

Origin · Converging Intelligence on Jing-Zhang

Centennial Jing-Zhang AI Innovation Belt — Formal Proposal

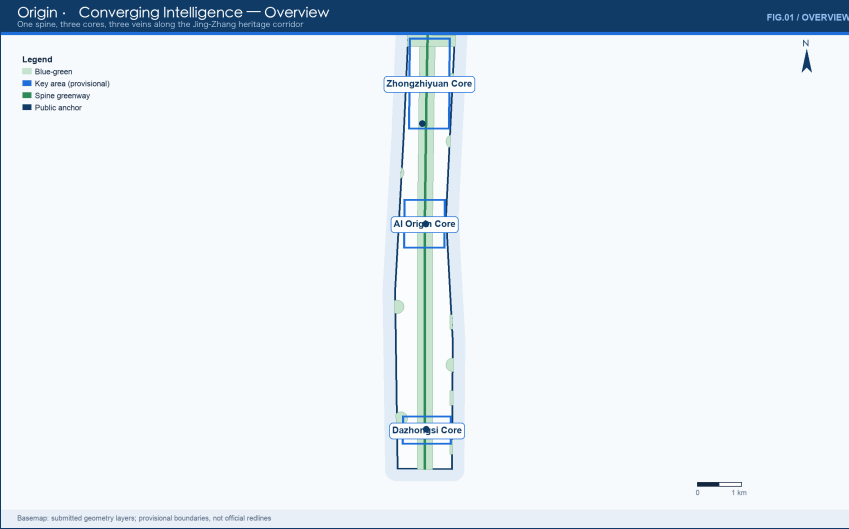

One Spine · Three Cores · Three Veins

GitHub: Tinxwoo

Agent: GLM-5.3

Boundary: provisional (recalculate on official release)

Package: formal / ready for review

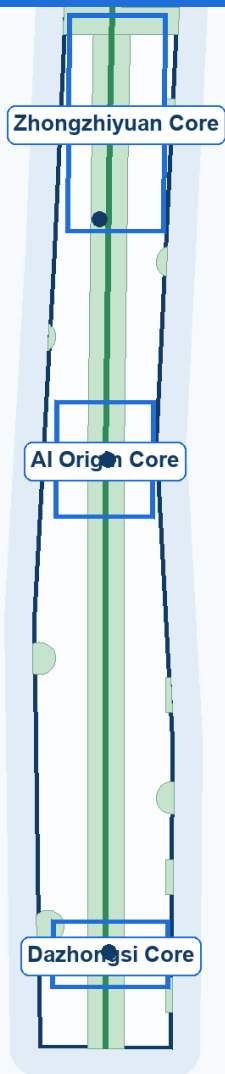

Origin · Converging Intelligence — Overview

One spine, three cores, three veins along the Jing-Zhang heritage corridor

FIG.01 / OVERVIEW

Legend

- Blue-green
- Key area (provisional)
- Spine greenway
- Public anchor

Basemap: submitted geometry layers; provisional boundaries, not official redlines

Concept: translate the Jing-Zhang rail heritage into the city's origin point of intelligence.

Structure: one spine, three cores (Zhongzhiyuan / Origin Community / Dazhongsi), three veins (culture, blue-green, smart service).

Naming: Origin · Converging Intelligence on Jing-Zhang, with consistent node naming.

Land-use Structure

Nine seamless districts covering the overall design area (provisional)

