

Jingzhang AI Artery

From Rails to Neurons - Centennial Jingzhang AI Innovation Belt concept (EN)

Three scopes: coordinated research 43.6 km2 (announced) / overall design 11.4 km2 / key areas 368.4 ha

Recalculated: site 1,141.3 ha / green ratio 27.4% / public-space ratio 7.0%

Boundary note: provisional geometry (intake display only); official redlines prevail for formal scoring

Participant: 777-shj (AI-agent generated, four-gate self-check passed)

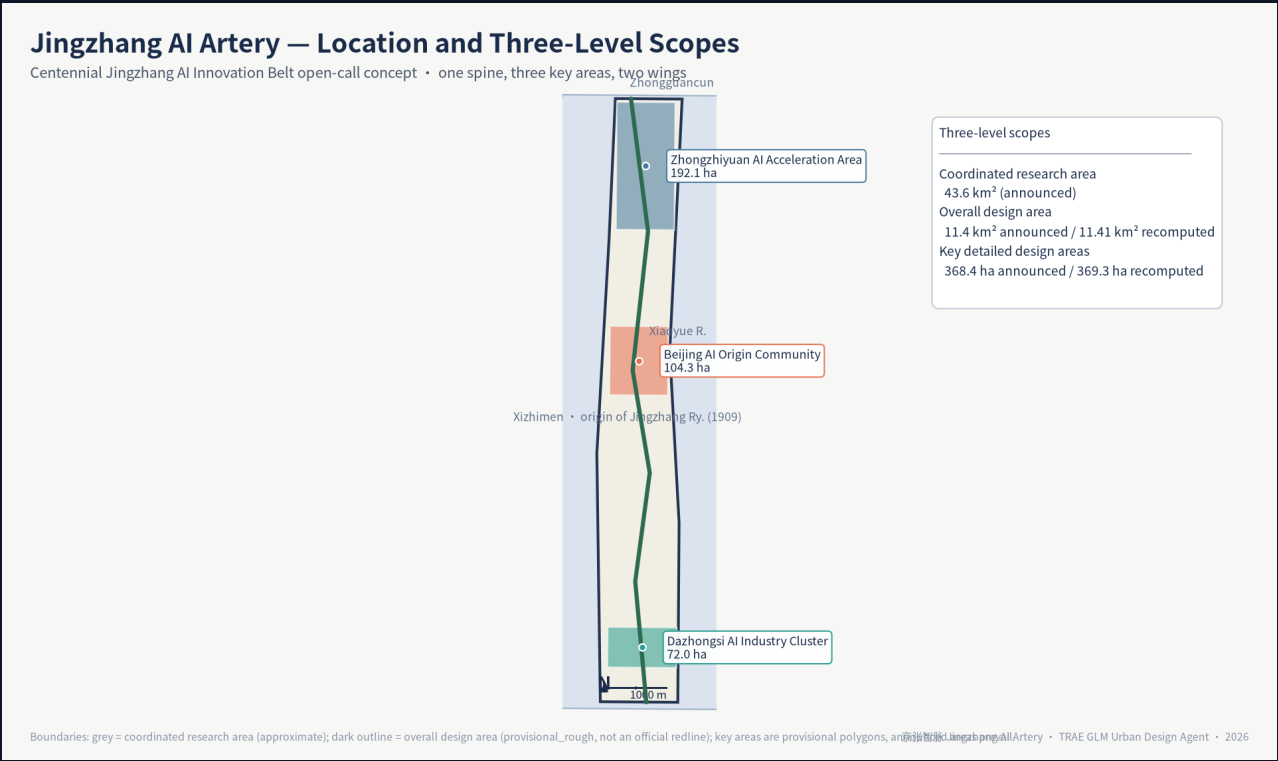

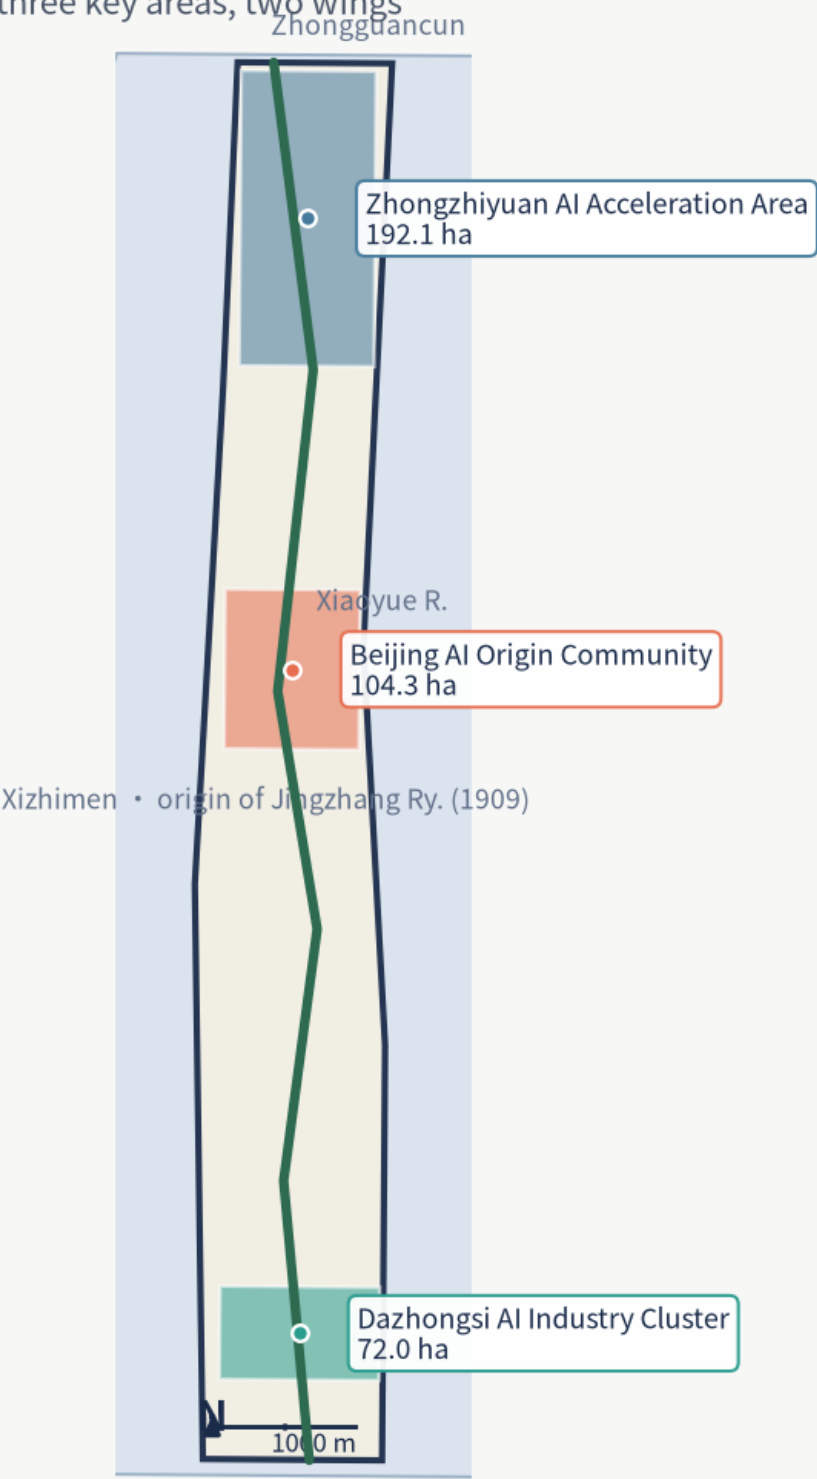

Fig.1 Location and three-level scopes

Centennial Jingzhang AI Innovation Belt concept (provisional boundaries, intake)

Jingzhang AI Artery — Location and Three-Level Scopes

Centennial Jingzhang AI Innovation Belt open-call concept • one spine, three key areas, two wings

Three-level scopes

Coordinated research area
43.6 km² (announced)

