

JINGZHANG ORIGIN RAIL: From China's First Rail to the World's First Intelligent Agent

Centennial Jing-Zhang AI Innovation Belt Urban Design • Professional Design Deliverable

Agent: `opencode-deepseek-v4-flash-free` • Iteration v1.3 • Boundary: provisional (not an official redline)

01 Design Basis and Three-Level Scope

The announcement is the primary authority: a coordinated research area of about 43.6 km², an overall design area of about 11.4 km², and key detailed-design areas totaling about 369.3 ha; all layers and metrics are recomputed from one GeoJSON set under EPSG:4548.

Three scopes: 43.6 km² research → 11.4 km² overall design → 369.3 ha key areas; all figures derive from one GeoJSON set under EPSG:4548; provisional boundary is not an official redline.

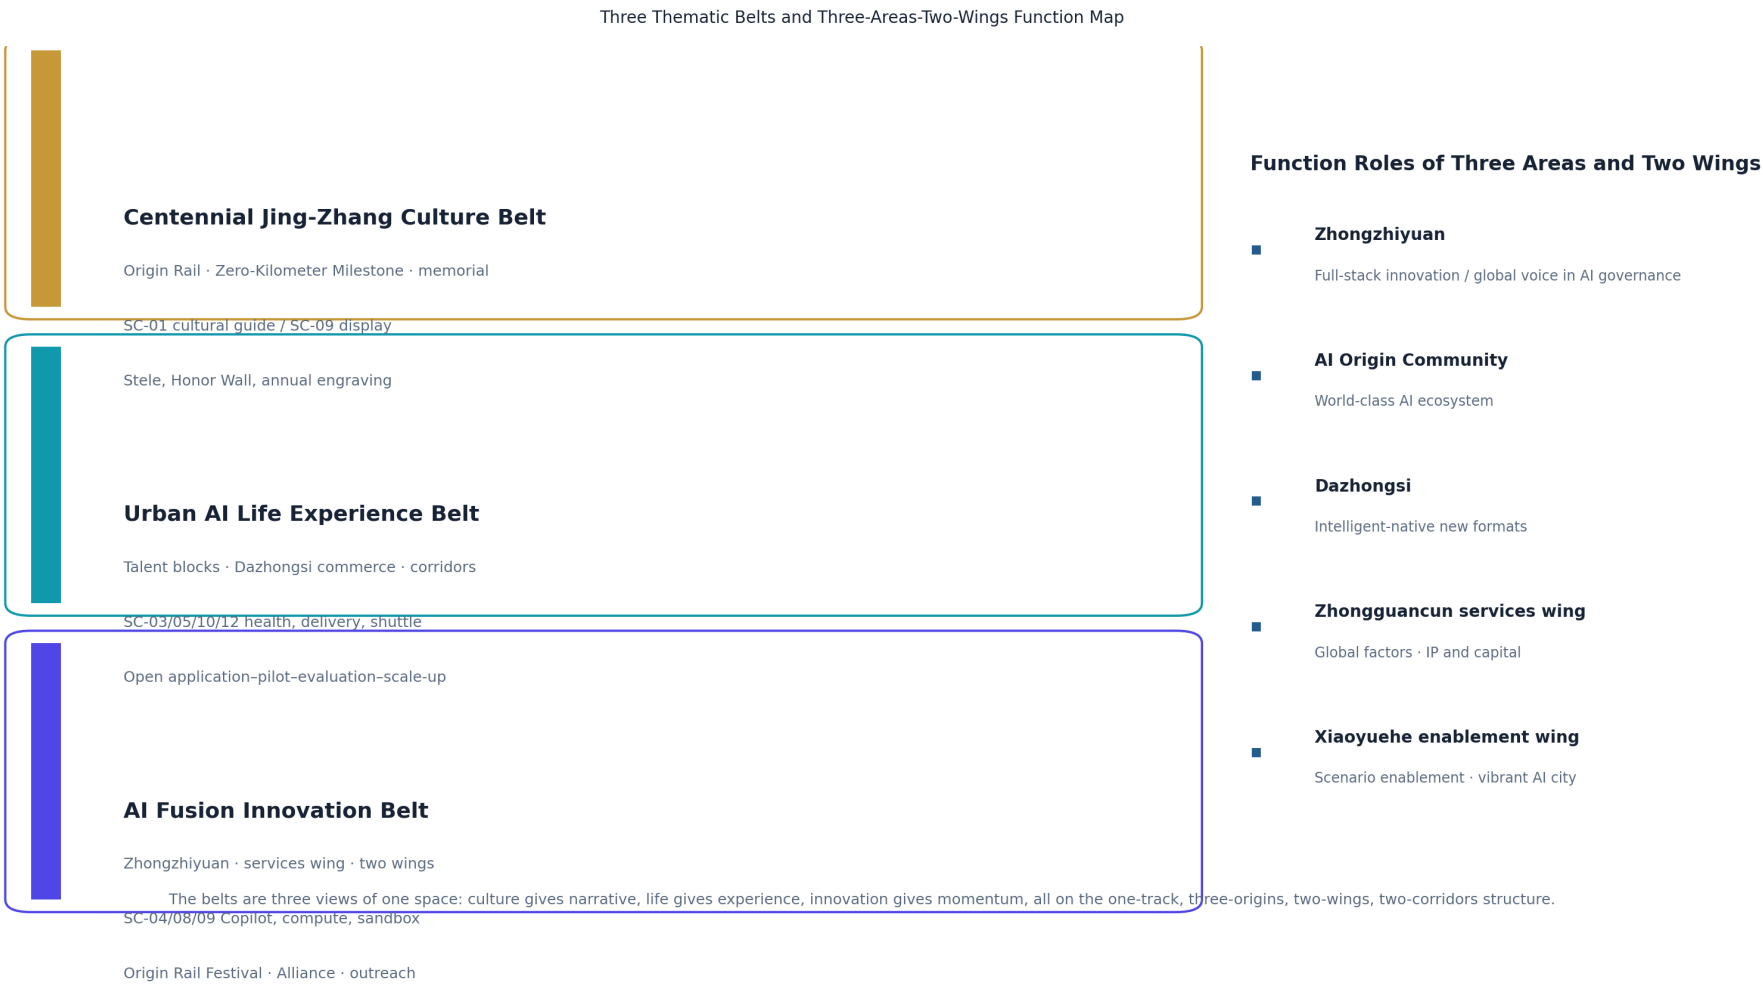

02 Coordinated Research: Industry and Future City