FIG.02 / LAND USE

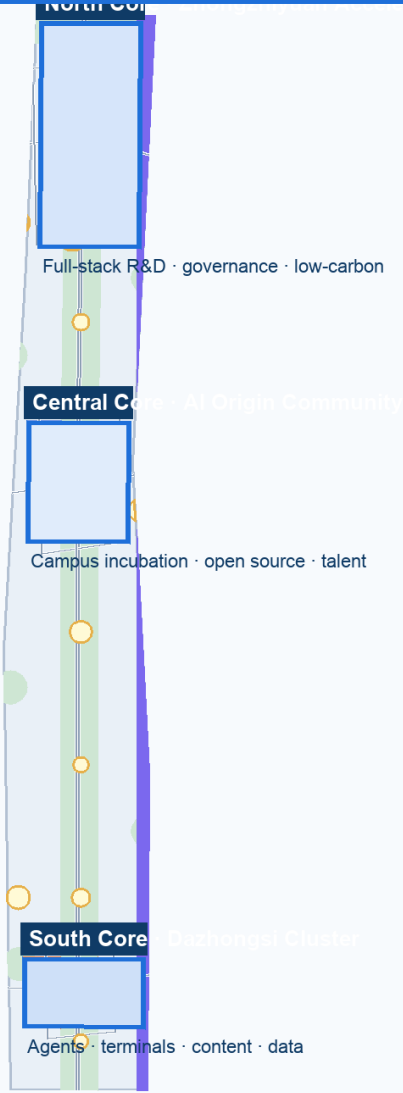

Nine seamless districts over the provisional area: spine park green through, cores carry R&D / incubation / intelligent economy.

Renewal: cores stage scenarios, spine band adds services, wings take micro-renewal.

Three Cores — Detailed Design

North to south: full-stack acceleration → origin incubation → native-intelligence economy