Overall design area
11.4 km² announced / 11.41 km² recomputed

Key detailed design areas
368.4 ha announced / 369.3 ha recomputed

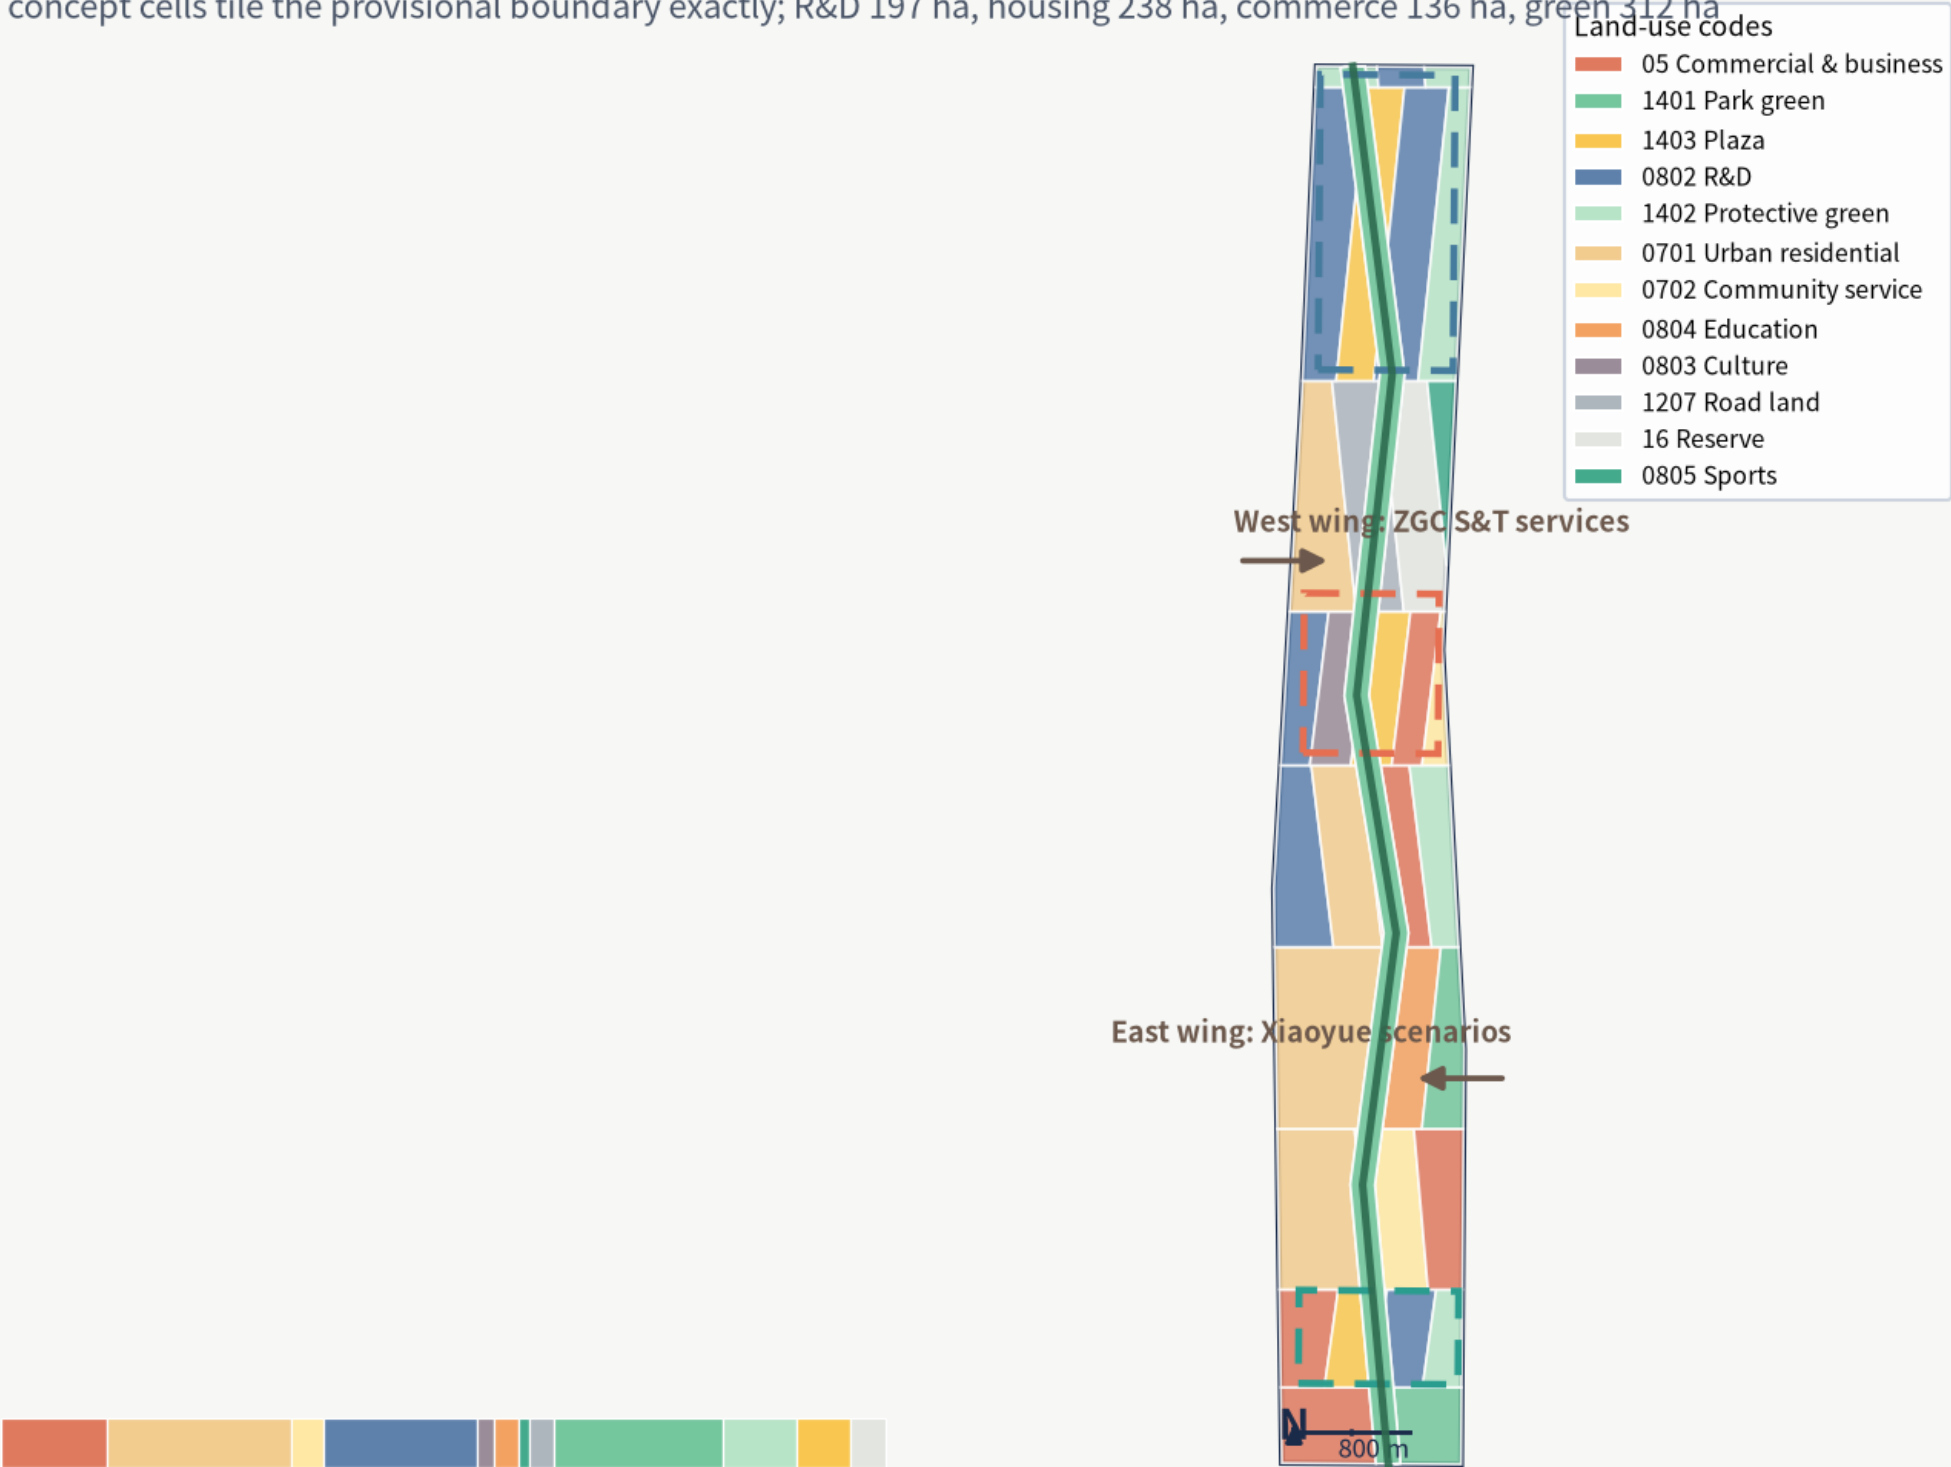

Boundaries: grey = coordinated research area (approximate); dark outline = overall design area (provisional_rough, not an official redline); key areas are provisional polygons, announced Jingzhang AI Artery • TRAE GLM Urban Design Agent • 2026

Fig.2 Land-use structure

Centennial Jingzhang AI Innovation Belt concept (provisional boundaries, intake)

Land-Use Layout and Structure: One Spine, Three Areas, Two Wings

