

BORROWED INTELLIGENCE

Memory calibrates intelligence. Wellbeing measures the future.

Urban Design Agent Formal Submission V1

CENTENNIAL JING-ZHANG / CITY MEMORY / HUMAN WELLBEING / RESPONSIBLE AI

P02

Project Summary and Core Judgment

Centennial Jing-Zhang preserves engineering and everyday memory while railways, roads, compounds, and large blocks continue to divide space. The proposal treats AI not as an exhibit but as part of verifiable civic infrastructure organized around memory, walking, comfort, choice, and exit.

Jing-Zhang cannot remain a north-south landscape axis. Six east-west everyday-life seams must turn the main spine into civic infrastructure for public life.

Why Repair detours, heat exposure, noise, exclusion, and time burdens created by infrastructure.	What One Spine, Two Wings, Three Commons; Four Ledgers; Twelve Scenes; Four AI Admission Gates.	Change Shift from technology display to everyday service that is accessible, caring, deliberative, and verifiable.
--	---	--

P03

Task, Three Scales, and Data Boundaries

official / provisional / participant-controlled

PROVISIONAL LOCATION | PROV-KEY-003 | Issue #1029 = Open | official_anchor_status = pending | official validation geometry ≠ real design-research location

P04

Why Borrowed Intelligence

Borrowing is an urban-design method, not a visual metaphor.

Identify real objects → expose infrastructure burdens → build cross-boundary relations → provide everyday service → recalibrate with evidence

P05

Overall Spatial Structure

Jing-Zhang cannot remain a north-south landscape axis. Six east-west everyday-life seams must turn the main spine into civic infrastructure for public life.

FIGURE 01 / BORROWED INTELLIGENCE

Overall Spatial Structure | One Spine · Two Wings · Three Commons

Jing-Zhang is not an isolated north - south landscape axis: its spine and east - west everyday links form civic infrastructure together.

One Spine, Two Wings, Three Commons organize space; Four Ledgers govern evaluation; Twelve Scenes provide services.

P06

Urban Renewal and Land-Use Structure

Retain authentic fabric | repair conditions of use | adapt functions | insert essential public components | replace only unsafe or unworkable elements

FIGURE 02 / BORROWED INTELLIGENCE

Land Use and Urban Spatial Structure

Move from single-purpose industry zoning to a mixed urban structure of innovation, daily life, public space, and ecological ground.

LAND-USE SEMANTICS / NON-STATUTORY

Innovation production and testing	0802
Daily and community services	0702
Public space and interfaces	1403
Culture, deliberation, and content	0803
Blue-green ecological ground	1401
Mixed services and slow retail	09
Uncommitted non-key-area model	16

THREE SPATIAL PROTOTYPES

Intelligence Test Commons

Origin Living Commons

Slow Intelligence Urban Commons

STATUTORY CONTROL STATUS

FAR · Building Height · Development Capacity · Statutory Building Density
= unknown / null
Building forms are participant-controlled conceptual prototypes, not approved schemes.

数据 / Data: land_use · buildings · public_space · key_areas | Standard: MNR 2023 project subset | Coverage: 100%, no gap / overlap / out-of-bound

conceptual · participant-controlled · non-statutory

A compound urban structure covers the provisional site boundary; AI scenarios are not statutory land-use classes.

P07

Heritage, Infrastructure, and Wellbeing

Infrastructure shifts from a machine of severance to a wellbeing network that reduces time burdens and improves comfort.

P08

Walking, Blue-Green, and Wellbeing Network

Infrastructure shifts from a machine of severance to a wellbeing network that reduces time burdens and improves comfort.

FIGURE 04 / BORROWED INTELLIGENCE

Time Equity | Walking · Blue-Green · Wellbeing Network

Infrastructure shifts from a machine of separation to a wellbeing network that reduces time burdens and improves comfort.

数据 / Data: roads · green_space · public_space · constraints | No unverified time-saving number is shown

TIME EQUITY: THREE REPRESENTATIVE PATHS

X01 Qinghe Blue-Green Cross

PROBLEM	ACTION	OUTCOME
Fragmented river edges	Shade + stormwater + staying	Continuous rest and transfer choice

AI Origin Two Gates

PROBLEM	ACTION	OUTCOME
Uncertain access information	Fixed signs + human help	Route choice without a phone

Dazhongsi Four Quadrants

PROBLEM	ACTION	OUTCOME
Road and rail separation	Conceptual links + public ground	Reduce detour; verification pending

SEASONAL COMFORT

Winter sunlight + continuous summer shade + routes that recover after rain

VERIFICATION STATUS

FIELD_VERIFY: walking / accessibility / actual open routes / nighttime use
MANAGEMENT_VERIFY: access control / hours / shared courts / willingness to open

FIELD_VERIFY · MANAGEMENT_VERIFY · low confidence

Every pending route remains FIELD_VERIFY / MANAGEMENT_VERIFY and is not shown as built infrastructure.

