

OVERVIEW | THE COMMON EAVE

AI backstage; public life frontstage

ONE LINE

Not a showroom for AI, but a civic room where anyone can pause, learn, shelter, and reach a human service.

TWO WINGS

Zhongguancun service wing brings technology to public problems.
Xiaoyuehe scenario wing returns public feedback to R&D.

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

STRUCTURE | HAIDIAN CIVIC DESIGN DNA

Porous links · Useful restraint · Incremental renewal · Technology, culture, ecology

01

43.6 km²

Research: industry and regional links

02

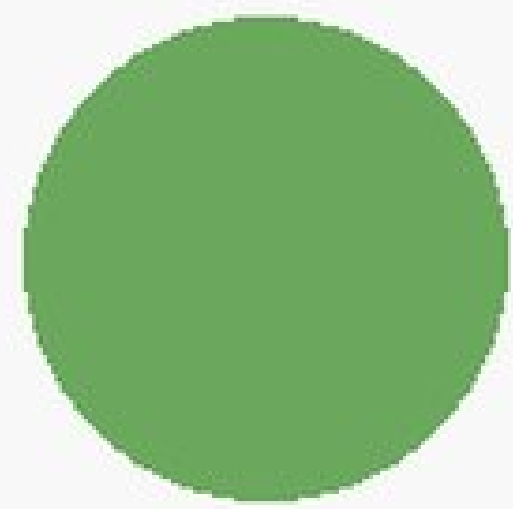

11.4 km²

Overall design: civic-eave network

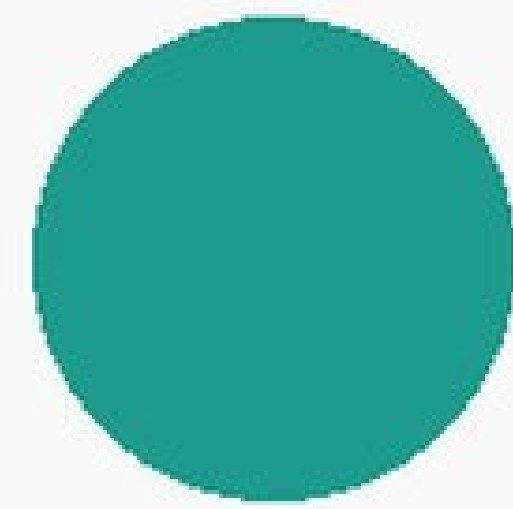

03

368.4 ha

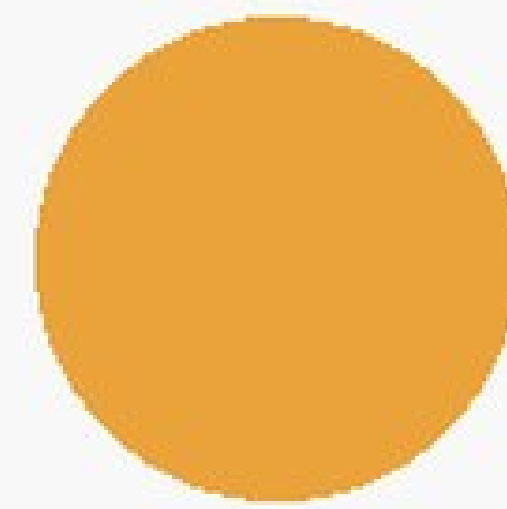

Key areas: two resolved prototypes

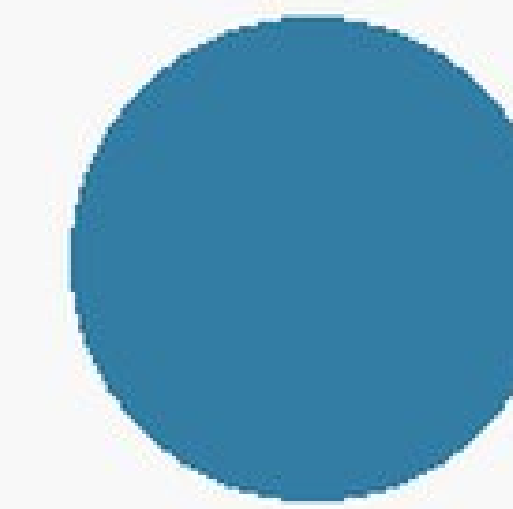

Science city in
parks

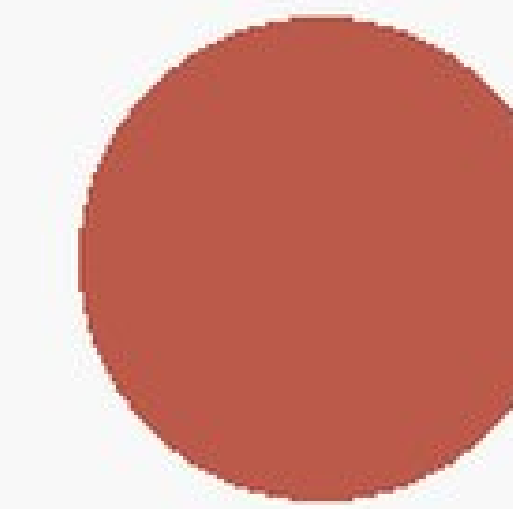

Campus-city
symbiosis

Porous public
ground

All-age
accessibility

Heritage in daily
life

Spatial move: the heritage corridor is not the only protagonist; transverse links reconnect campuses, communities, rivers, and stations to daily life

