

The Second Track | Jing-Zhang Public Intelligence Field

From Railway Heritage Park to Public Innovation Infrastructure for the AI Era

AI IS THE ENGINE · PUBLIC REALM IS THE INTERFACE · PEOPLE + PLANET ARE THE GOAL

CORE MANIFESTO

FIRST TRACK × SECOND TRACK × SWITCH × FIELD × VERSION

FIRST TRACK

The First Track carries history, railway heritage, park and inherited urban infrastructure.

SECOND TRACK

The Second Track connects people, nature, knowledge, industry, public life and trustworthy AI.

OPEN SOURCE

The city is never once-and-for-all; scenarios, modules, rules and lessons remain open to public revision.

PHASE I CONTINUITY

HERITAGE IS NOT A BACKDROP

Wanpeng Zu / □□□

Public project records list Wanpeng Zu as Project Manager / Lead Designer for Jingzhang Railway Park; this establishes professional continuity, not endorsement.

DESIGN POSITION

The First Track is not overwritten. The Second Track does not replace history with novelty; heritage, park life and future innovation grow together.

THREE SCALES

43.6 km² → 11.4 km² → 368.4 ha

43.6 km²

Coordinated research: industry, talent, culture and global mechanisms.

11.4 km²

Overall design: spatial model and evidence system for the Public Intelligence Field.

368.4 ha

Key areas: three public responsibilities and fifteen scenario interfaces.

SPATIAL GRAMMAR

FIRST TRACK · SECOND TRACK · SWITCH · FIELD · VERSION

FIRST_TRACK

The temporal ground formed by railway heritage, parkland, history and existing urban infrastructure.

SECOND_TRACK

Relational infrastructure connecting talent, knowledge, industry, community, ecology and public services.

SWITCH

Programmable connection points among universities, enterprises, parks, communities, commerce and culture.

FIELD

A public intelligence network created by multiple nodes through open rules and shared facilities.

VERSION

A city that replaces a one-off final state with temporary action, testing, feedback, updates and scaling.

O-W01

A walking, cycling, rest, rehabilitation and everyday-movement component across the three areas; W denotes wellness, not a seventh switch type.

SIX VALUES

PEOPLE + PLANET

Wellness

Support physical activity, mental restoration, thermal comfort and access to care.

Social Connection

Create low-threshold interfaces for encounter, collaboration, learning and intergenerational exchange.

Equity

Preserve non-digital channels, accessible continuity and affordable shared resources.

Safety

Constrain AI through data minimization, human review, pause mechanisms and clear accountability.

Resilience and Infrastructure

Organize compute, energy, utilities, mobility and emergency systems as replaceable and recoverable networks.

Ecology

Treat blue-green continuity, habitat, stormwater retention and low-carbon operation as spatial performance.

PUBLIC INTELLIGENCE FIELD OVERVIEW

DUAL TRACKS + SIX SWITCH TYPES

STATUS · provisional

BOUNDARY-SOURCE / A-BOUNDARY-001

LAND USE + SPATIAL STRUCTURE

SEVEN COMPLETE ZONES + FOUR RENEWAL ACTIONS

02 / 05

LAND USE + SPATIAL STRUCTURE

SEVEN COMPLETE ZONES · DUAL TRACKS · FOUR RENEWAL ACTIONS

THREE KEY AREAS

THREE PROTOTYPES + FIFTEEN INTERFACES

03 / 05

THREE KEY AREAS · THREE PROTOTYPES

ONE DUAL-TRACK SYSTEM, DIFFERENT PUBLIC RESPONSIBILITIES

KA01

Zhongzhiyuan AI Independent Innovation Acceleration Area

PROTOTYPE

Trusted-AI Testing and Governance Commons

SPATIAL STRUCTURE

One ecological testing spine, three production-switch types and multiple pausable test courtyards; define limits and accountability before deploying technology.

VALUES

V-SAFETY · V-RESILIENCE · V-ECOLOGY · V-SOCIAL

SCENARIO INTERFACES

- SC01 Trusted-AI Test Commons
- SC02 Model Audit and Red-Team Street
- SC03 Edge Compute-Energy Coordination Sandbox
- SC09 Blue-Green Climate Co-Stewardship
- SC15 Public Intelligence Field Version Assembly

STATUS · provisional

Boundary / buildings / delivery pending cleared data

KA02

Beijing AI Origin Community

PROTOTYPE

Knowledge and Life Commons

SPATIAL STRUCTURE

A university-campus-community knowledge loop, an all-ages wellness loop and small shared courtyards interweave research, entrepreneurship, living and learning through low-impact renewal.