33 concept cells tile the provisional boundary exactly; R&D 197 ha, housing 238 ha, commerce 136 ha, green 312 ha

Structure: the heritage-park spine runs north-south; three dashed key areas anchor innovation; west wing = ZGC services, east wing = Xiaoyue scenarios. Codes follow the MNR land-use classification system. All TENS given by Concept Design Agent • 2026

Fig.3 Key areas

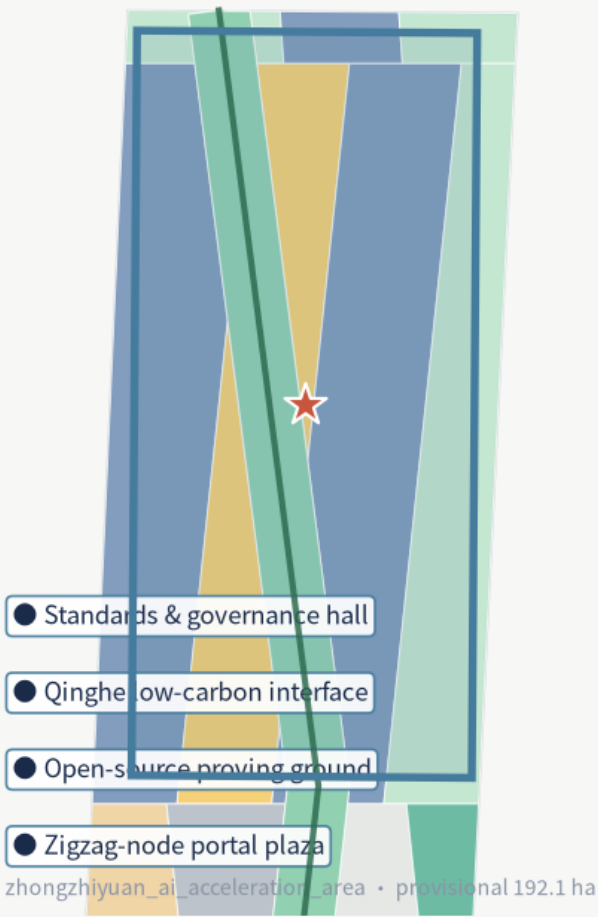

Centennial Jingzhang AI Innovation Belt concept (provisional boundaries, intake)

Detailed Design Intent of the Three Key Areas

North to south: Zhongzhiyuan (192.1 ha) • Origin Community (104.3 ha) • Dazhongsi (72.0 ha); stars mark AI pilgrimage landmarks (conceptual)