P09

Comparing the Three Commons

Equal visual weight / same comparison template

FIGURE 03 / BORROWED INTELLIGENCE

Three Commons | Three Urban Prototypes

The Three Commons are not copies of one AI park: they test responsibility, everyday life, and human pace respectively.

P10

Intelligence Test Commons

Can technology enter the city responsibly?

Research → Controlled Test → Public Display → Deliberation / Standards

Non-AI baseline

Printed rules + staffed service

AI augmentation

Edge service + public testing protocol

First action

Verify the compound - Qinghe - community interface first

FIELD_VERIFY: continuous walking / accessibility continuity / actually open routes / nighttime use

MANAGEMENT_VERIFY: access control / opening hours / shared courts / public ground floors / willingness to open / operating entity / maintenance responsibility

P11

Origin Living Commons

How does innovation enter everyday life?

Two Gates → One Seam → Courtyards → Four Interfaces

Non-AI baseline

Fixed maps + staffed help

AI augmentation

Explainable search + choice-based navigation

First action

Update Two-Gate information + repair Seam comfort

FIELD_VERIFY: continuous walking / accessibility continuity / actually open routes / nighttime use

MANAGEMENT_VERIFY: access control / opening hours / shared courts / public ground floors / willingness to open / operating entity / maintenance responsibility

P12

Slow Intelligence Urban Commons

How can AI-enabled consumption preserve human pace and choice?

Four Quadrants → Public Ground → Slow Stay → Content / Global Exchange

Non-AI baseline

Staffed help + ordinary checkout

AI augmentation

Explainable recommendations + multilingual content

First action

Begin with walking audits and opening agreements

PROVISIONAL LOCATION | PROV-KEY-003 | Issue #1029 = Open | official_anchor_status = pending | official validation geometry ≠ real design-research location

P13

Seven User Groups and Twelve Scenes

Real life problems → Non-AI baseline → AI augmentation → human fallback / exit

U01-U07

- U01 Older residents and carers
- U02 Children, students, and families
- U03 Researchers, developers, and start-up teams
- U04 Commuters, service workers, and night shifts
- U05 Heritage and international visitors
- U06 Users with different abilities and sensory needs
- U07 Businesses, community organizations, and operators

S01-S12

P14

Three Tests, Public Components, and AI Landmarks

Public space first; communication image second.

P15

Four Ledgers and Four AI Admission Gates

Four Ledgers remain separate. No composite score.

P16

Metrics, Evidence, and Uncertainty

site_area_sqm 11,412,825.386 m² | green_ratio 14.2101% | public_space_ratio 10.0829% | confidence = low
Remain unknown / null: floor_area_ratio | building_height_m | development_capacity_sqm | statutory_building_density

FIGURE 05 / BORROWED INTELLIGENCE

Metrics · Evidence · AI Governance

Design conclusions must be recomputable, traceable, verifiable, and open to revision by future evidence.

EVIDENCE CHAIN AND HUMAN GATE

FOUR LEDGERS: PARALLEL GOVERNANCE, NO AGGREGATE SCORE

FOUR AI ADMISSION GATES

REMAIN UNKNOWN / NULL

floor_area_ratio · building_height_m · development_capacity_sqm · statutory_building_density

AI does not manufacture false certainty merely to complete an answer.

数据 / Data: metrics.json · assumptions.json · sources.json · matrices | Authority order: GeoJSON → Metrics → Evidence → Human Gate

all three core metrics: confidence low

Metrics are reproducible, evidence traceable, assumptions verifiable, and future evidence may overturn current judgments.

P17

Implementation and Phasing

Triggers, responsibility, verification, and stop conditions - not a government construction commitment.

Spatial assumptions → GeoJSON → Metrics → Evidence / Assumptions → FIELD_VERIFY / MANAGEMENT_VERIFY → Human Gate → Keep / Modify / Stop

Real AI innovation is not an algorithm showroom. It makes Jing-Zhang civic infrastructure that can be remembered, repaired, cared for, and deliberated together.

Memory calibrates intelligence. Wellbeing measures the future.