VALUES

V-WELLNESS · V-SOCIAL · V-EQUITY · V-ECOLOGY

SCENARIO INTERFACES

- SC04 Open-Source Translation Studio
- SC05 Open City Classroom and Mentor Loop
- SC06 Dual-Channel Community Service Station
- SC07 All-Ages Wellness Loop
- SC08 Accessible Journey Companion
- SC10 Time-Shared Public Space
- SC15 Public Intelligence Field Version Assembly

STATUS · provisional

Boundary / buildings / delivery pending cleared data

KA03

Dazhongsi AI Industry Cluster

PROTOTYPE

Urban-Agent, Culture and Consumption Commons

SPATIAL STRUCTURE

Four-quadrant pedestrian stitching around the station connects an agent marketplace, a content stage and railway-culture nodes into an all-day civic interface with human takeover.

VALUES

V-SOCIAL · V-EQUITY · V-SAFETY · V-WELLNESS

SCENARIO INTERFACES

- SC06 Dual-Channel Community Service Station
- SC08 Accessible Journey Companion
- SC10 Time-Shared Public Space
- SC11 Public Urban-Agent Marketplace
- SC12 AI-Native Culture and Content Stage
- SC13 Dazhongsi Four-Quadrant Walking Stitch
- SC14 Centennial Jing-Zhang Memory Track
- SC15 Public Intelligence Field Version Assembly

STATUS · provisional

SEVEN LAND-USE TYPES

CONCEPTUAL FUNCTIONAL PARTITION · NOT STATUTORY LAND USE

LU01 · Knowledge Production and Research

0802 · Conceptual functional area for shared research, trustworthy-AI testing and translation.

LU02 · Education and Open Learning

0804 · Connect universities, public courses, studios and lifelong learning.

LU03 · Mixed Living and Community Services

0702 · Mixed interface for everyday care, community services and talent life.

LU04 · Industry, Business and Incubation

0902 · Conceptual carrier for enterprise collaboration, incubation and professional services.

LU05 · Culture, Consumption and Public Life

0803 · Hybrid settings for content creation, performance, consumption and civic life.

LU06 · Green and Open Space

1401 · Public ground for ecology, wellness, social life, culture and reversible testing.

LU07 · Mobility and Shared Infrastructure

1207 · Conceptual network for walking, cycling, transit transfer, logistics and shared infrastructure.

SIX SWITCH TYPES

K / C / E / M / P / H · WELLNESS IS A VALUE, NOT A SWITCH

K · Knowledge Switch

Interfaces for open learning, research translation, shared labs and open-source knowledge.

C · Community Switch

Hybrid nodes for neighborhood services, care, co-governance and non-digital access.

E · Ecology Switch

Connect green space, water, thermal conditions and public ecological observation.

M · Mobility Switch

Transfer interfaces for transit, walking, cycling, accessibility and emergency routes.

P · Production Switch

Governable settings for trustworthy-AI testing, incubation, release and industrial collaboration.

H · Heritage Switch

Bring railway memory, the Phase I park, Zhongguancun innovation culture and contemporary public life together.

TEN PERSONAS

DESIGN FOR DIFFERENT BODIES, AGES, ROLES AND DIGITAL CHOICES

U01 · Foundation Researcher

Shared research resources, quiet focus space, trusted data and cross-institution exchange. Institutional silos, closed equipment and a lack of informal exchange interfaces.

U02 · Founder and Small Team

Low-threshold trials, short-term space, professional services, first users and clear test rules. High fixed costs, opaque scenario access and long validation cycles.

U03 · Student and Young Learner

Open courses, practical projects, affordable social life and safe evening routes. Campus-city disconnection and unequal access to resource information.

U04 · Engineering Test and Operations Worker

Isolated test areas, traceable processes, human emergency stops and shift handover. Ambiguous accountability and invisible infrastructure status.

U05 · Resident and Caregiver

Everyday services, care for children and older people, quiet rest and understandable feedback channels. Technology barriers, activity conflicts and fragmented public services.

TEN PERSONAS

DESIGN FOR DIFFERENT BODIES, AGES, ROLES AND DIGITAL CHOICES

U06 · Child and Family Learner

Observable nature, hands-on learning, safe play and activities visible to caregivers. Traffic conflicts, adult-centric interfaces and passive data collection.