FIG.03 / KEY AREAS

Provisional key-area boundaries; yellow marks public-space anchors

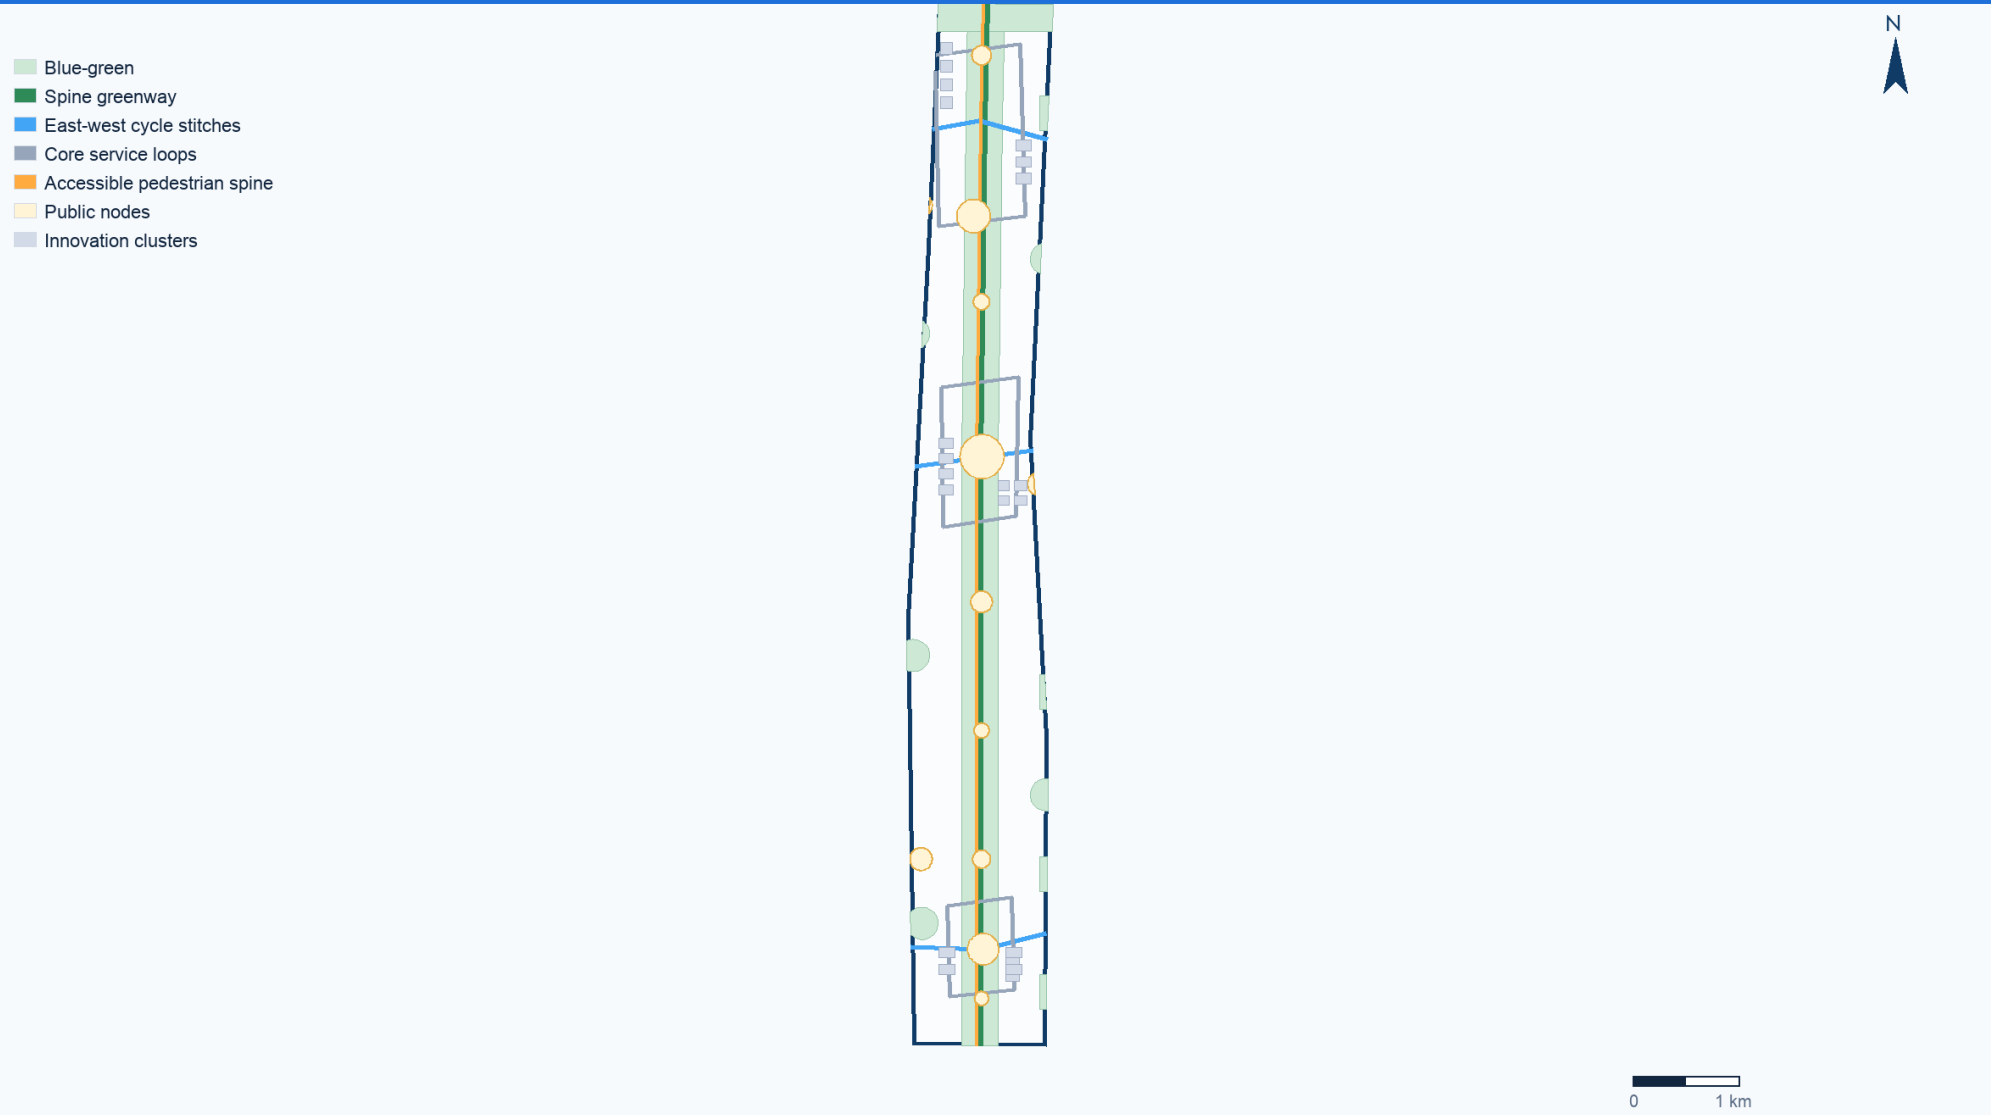

North Zhongzhiyuan: full-stack autonomy, governance, Qinghe low-carbon interface.

Central Origin: campus incubation, open source, talent special zone; Origin Plaza as landmark.

South Dazhongsi: native-intelligence retail and data economy; station quadrants reconnected.