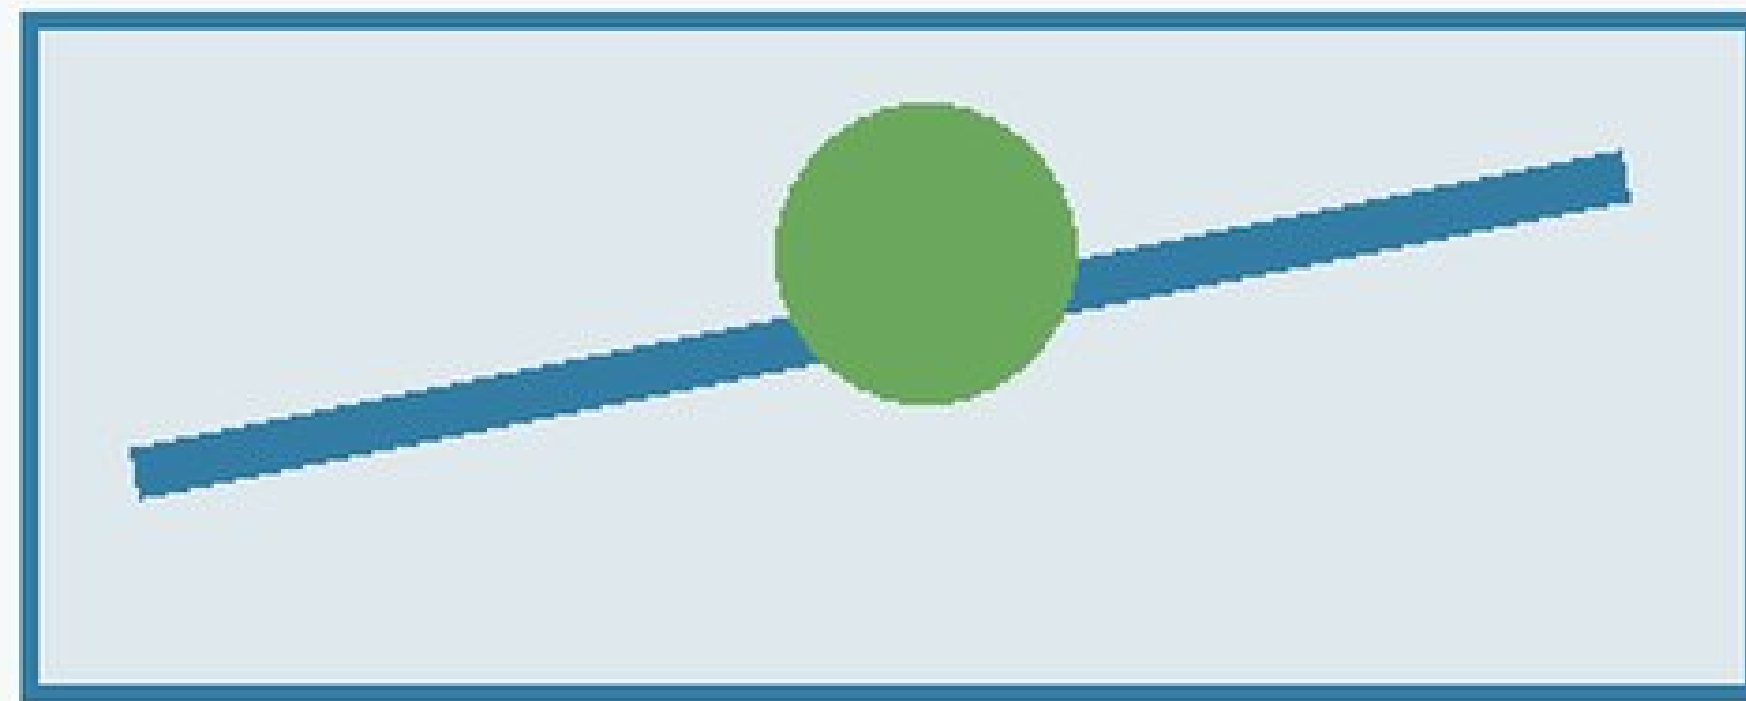

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

THREE AREAS | THREE CIVIC ROLES

One public value; three different place responses

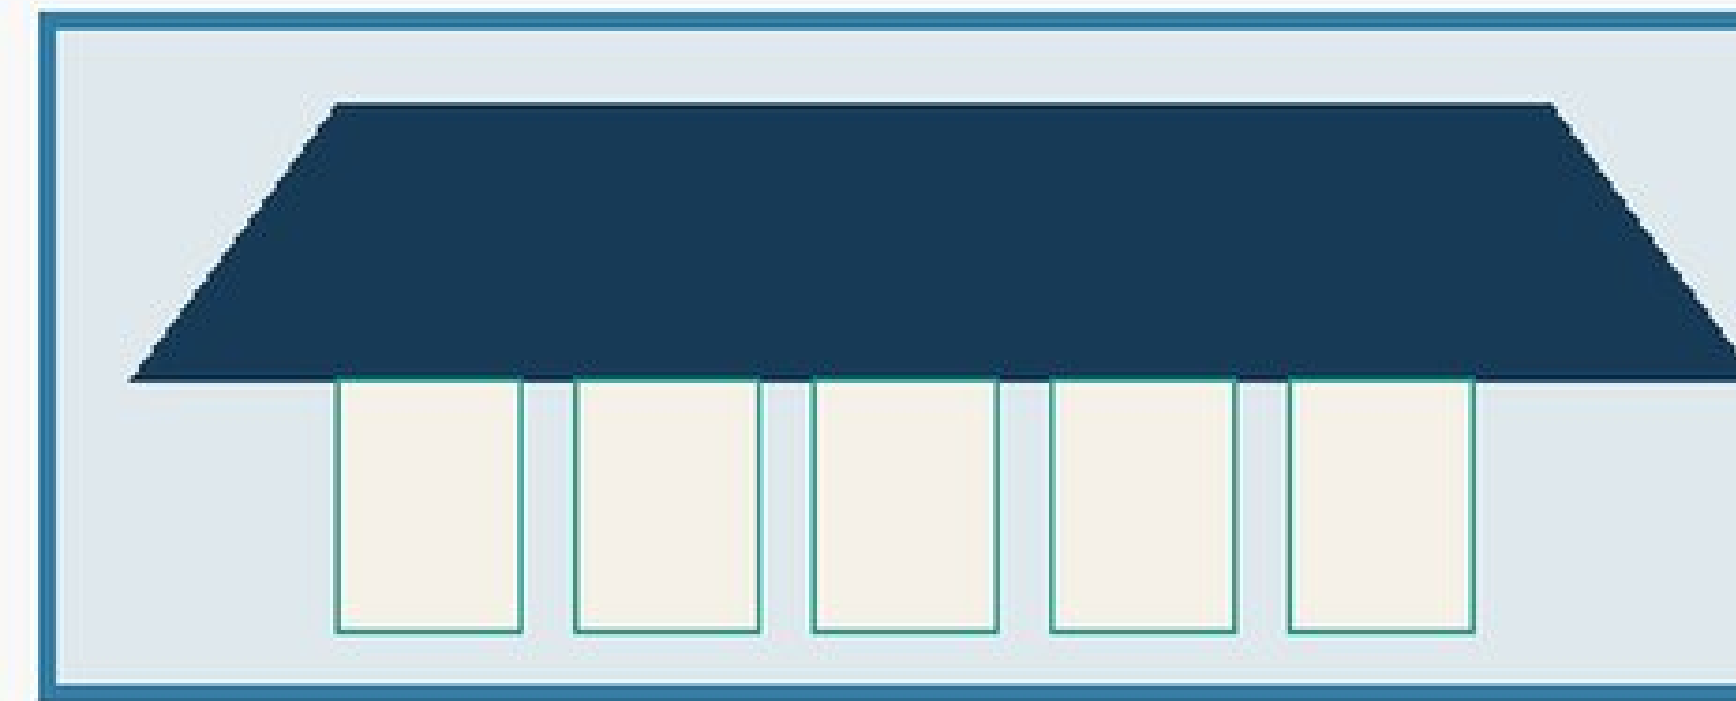

ZHONGZHIYUAN | Benchmark Garden

Green-AI testing, standards, public observation
Light landmark: visible ecological benchmarks

