

JZ AI-Native Belt

A Governance-Driven Three-Layer AI-Native City — Governable · Controllable · Trustworthy · Sustainable

2026 · Haidian · Jingzhang AI Innovation Belt Concept Proposal (design drawings)

JZ AI-Native Belt — Three-layer scope (provisional, not an official redline)

Functional zones overview (along the Jingzhang corridor, three districts)

Zhongzhi Park (compute/models) → Origin Community (talent/scenarios) → Dazhongsi (industry/capital), with green–blue and public services interleaved

Conceptual land–use structure — Industry / Innovation / Urban renewal

Design zones (design_proposal):

- LU–001 AI R&D & innovation land (compute & research) 193.4 ha
- LU–002 Smart mobility & testing corridor land 152.8 ha
- LU–003 Innovation community & talent services land 199.7 ha
- LU–004 Park & green–blue open space 179.8 ha
- LU–005 Industry & commercial services land 199.2 ha
- LU–006 Public services & urban amenities land 215.3 ha

Land–use structure is a conceptual diagram (GAP–CONTROL pending official regulatory plan)

Note: zones are a conceptual partition on the provisional boundary; they are not an official plan

AI scenario index (10 scenario-card directions)

Each card covers target users / location / data sources / privacy boundary / human review / operator

SC-01	AI research & innovation community (compute hub / open-source models / release)
-------	---

SC-02	Smart mobility & testing corridor (smart rail / autonomous delivery / transport trials)
-------	---

SC-03	Youth innovation community & talent services (learning / daily life)
-------	--

SC-04	Green-blue ecological corridor & open space (recreation / ecological buffer)
-------	--

SC-05	Industry services & commerce (business services / commercialization / consumption)
-------	--

SC-06	Public-service agent nodes (smart government / healthcare / education)
-------	--

SC-07	Digital-twin city governance hub (rules→inspection→scoring→reporting)
-------	---

SC-08	Zero-carbon district & energy smart management (green demonstration)
-------	--

SC-09	Cultural heritage digital interpretation (Jingzhang heritage narrative)
-------	---

SC-10	Low-altitude economy testbed (scenario compliance & human review)
-------	---

Governance engine: rules → inspection → scoring → reporting
Base: data compliance · model control · human review · traceable boundaries