U07 · Older User

Continuous seating, shade, clear wayfinding, on-site human service and non-smart alternatives. Digital exclusion, walking fatigue and complex interactions.

U08 · User with Accessibility Needs

Step-free continuous routes, multisensory information, adequate turning space and human assistance. Broken ramps, unreadable interfaces and occupied accessible facilities.

U09 · Cultural Visitor and Creative Worker

Credible history, creation and display, civic events and heritage experiences not overwhelmed by commercialization. Superficial cultural symbols, unclear rights and spatial homogenization.

U10 · Public-Service and Urban Operations Worker

Cross-department coordination, traceable evidence, clear escalation and reversible automation. System silos, false-alert pressure and displaced accountability.

Zhongzhiyuan AI Independent Innovation Acceleration Area

Trusted-AI Testing and Governance Commons

SPATIAL STRUCTURE

One ecological testing spine, three production-switch types and multiple pausable test courtyards; define limits and accountability before deploying technology.

SCENARIOS

SC06 · SC08 · SC10 · SC11 · SC12 · SC13 · SC14 · SC15

DUAL-TRACK RELATIONSHIP

HISTORY + FUTURE AS ONE PUBLIC SYSTEM

STABILITY

The First Track remains continuous, legible and historically deep.

BRANCHING

The Second Track branches into universities, firms, communities, parks, culture and mobility.

FIELD

Nodes form an open, shared and continuously learning urban network.

OPEN, SHARED, OPEN SOURCE

THREE LEVELS OF PUBLICNESS

OPEN

Space is publicly accessible.

SHARED

Facilities, places and knowledge are shared across groups.

OPEN SOURCE

Modules, rules, data and lessons can be tested, revised, replicated and upgraded.

VERSIONED CITY

TEMPORARY → TEST → FEEDBACK → UPDATE → SCALE

MECHANISM

Designing the future means building a mechanism that keeps creating it, not predicting a final form.

HUMAN REVIEW

Every scale-up requires public evidence, affected-user participation and clear exit conditions.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC01 · Trusted-AI Test Commons

PUBLIC PROBLEM: Industry testing lacks a transparent, pausable and reviewable layer between the lab and public space.

AI MAY: Simulate within approved boundaries and datasets, log anomalies and generate test summaries.

HUMAN MUST: Approve test protocols, confirm safety limits, operate emergency stops and sign off any next version.

PAUSE: Pause immediately upon out-of-scope collection, unexplained high-risk output, failed human stop or unresolved public complaint.

SC02 · Model Audit and Red-Team Street

PUBLIC PROBLEM: Bias, misuse and opacity often surface only after deployment.

AI MAY: Assist in generating test cases, comparing versions and flagging anomalies for professional review.

HUMAN MUST: Set audit questions, judge material impact, protect reporters and publish conclusions.

PAUSE: Pause for leakage, uncorrected discriminatory results, impact on real services or undisclosed conflicts of interest.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC03 · Edge Compute–Energy Coordination Sandbox

PUBLIC PROBLEM: Compute facilities lack a legible coordination interface with energy, heat and utility capacity.

AI MAY: Forecast load on simulated data, recommend load shifting and compare energy strategies.

HUMAN MUST: Confirm equipment safety, energy dispatch, fire safety and utility interfaces; professionals execute every real switch.

PAUSE: Pause for thermal, load or protection-limit violations, conflicting sensors or missing human confirmation.

SC04 · Open-Source Translation Studio

PUBLIC PROBLEM: Universities, open-source communities and real urban problems lack a long-term spatial mechanism for working together.

AI MAY: Help organize public documentation, match collaboration skills and draft reviewable prototype notes.

HUMAN MUST: Confirm licensing, attribution, problem priority, feasibility and release decisions.

PAUSE: Pause for unclear provenance, license conflict, sensitive information or displacement of community priorities by commercial interests.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC05 · Open City Classroom and Mentor Loop

PUBLIC PROBLEM: High-quality knowledge is divided by campus, age and professional barriers.

AI MAY: Help create multilingual, large-print and easy-read course versions and recommend public learning paths.

HUMAN MUST: Teachers and mentors verify content, safeguard minors, handle disputes and retain in-person teaching.

PAUSE: Pause automated recommendations when errors persist, child safeguards are insufficient or accessible versions are absent.

SC06 · Dual-Channel Community Service Station

PUBLIC PROBLEM: Smart services can improve efficiency while excluding people unable or unwilling to use digital tools.