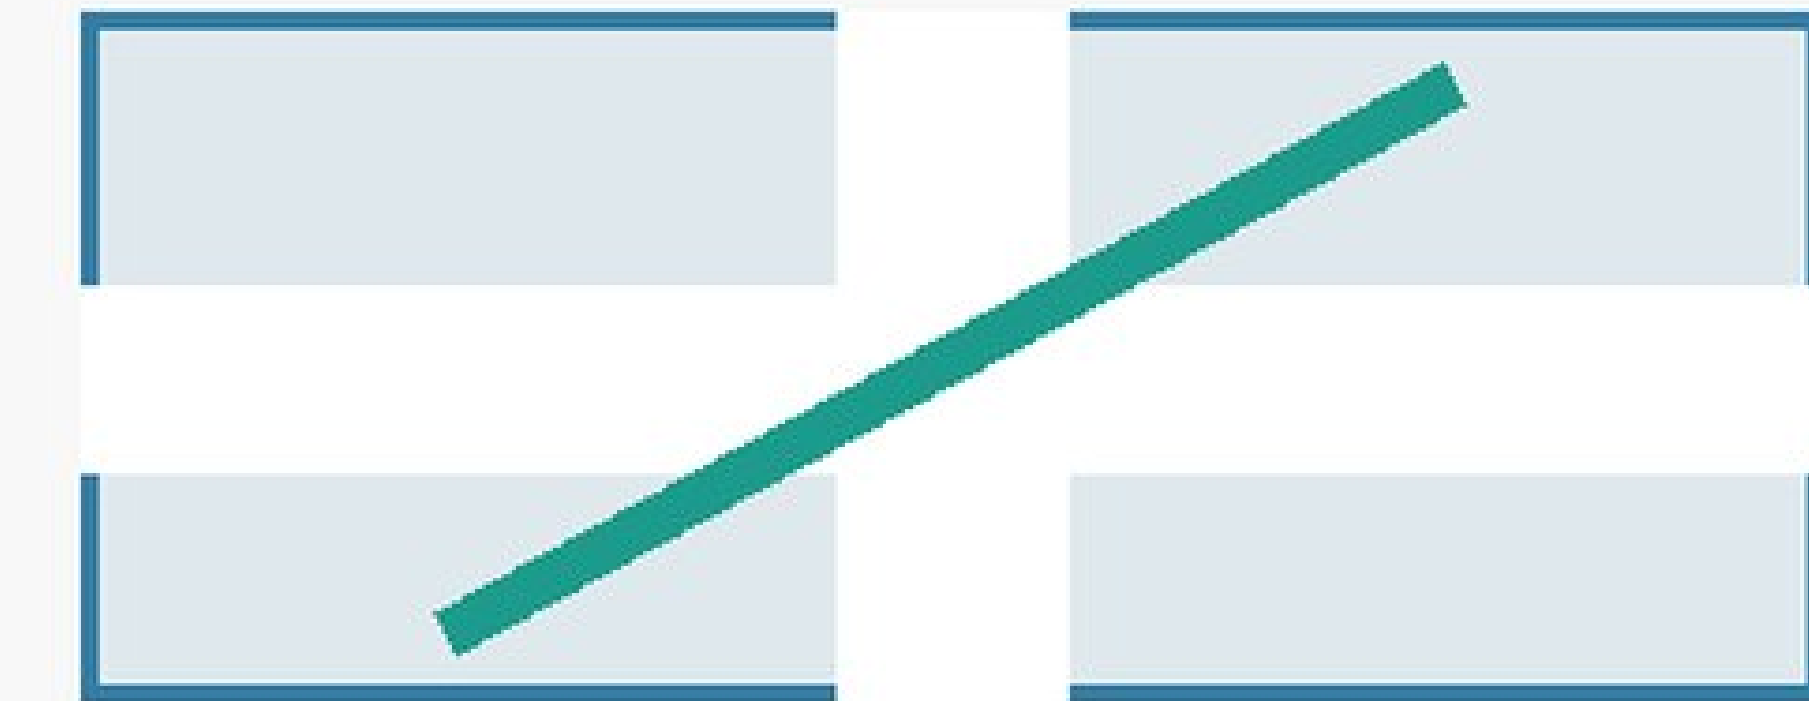

AI ORIGIN | Shared Eave

Campus-city sharing, all-weather learning,
human service
Resolved prototype 1

DAZHONGSI | Four-Corner Commons

Four-quadrant repair, interchange care, civic
commerce
Resolved prototype 2

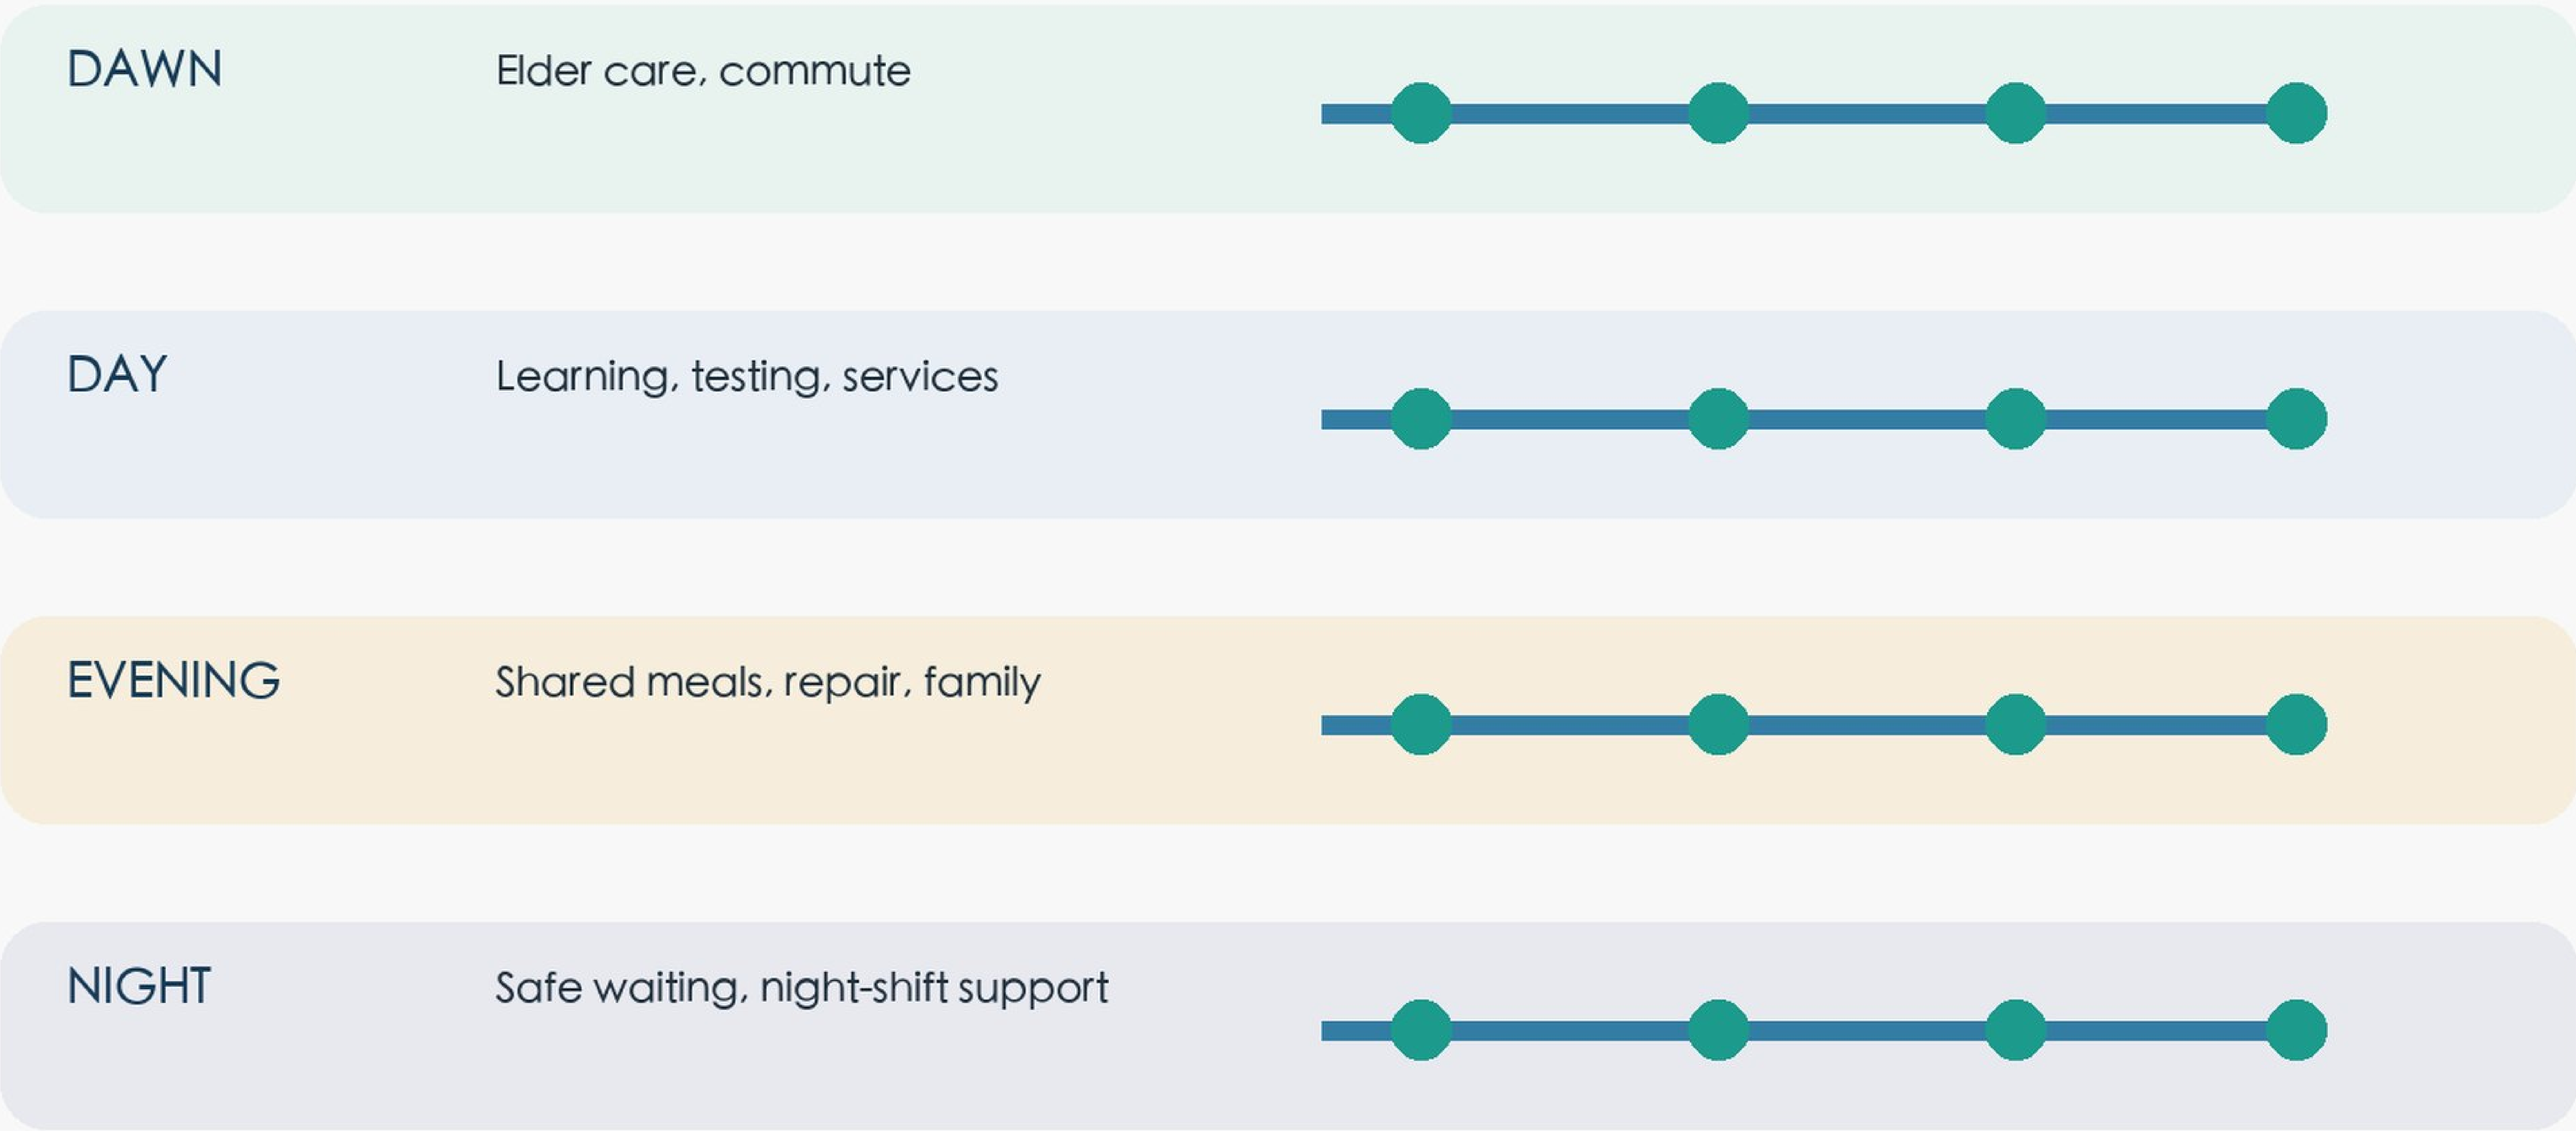

Shared floor: continuous accessibility, non-phone equivalent service, named human owner, pause, and recovery.

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

EVERYDAY | MOBILITY, BLUE-GREEN, AND SERVICE

Real intelligence means fewer detours, less exposure, and one less service handoff

Minimum kit: weather cover / shade · backed seating · water · toilet wayfinding · cycle parking · staffed help · continuous accessible grc