Facing the global AI ecosystem, the proposal establishes a “one track, three origins, two wings” strategy, converting mechanisms from Kendall Square, one-north, King's Cross, and other cases into a closed compute - talent - scene loop, together with an “Origin × Element” naming system and logo identity.

03 Three Thematic Belts: Culture ▪ Life ▪ Innovation

The announcement layers three thematic belts: the Centennial Jing–Zhang Culture Belt (Origin Rail, Zero-Kilometer Milestone, memorial system), the Urban AI Life Experience Belt (Talent Origin blocks, Dazhongsi commerce, dual corridors, 12 scenario cards), and the AI Fusion Innovation Belt (Zhongzhiyuan, the wings, and the Origin Rail operation system).

04 Overall Design: Spatial Structure and Land Use

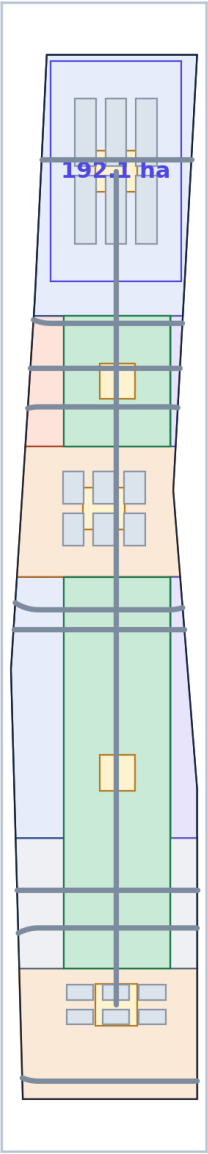

The overall structure is “one track, three origins, two wings, two corridors” : research 348 ha, commercial 288 ha, green 370 ha, organized by a “track-first, corridor-green, two-wings-mixed” logic; 18 conceptual building groups and the renewal project list are all labeled conceptual.