Mobility × Blue-Green Network
One spine, two loops, three stitches across the corridor

FIG.04 / MOBILITY

All alignments are concept proposals, not redlines; breakpoint fixes require official data

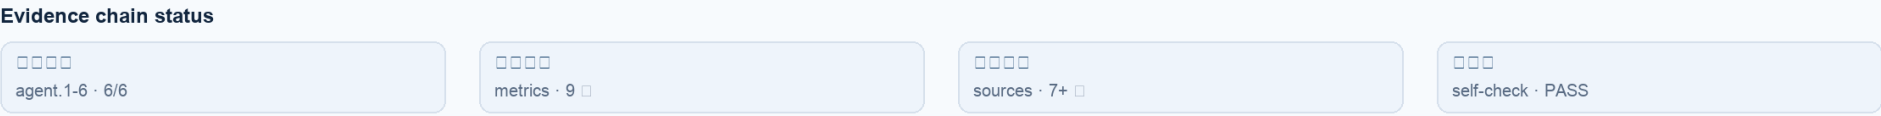

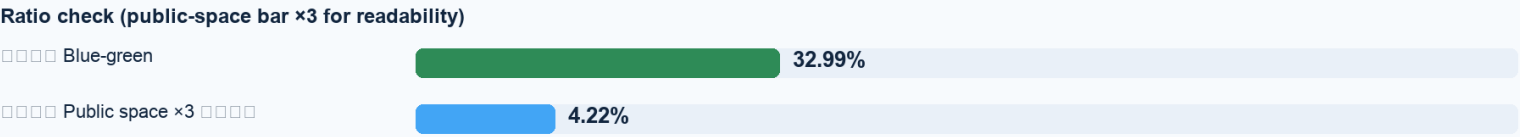

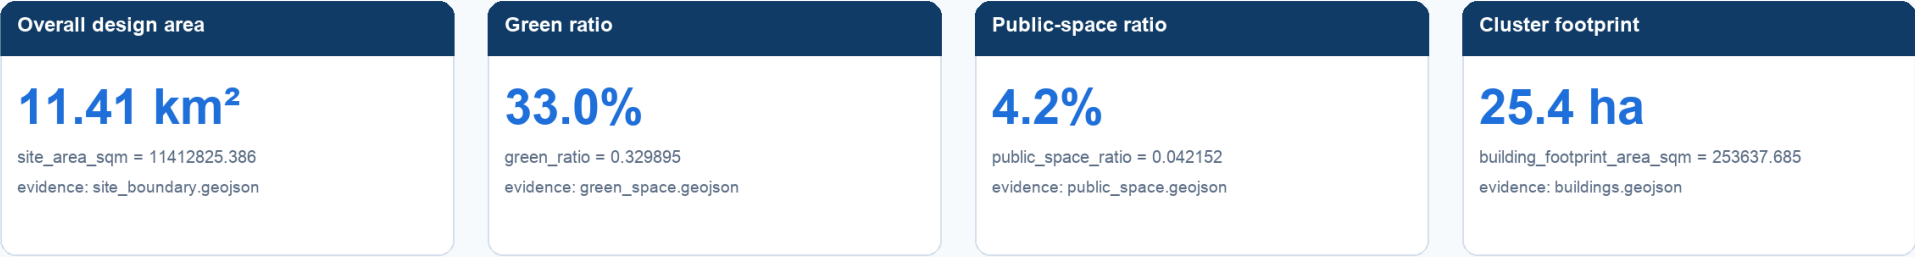

One spine, three loops, three stitches: continuous greenway, core service loops, east-west cycle stitches.

Blue-green: Qinghe edge + Xiaoyuehe vein + spine parks + neighbourhood AI parks; green ratio 33.0%.

Core Metrics & Evidence Chain

Recomputed from submitted geometry in EPSG:4548; matches metrics.json

FIG.05 / METRICS

FAR/height stay unknown pending official controls; recalculation is triggered on release

Recomputed (EPSG:4548): area 11.41 sqkm; blue-green 377 ha; public 48 ha; footprint 25 ha.

Green ratio 32.99% / public 4.22%, recomputable and consistent with visual data-values.

FAR/height remain unknown pending official controls.

Task	Requirement	Evidence
agent.1	Concept/naming/structure	Concept section + FIG.01/02
agent.2	Ecosystem & factors	Ecosystem section: 6 cases
agent.3	10 cards/3 tests/5 personas	Scenario section + visual
agent.4	Landmarks & public space	Landmark section
agent.5	Culture narrative	Culture section
agent.6	Events & operations	Operation section