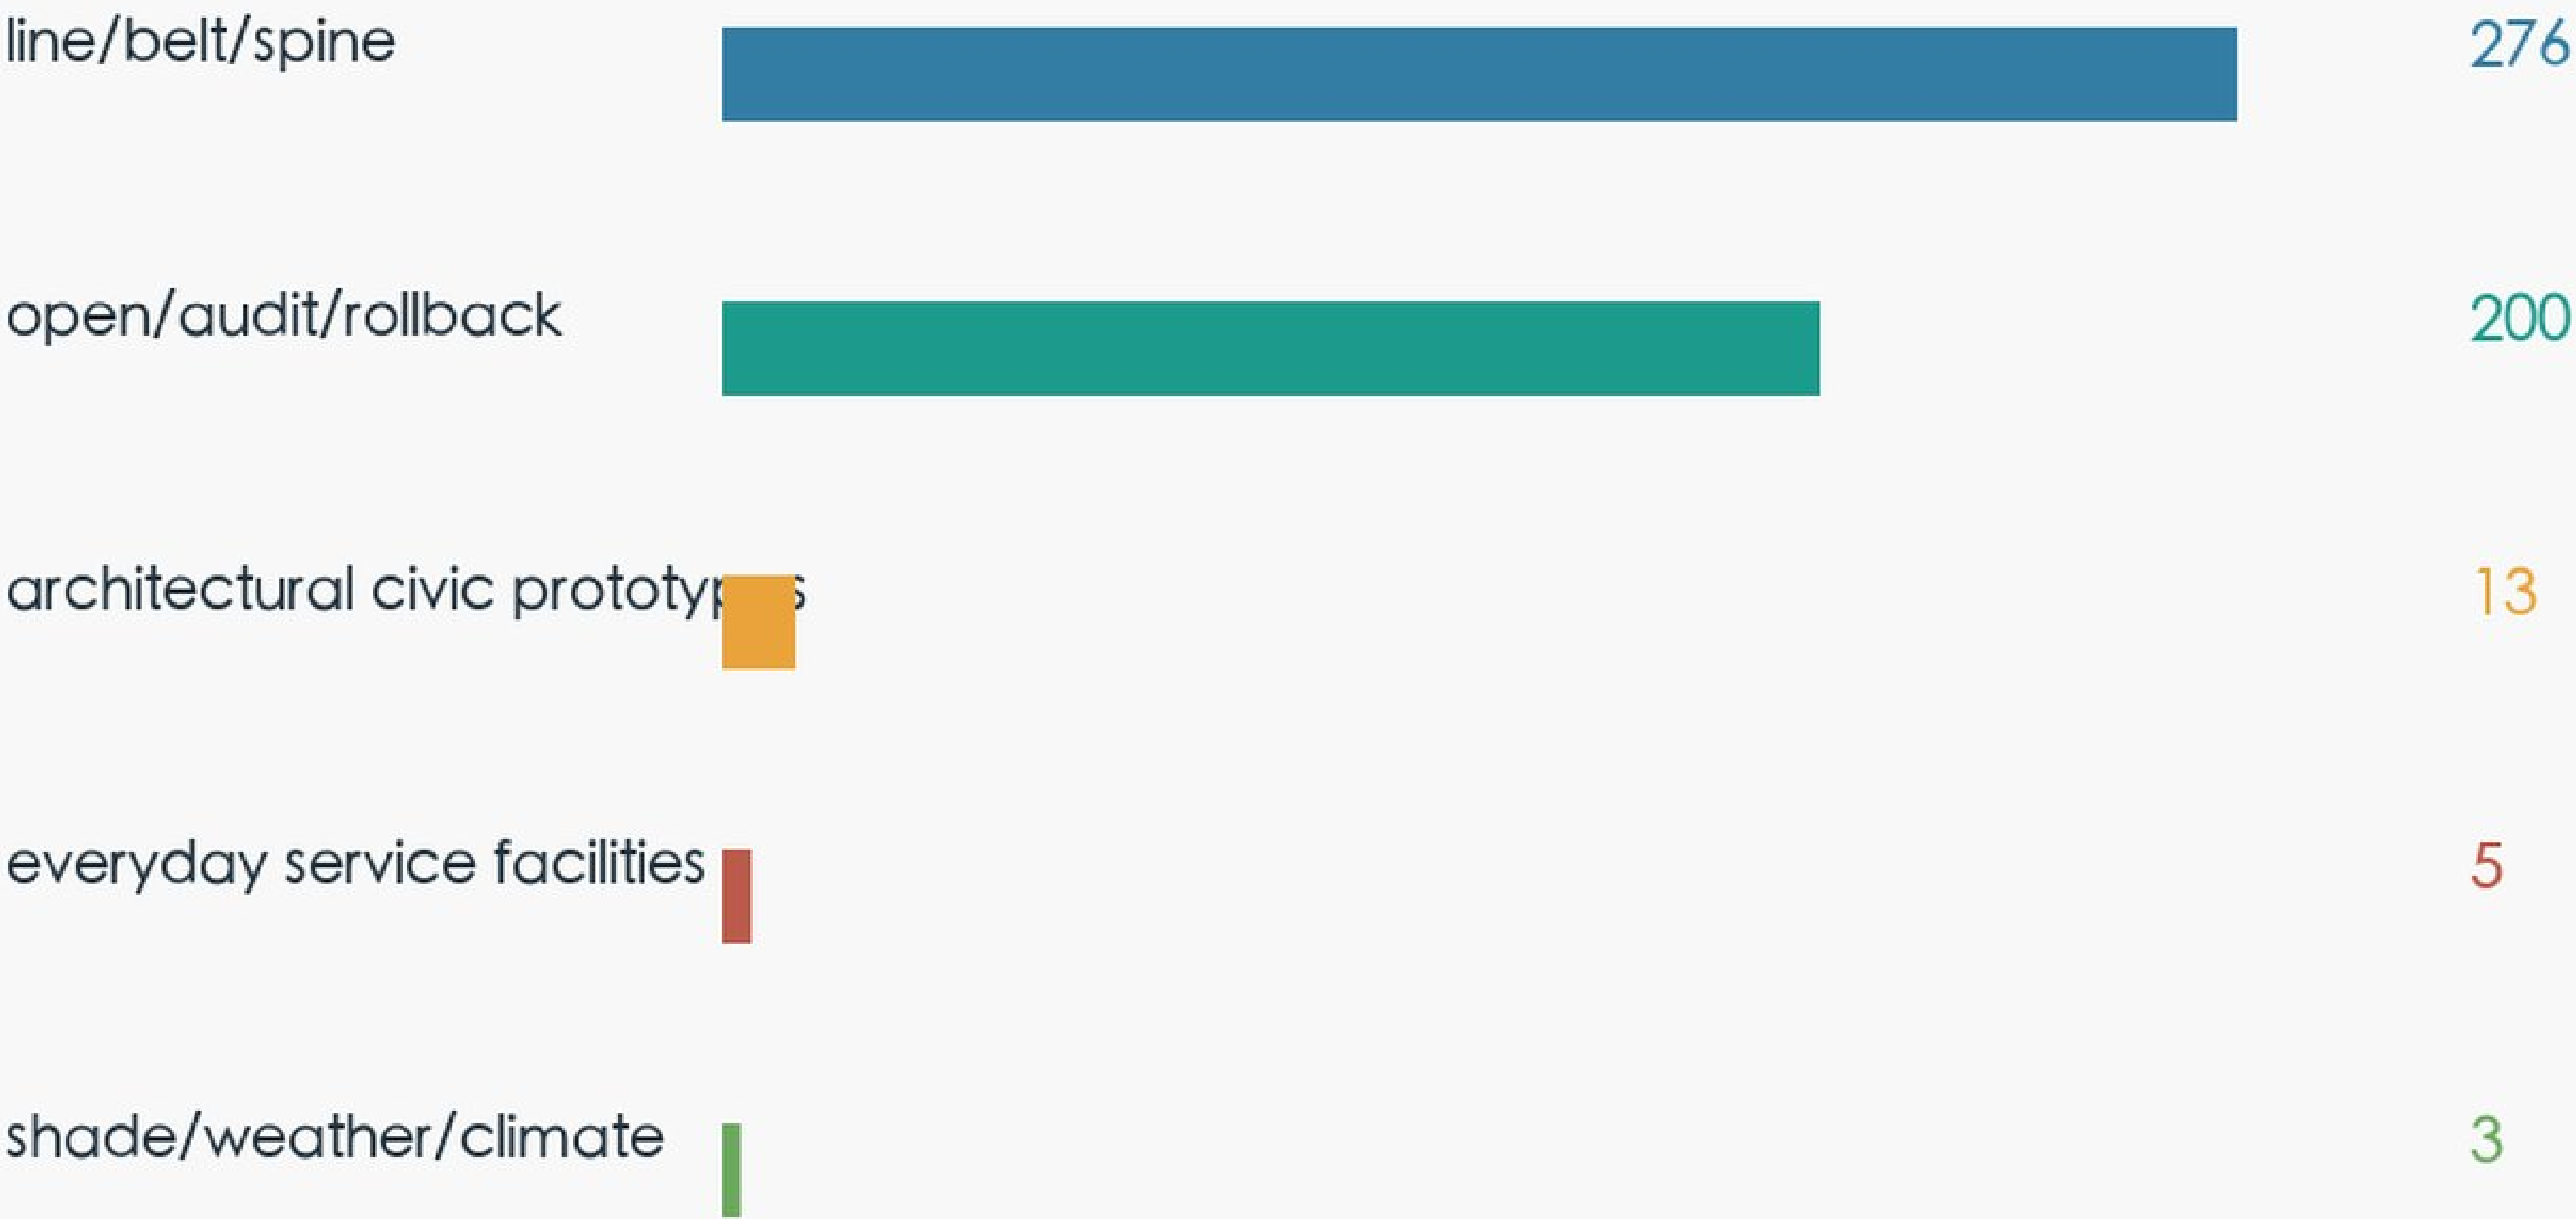

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

EVIDENCE | WHY A COMMON EAVE

Official planning DNA × 309 merged proposals × Agent service contract

309

merged proposals

HAIDIAN DNA

Science city in parks
Porous ground and campus-city links
Restrained, simple, useful
Technology, culture, ecology

AGENT SERVICE CONTRACT | SIX FIELDS

Public problem
Minimum data
Human owner
Offline fallback
Stop threshold
Learning receipt

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

CIVIC PROTOTYPE 1 | QINGHUAYUAN SHARED EAVE

Detached from heritage, self-supporting, reversible; one eave holds a full day of civic life

HERITAGE

REVIEWABLE STAND-OFF

SHARED EAVE

WHAT IT SOLVES

Campus resources, community life, and railway history share one all-weather civic interface. AI routes, translates, maintains, and learns; every service remains available without a phone.