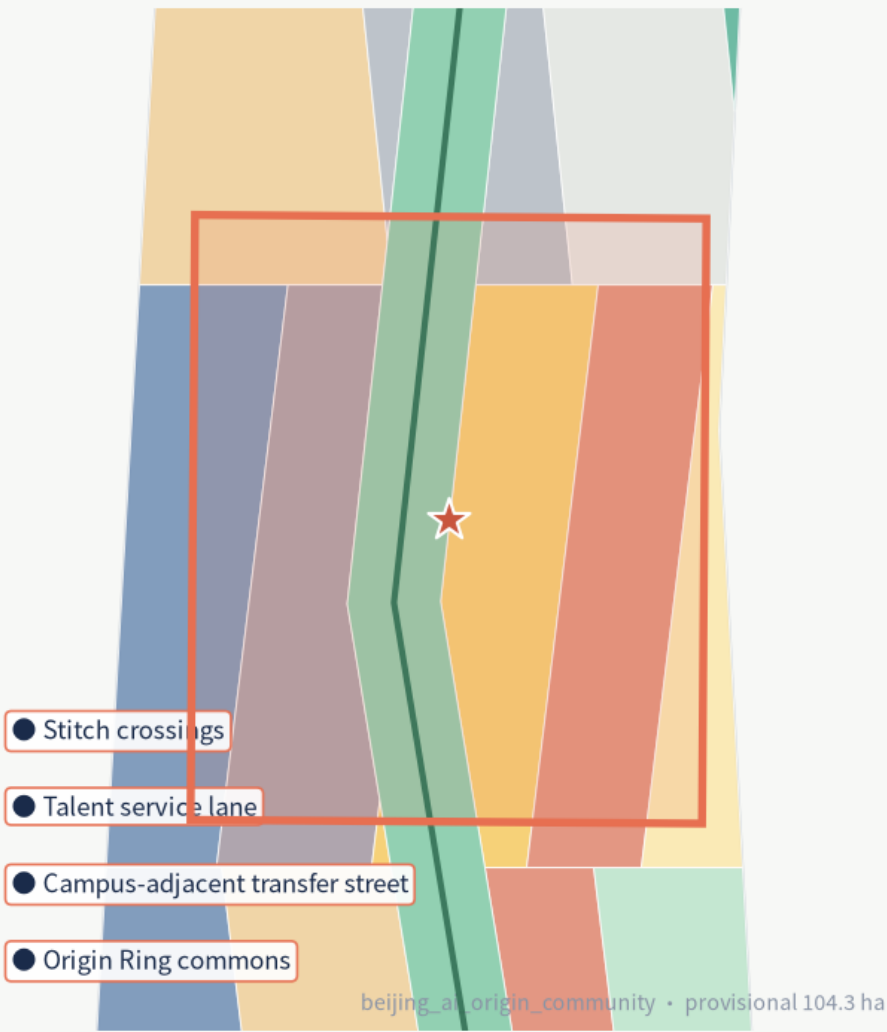

Zhongzhiyuan: full-stack self-reliance accelerator

Full-stack autonomy, safety governance, garden campus

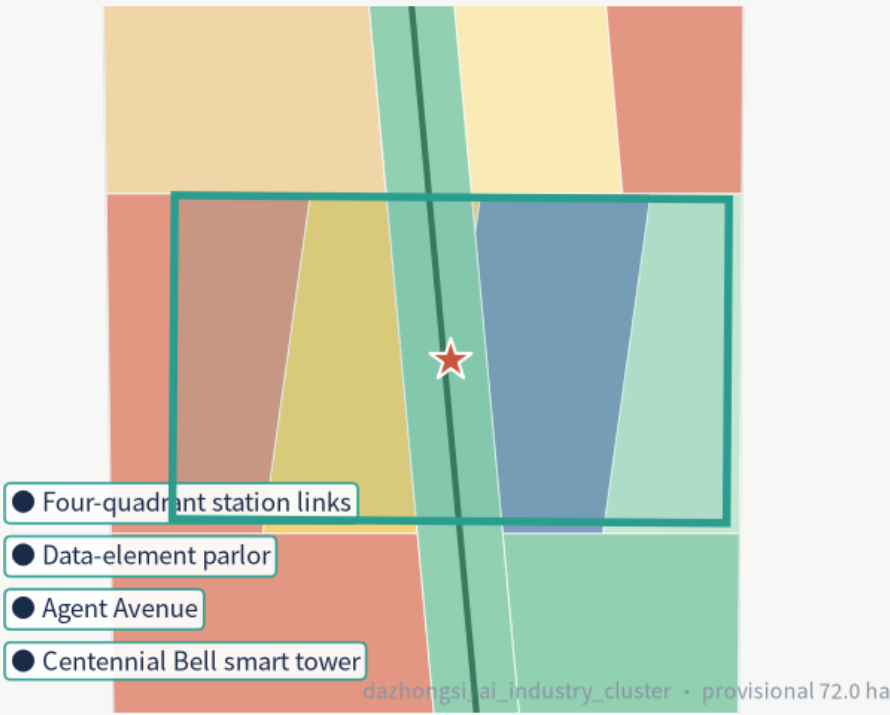

Beijing AI Origin Community

Campus-adjacent incubation, open-source co-creation, 24h community

Dazhongsi AI Industry Cluster

Agent-native commerce, global roadshows

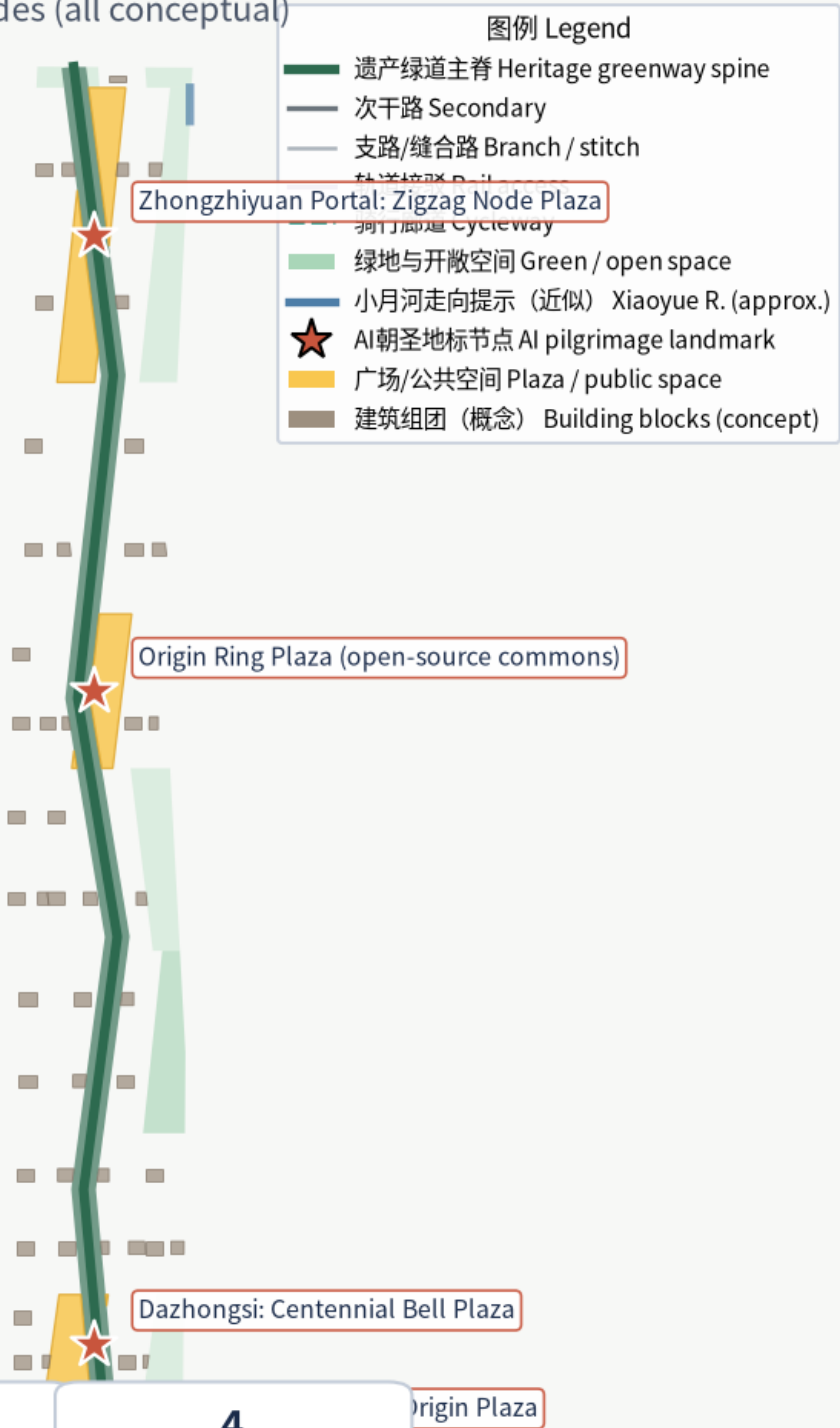

Key-area boundaries are provisional_rough polygons; announced areas prevail. Landmarks and design moves are conceptual suggestions, not engineering, heritage, or approval conclusions. 京张智脉 Jingzhang AI Artery • TRAE GLM Urban Design Agent • 2026

Fig.4 Mobility and blue-green system

Centennial Jingzhang AI Innovation Belt concept (provisional boundaries, intake)

Mobility, Slow Network, and Blue-Green Public Space System

One-spine two-wing slow network + rail access + blue-green system + AI landmark nodes (all conceptual)

9.8 km	9.8 km	27.4%	7.0%	4	Origin Plaza
Spine length	Centerlines total	Green ratio	Public-space ratio	Landmark nodes	

