

Jingzhang Symbiotic Corridor · Centennial Jingzhang AI Belt

This proposal uses the Jingzhang Symbiotic Corridor as an overall concept, weaving three belts — culture, AI living-experience, and AI convergence innovation — into one spatial framework with three zones, two wings, ten+ scenario cards, three landmarks and a sustainable operation system.

All spatial recommendations are conceptual proposals, not government-approved conclusions.

01 Site Overview

Overall design area & three key areas

Centennial Jingzhang AI Innovation Belt — overall design area & three key areas

Source: brief/site-package/geometry/provisional_boundaries.geojson + agent-generated design layers.
Boundary status: provisional_constraint (PROV-SITE-001 / PROV-KEY-001..003). Not a statutory redline. | Figure: site-overview

Land Use Structure · 用地分区

Seamless 4×3 partition of the overall boundary (agent-generated design)

Source: `brief/site-package/geometry/provisional_boundaries.geojson` + agent-generated design layers.

Boundary status: `provisional_constraint` (PROV-SITE-001 / PROV-KEY-001..003). Not a statutory redline. | Figure: land-use-structure

03 Key Areas

Zhongzhiyuan, AI Origin Community, Dazhongsi concept design

Key Areas · 重点区域详细设计

Three key detailed-design areas (provisional polygons)

Source: brief/site-package/geometry/provisional_boundaries.geojson + agent-generated design layers.

Boundary status: provisional_constraint (PROV-SITE-001 / PROV-KEY-001..003). Not a statutory redline. | Figure: key-areas

04 Mobility & Blue-Green Public Space

Road, green and plaza composite system

Mobility & Blue-Green Network · 交通慢行与蓝绿公共空间

Green space, public space, roads and slow traffic skeleton

Source: brief/site-package/geometry/provisional_boundaries.geojson + agent-generated design layers.

Boundary status: provisional_constraint (PROV-SITE-001 / PROV-KEY-001..003). Not a statutory redline. | Figure: mobility-bluegreen

05 Metrics Evidence

Area, ratio and length metrics recalculated from GeoJSON