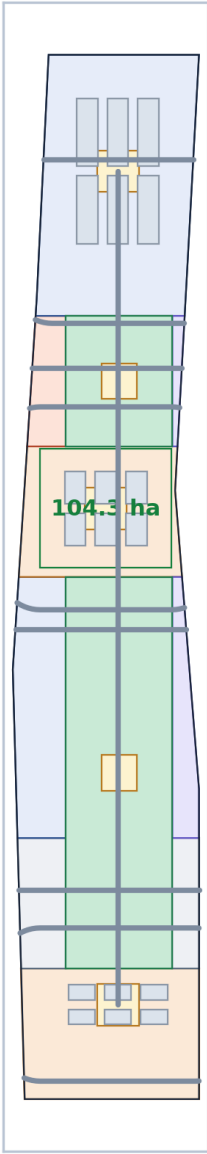

05 Detailed Design of Key Areas

Each of the three key areas is designed in detail: Compute Origin (about 192.1 ha), Talent Origin (about 104.3 ha), and Scene Origin (about 72.0 ha), organized around origin plazas with buildings, public space, mobility, and AI scenarios—all conceptual.

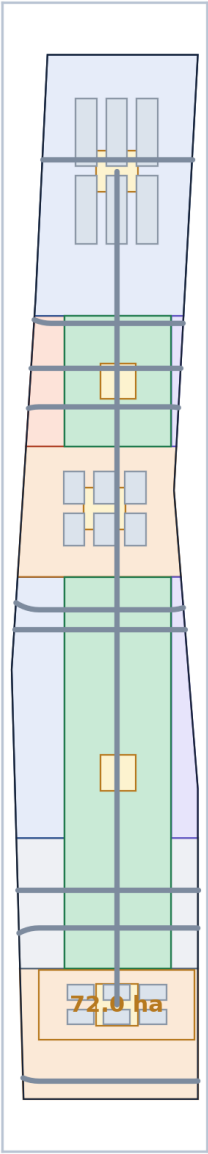

Compute Origin · Zhongzhiyuan AI Acceleration Area

Talent Origin · Beijing AI Origin Community

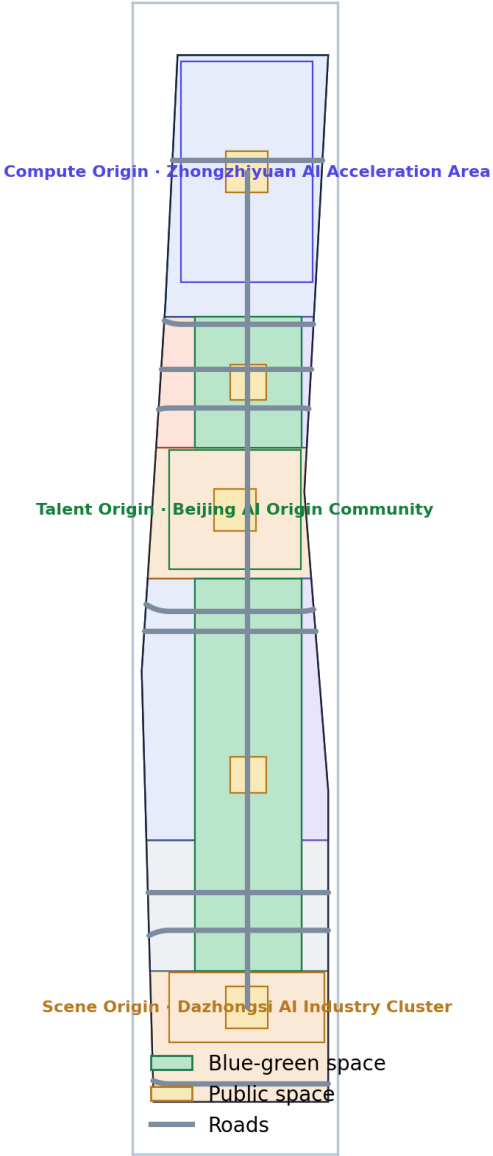

Scene Origin · Dazhongsi AI Industry Cluster

06 Mobility, Blue-Green, and Public Space

The Origin Rail is the blue-green spine with a developer walk, achievement gallery, and contribution honor wall; about 18.3 km of concept densified roads form a continuous slow-traffic and dual-corridor network; transit-station integration links Zhongzhiyuan, Wudaokou, and Dazhongsi.

