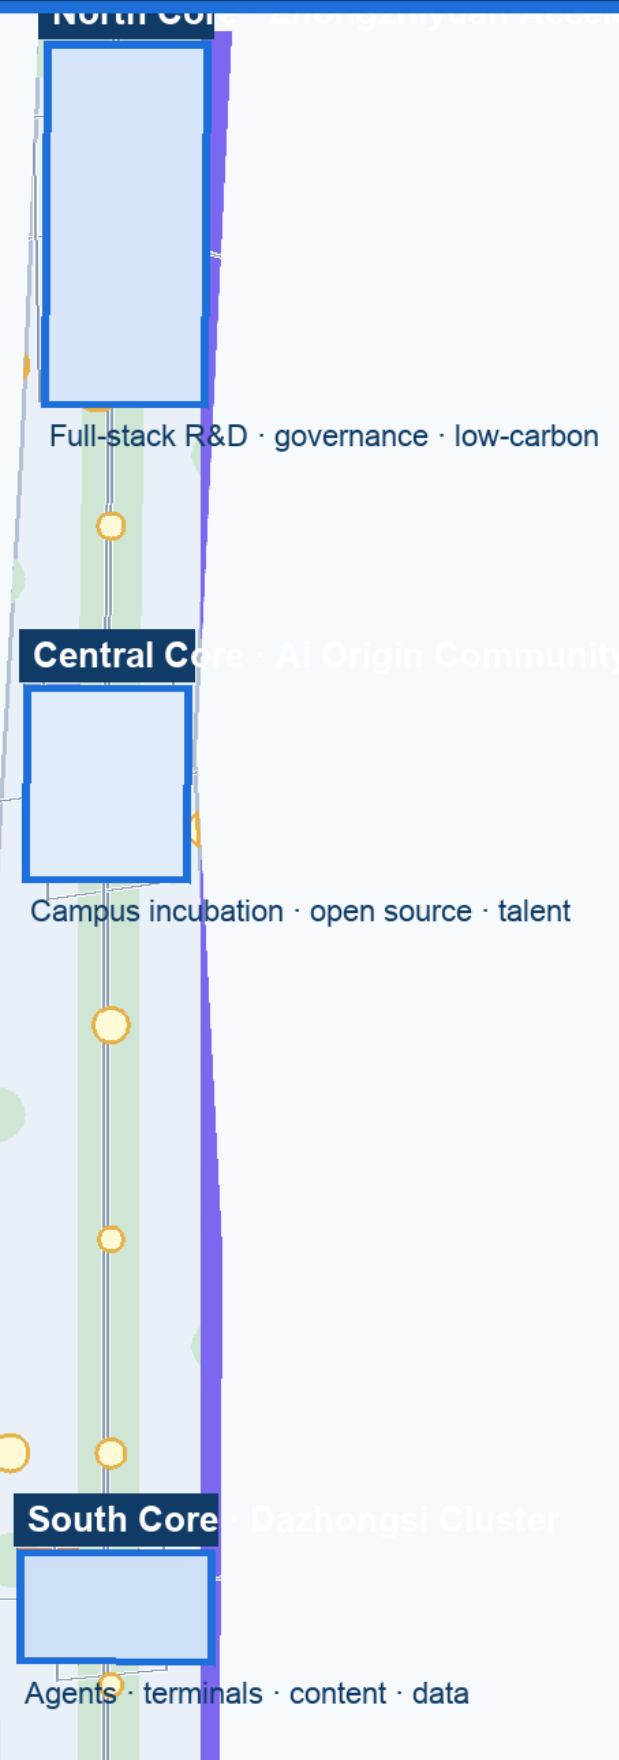

All alignments are concept proposals, not redlines; breakpoint fixes require official data

Three Cores — Detailed Design

North to south: full-stack acceleration → origin incubation → native-intelligence economy

FIG.03 / KEY AREAS

Provisional key-area boundaries; yellow marks public-space anchors

11.41 km²

Design area

33.0%

Green ratio

4.2%

Public ratio

25 ha

Footprint

6 / 6

Tasks covered

3

AI landmarks

Three Veins

- Culture vein: Jing-Zhang → Zhongguancun → AI culture
- Blue-green vein: Qinghe-Xiaoyuehe-spine, 33.0%
- Smart-service vein: compute posts + data salons

All outputs are concepts, not approvals.
Provisional boundaries; recalc on official data.