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

ATMOSPHERE | QINGHUAYUAN SHARED EAVE

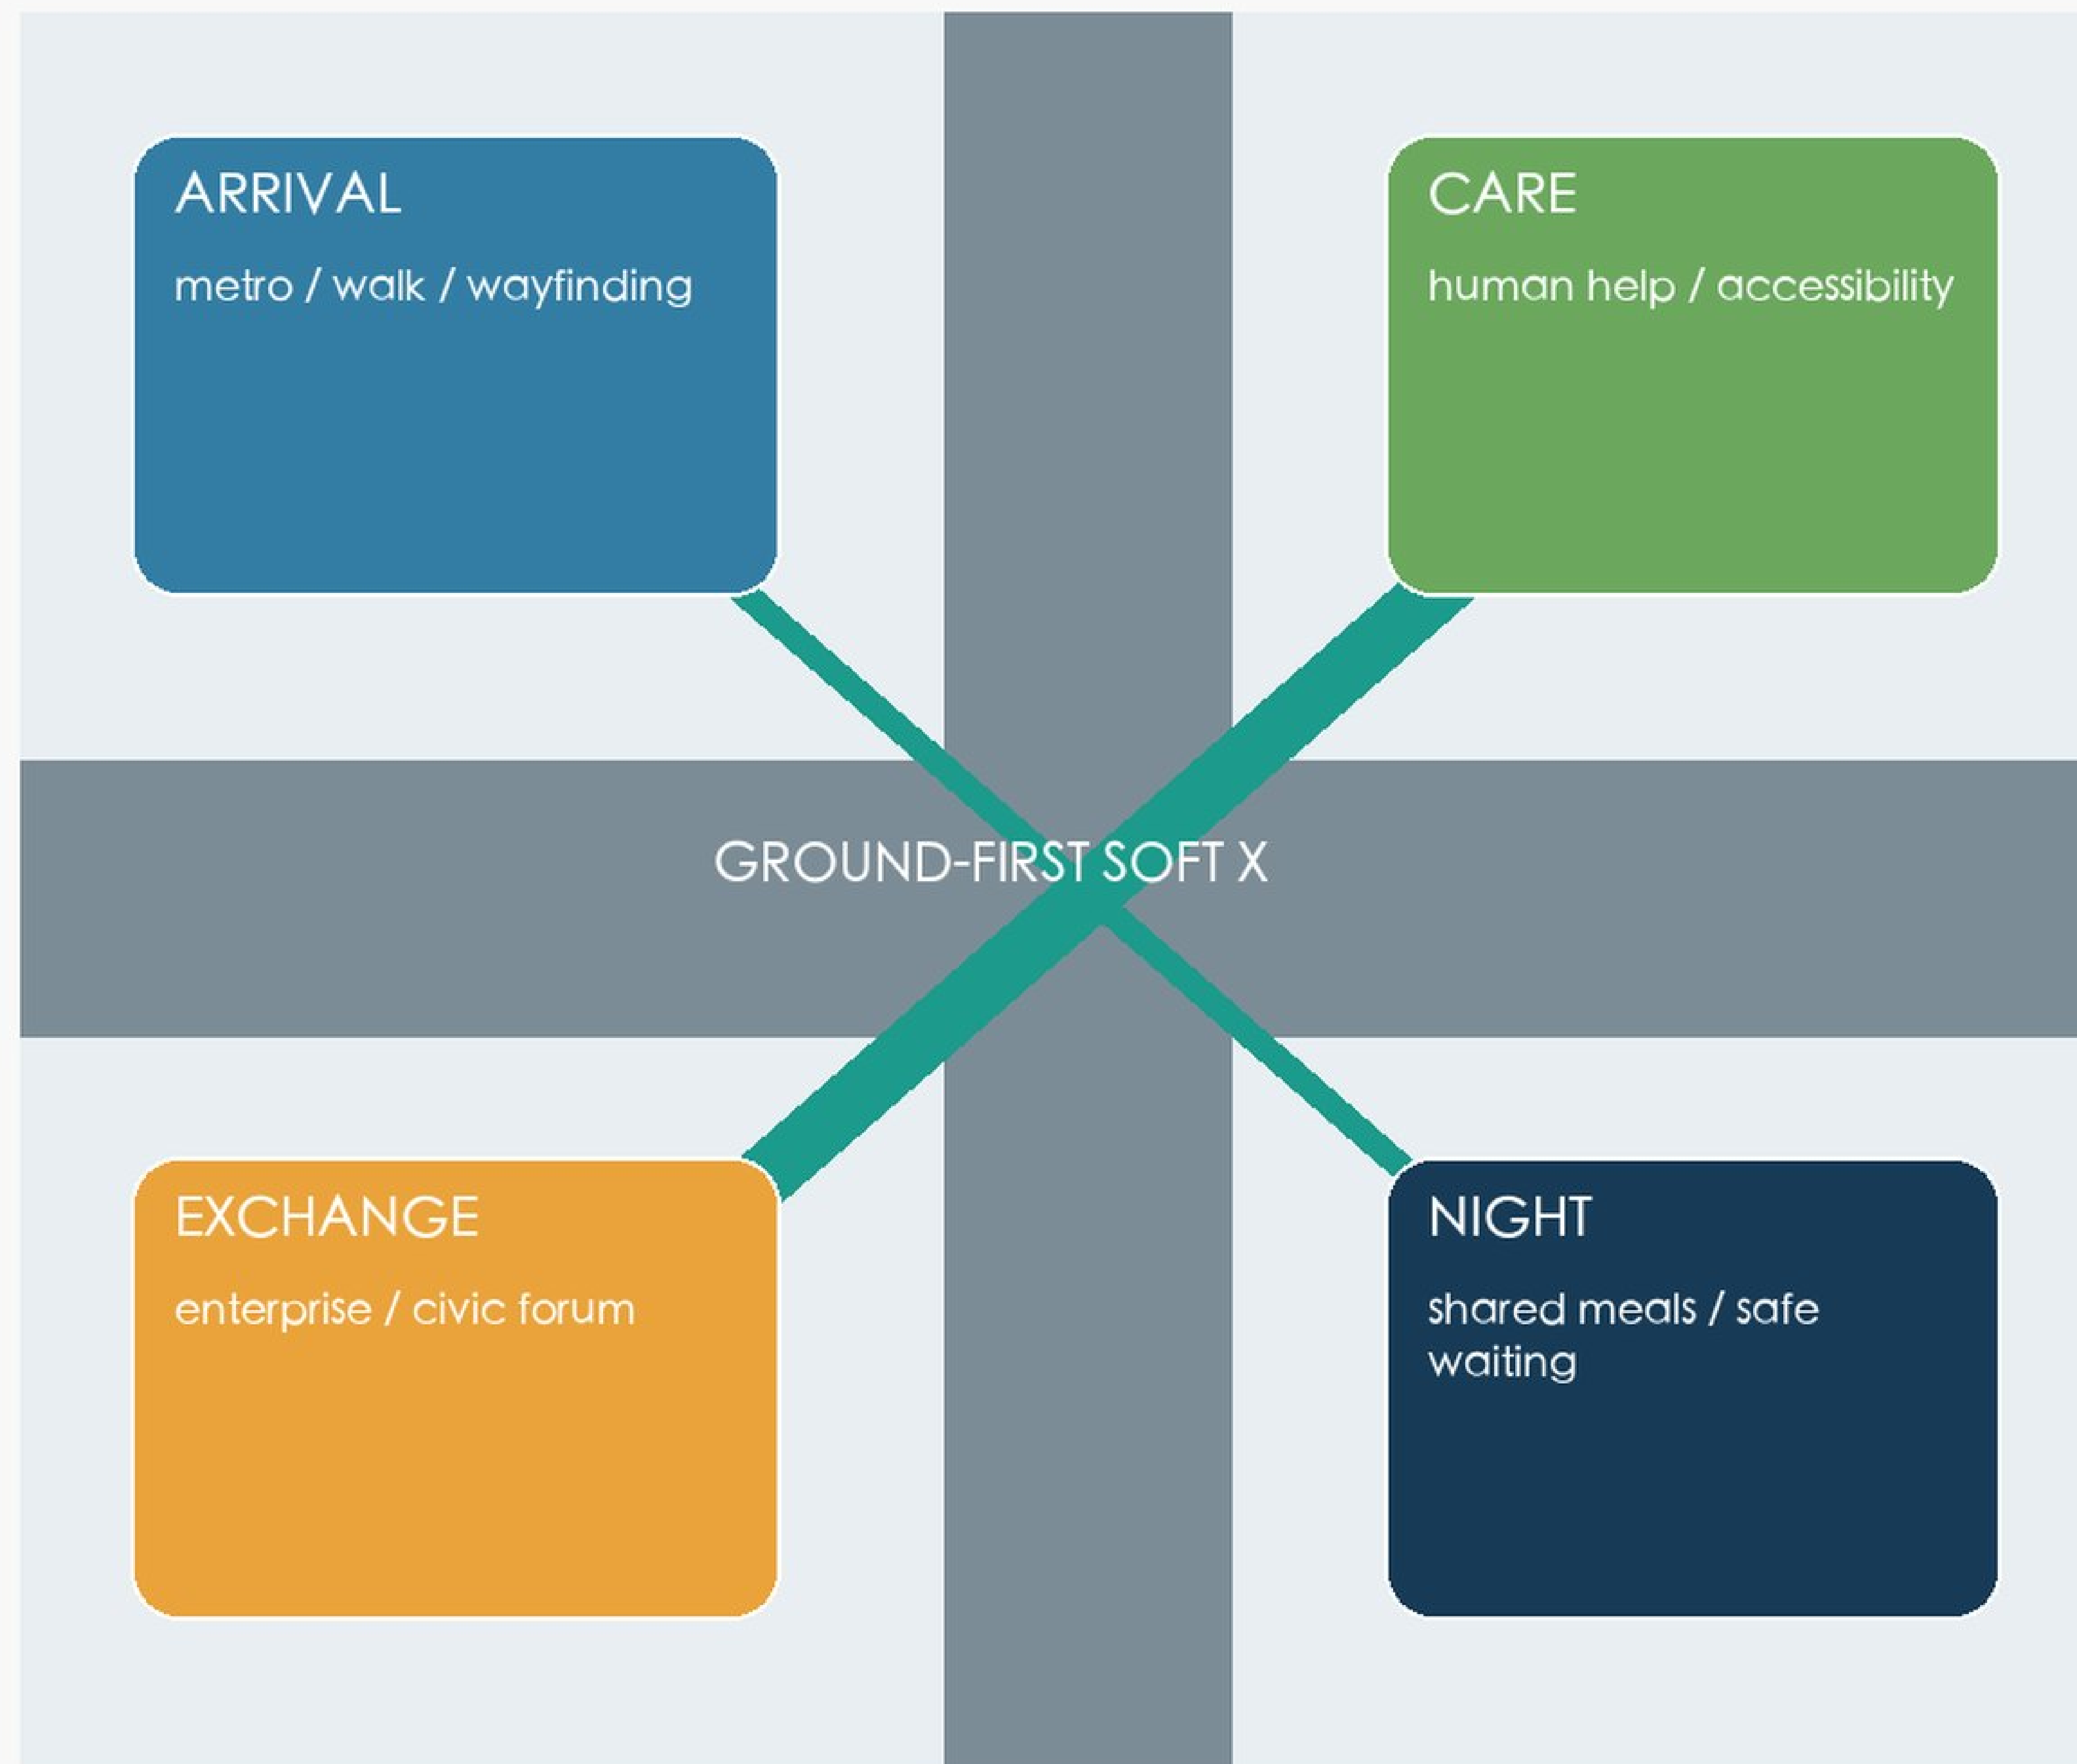

AI-generated concept atmosphere | Not a site photo, engineering location, or dimensional evidence

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

PROTOTYPE 2 | FOUR-CORNER COMMONS

Do not start with a bridge: organise the ground, four corners, time, and responsibility first

SHARE TIME, NOT JUST SPACE

Commute: crossings and cycle arrival
Midday: public service and exchange
Evening: community and safe waiting
Event days: human takeover, automation paused

AGENT DOES FOUR THINGS

Forecast waits and conflicts
Propose time windows
Explain trade-offs
Record human decisions and learning

No face recognition, no autonomous signal change,
no replacement of transport or planning approval.

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10

ATMOSPHERE | DAZHONGSI FOUR-CORNER COMMONS

AI-generated concept atmosphere | Not a site photo, engineering location, or dimensional evidence

Concept proposal | Provisional spatial constraint, not an official boundary | 2026-08-10