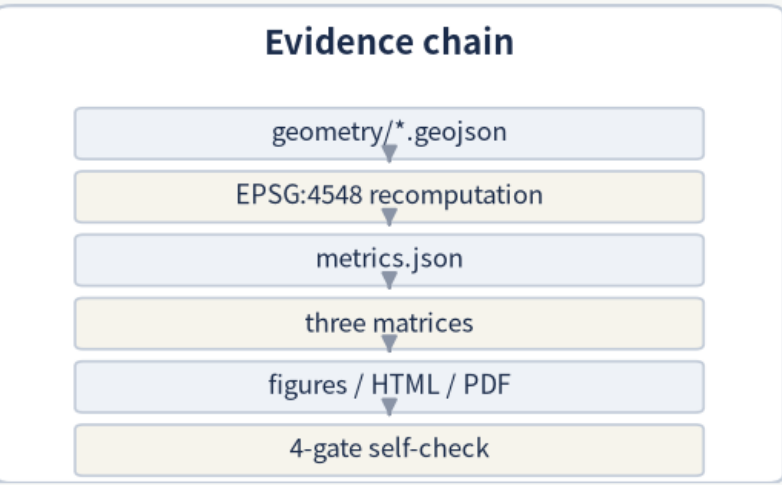

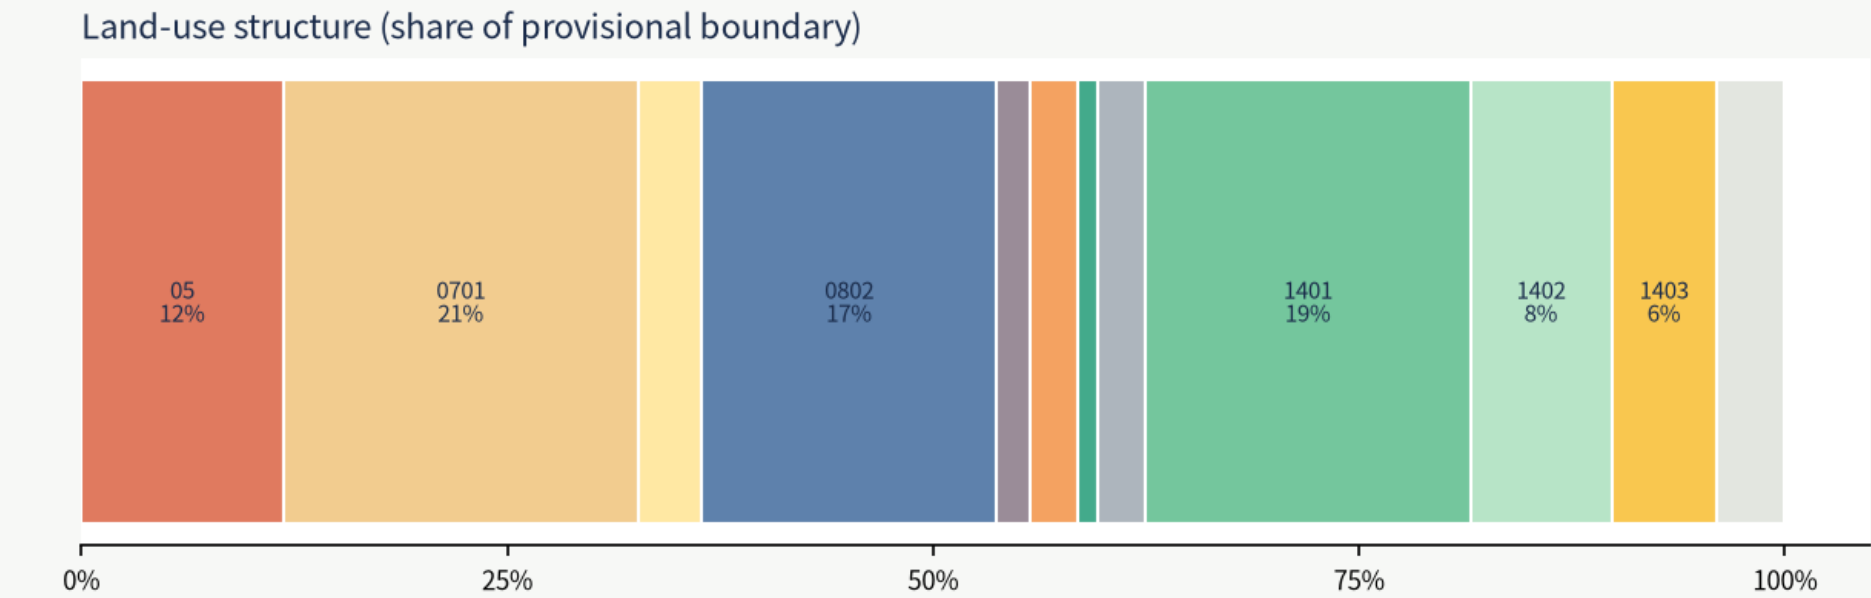

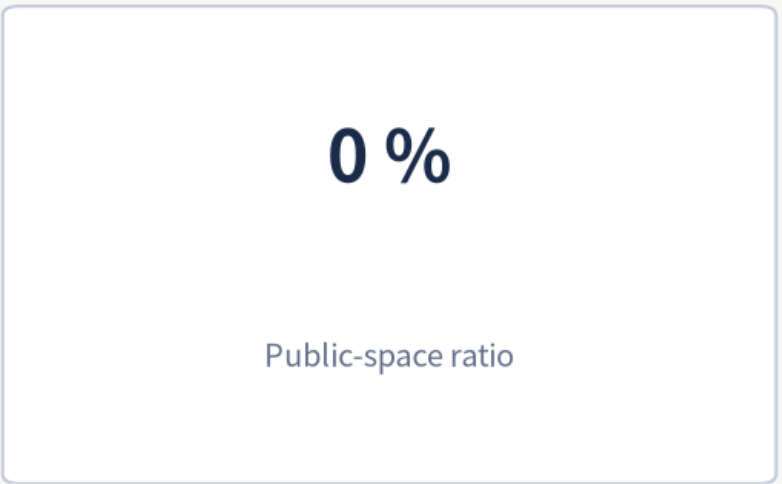

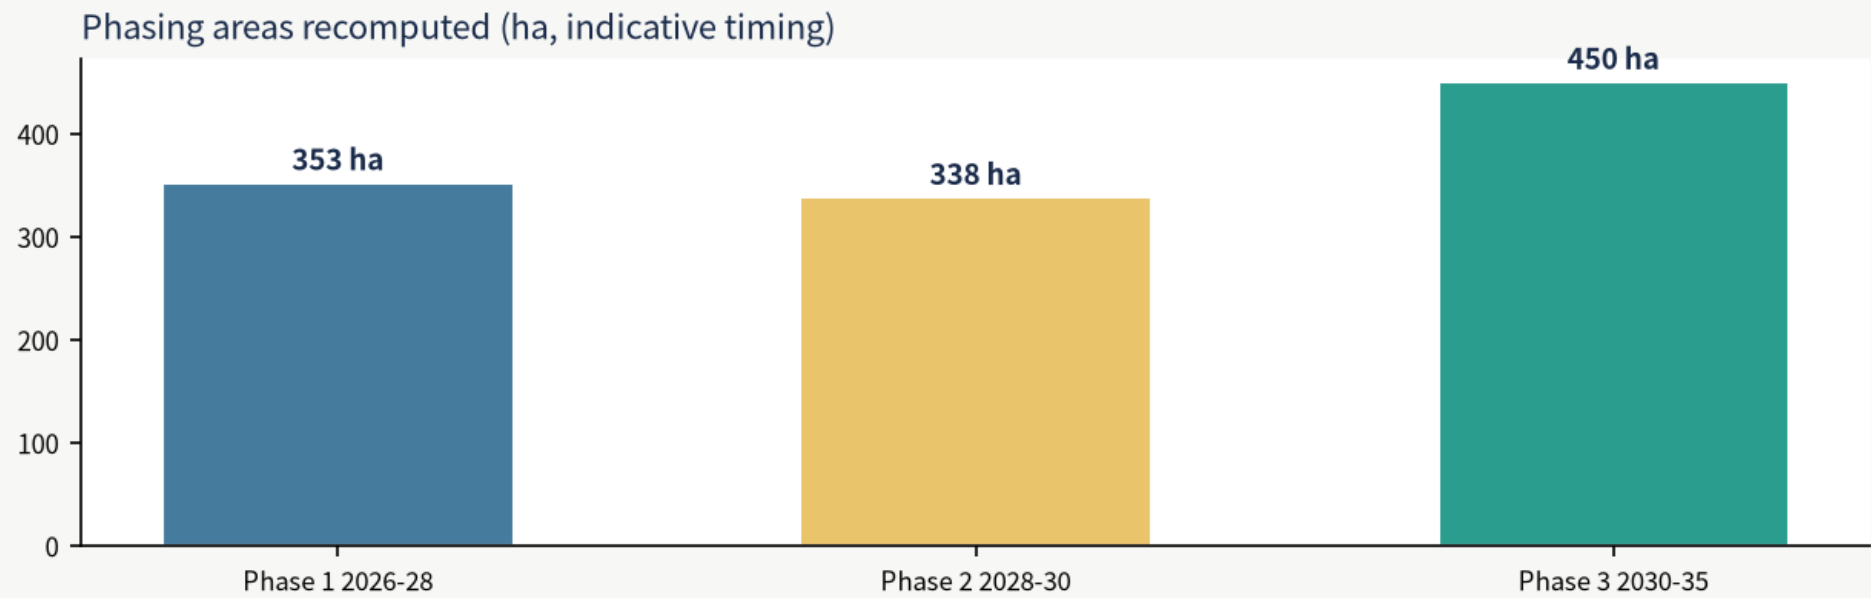

Roads and water are approximations inferred from public road names and the provisional boundary (low confidence); not redlines, rail alignments, or blue-line conclusions. 京张智脉 Jingzhang AI Artery • TRAE GLM Urban Design Agent • 2026

Fig.5 Metrics evidence

Centennial Jingzhang AI Innovation Belt concept (provisional boundaries, intake)

Core Metrics Recomputation and Evidence Chain

All metrics recomputed from submitted geometry in EPSG:4548; missing official controls disclosed as pending

Provisional-boundary warning: areas and ratios are recomputed from the provisional_rough boundary (low confidence); FAR/height/density remain unknown pending official controls. 京张动脉 Jingzhang AI Artery • TRAE GLM Urban Design Agent • 2026

Key metrics

Key metrics summary - metrics.json

Metric key	Description	Recalculated
site_area_sqm	Overall design scope area	1,141.3 ha
green_space_area_sqm	Green space area	312.2 ha
green_ratio	Green ratio	27.4%
public_space_area_sqm	Public space area	79.4 ha
public_space_ratio	Public-space ratio	7.0%
building_footprint_area_sqm	Building footprint area	45.7 ha
key_area_total_sqm	Key areas total	369.3 ha
road_centerline_length_m	Road centerline length	9,801 m

Values match metrics.json; spatial recalculation follows spatial_review.py (EPSG:4548 union areas).