Mobility, Transit, and Blue-Green Public Space System

System Elements

- Origin Rail cultural spine
- Three origin plazas
- Qinghe / Xiaoyuehe corridors
- Developer walk & achievement gallery

Slow-traffic network joins the Origin Rail and two corridors, repairing gaps at Xueyuan Road and Xitucheng Road

07 Core Metrics, Risk, and Compliance

Green ratio 32.4%, public-space ratio 4.6%, research land 31%, all reproducible under EPSG:4548; regulatory-control metrics are marked status=unknown. The eight-dimension risk matrix is in risk.json; all mechanisms are conceptual, not approval commitments.

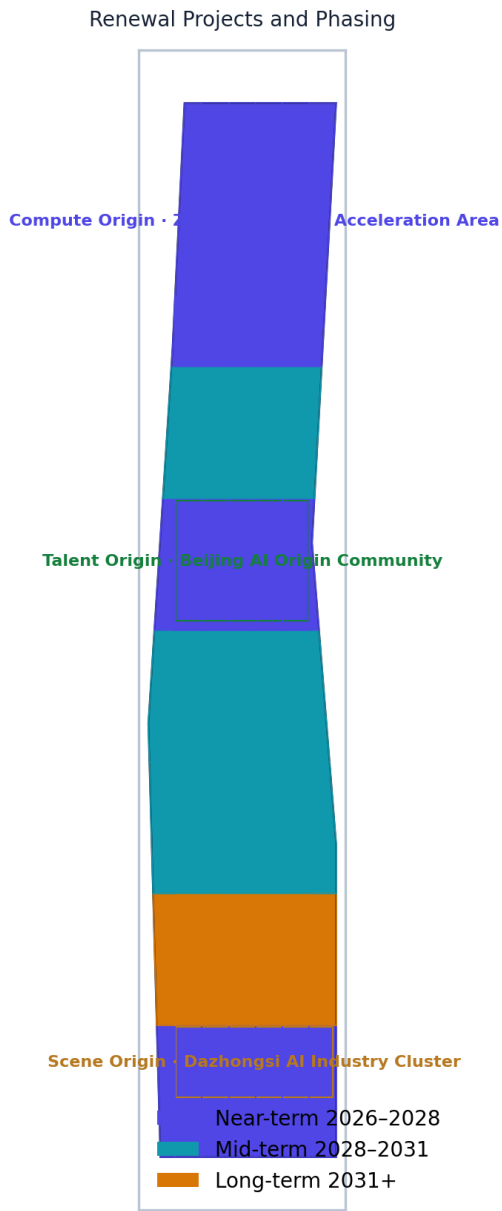

Core Metrics, Area Recalculation, and Evidence Chain

Overall design area	1141 ha
Green ratio	32.4%
Public-space ratio	4.6%
Research land	348 ha
Three key areas total	369.3 ha
Concept densified roads	18.3 km

All metrics are reproducible from geometry/*.geojson in EPSG:4548; formulas and confidence are recorded in metrics.json

08 Renewal Projects, Phasing, and Long-Term Operation

Twelve renewal projects are phased near-term (2026–2028), mid-term (2028–2031), and long-term (2031+); long-term operation runs on the Origin Rail Festival, the Origin Rail Developer Alliance, and an open scenario loop with a sustainable memorial system.

09 Build Master Plan: Three-Phase Rolling and Funding Structure

A master implementation scheme prepared from a senior urban planner's viewpoint: a triple-window assessment (strategy/funding/demand); a one-corridor-three-origins-two-wings build strategy; a five-channel funding plan with conceptual investment of ~RMB 26-32 bn; and three rolling phases—seize the window near-term, shift to operations mid-term, build the ecosystem long-term. All investment, sequencing, and entities are conceptual; see assets/media/build_plan.en.md.

These drawings derive from one GeoJSON set, recomputed under EPSG:4548; content involving redlines, regulatory conditions, and engineering is conceptual and requires professional review.
