

01 Overall Spatial Structure

One belt, three cores, multi-scenario nodes, and a composite blue-green slow-traffic ring; the Jingzhang Heritage Park as the historical and public-space spine; the three key areas as innovation anchors; universities, enterprises, communities and rail stations as the everyday network.

06 Mobility & Blue-Green System

A north-south through, east-west connected walking and cycling system is organized around the Jingzhang Heritage Park active belt, integrating the Qinghe and Xiaoyue rivers and the travel needs of universities, enterprises and communities; slow-traffic gaps, the North 5th Ring crossing and the park's northern/southern gateway nodes are addressed with six handshake transfer points linking rail stations, public space and industrial nodes.