AI MAY: Explain processes, help complete forms and direct queues, but never replace eligibility decisions or deny service.

HUMAN MUST: Handle final transactions, exceptions, identity verification and appeals.

PAUSE: Pause the smart channel when staffed service is unavailable, routing fails, privacy is exposed or human takeover is refused.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC07 · All-Ages Wellness Loop

PUBLIC PROBLEM: Everyday movement, rehabilitation and rest are discontinuous, while vulnerable users are displaced by fast circulation.

AI MAY: Use anonymous environmental data to flag heat, crowding and suitable alternative routes.

HUMAN MUST: Operators inspect surfaces, lighting and facilities; qualified professionals provide any health advice.

PAUSE: Stop route recommendations for unsafe segments, extreme weather, blocked accessible routes or unreliable sensors.

SC08 · Accessible Journey Companion

PUBLIC PROBLEM: Accessible-route conditions change quickly, while navigation often mistakes nominal access for actual usability.

AI MAY: Offer alternative routes from public facility-status data and explain uncertainty.

HUMAN MUST: Confirm works and facility status, respond to calls, assist on site and correct errors.

PAUSE: Show staffed assistance only when lifts or ramps cannot be verified, positioning error is excessive or human help is unavailable.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC09 · Blue-Green Climate Co-Stewardship

PUBLIC PROBLEM: Stormwater, thermal comfort and habitat performance are difficult for the public to understand and co-steward.

AI MAY: Aggregate environmental sensing, flag maintenance needs and visualize rainfall scenarios.

HUMAN MUST: Ecology and utility professionals judge risk, issue warnings, maintain facilities and approve public activities.

PAUSE: Pause public interaction during heavy rain, flood operations, sensor conflict or site closure and switch to safety notices.

SC10 · Time-Shared Public Space

PUBLIC PROBLEM: Limited public space is contested by movement, quiet, performance, passage and commerce.

AI MAY: Propose time slots from anonymous use counts and show affected groups.

HUMAN MUST: Community coordinators conduct open deliberation, protect minority needs and approve rules.

PAUSE: Pause automated scheduling when complaints accumulate, emergency access is blocked, vulnerable groups are repeatedly excluded or safety conditions are insufficient.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC11 · Public Urban-Agent Marketplace

PUBLIC PROBLEM: Agent services lack a public entry where people can compare, try, complain and exit to human service.

AI MAY: Demonstrate bounded functions after explicit visitor choice and explain provenance, capability and limits.

HUMAN MUST: Review listings, handle refunds and complaints, and check accessibility and child safeguards.

PAUSE: Delist for false capability claims, implied official endorsement, forced registration, discriminatory service or failed complaint handling.

SC12 · AI-Native Culture and Content Stage

PUBLIC PROBLEM: Generated content in public culture can blur authorship, training provenance, authenticity and responsibility.

AI MAY: Assist creation, captions, translation and accessible description from cleared inputs, with explicit labeling.

HUMAN MUST: Curate, verify rights and historical facts, judge public suitability and respond to creator appeals.

PAUSE: Stop publication for unclear rights, misleading content, malformed people or missing essential accessible versions.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC13 · Dazhongsi Four-Quadrant Walking Stitch

PUBLIC PROBLEM: Ground-level walking, bicycle parking and public interfaces lack continuity among the station's four quadrants.

AI MAY: After reliable network data arrives, assist comparison of pedestrian conflict and queue scenarios.

HUMAN MUST: Mobility and accessibility professionals survey conditions, judge signals and road safety, and complete statutory approvals.

PAUSE: Without road redlines, signals, flow counts or accessibility surveys, produce no engineering alignment or travel-time conclusion.

SC14 · Centennial Jing-Zhang Memory Track

PUBLIC PROBLEM: Railway heritage can become decoration, while the Phase I park experience lacks a sustained dialogue with public life in the AI era.

AI MAY: Provide multilingual retrieval, accessible narration and source links from verified historical material.

HUMAN MUST: Historians, heritage professionals and communities jointly verify facts, rights and narrative choices.

PAUSE: Pause for unresolved factual conflict, unclear rights or physical intervention without heritage-control data.

SCENARIO PROTOCOLS

AI MAY · HUMAN MUST · WHEN TO PAUSE

SC15 · Public Intelligence Field Version Assembly

PUBLIC PROBLEM: Urban innovation often has launch mechanisms but lacks public feedback, pause, correction and exit.

AI MAY: Synthesize public evidence, identify underrepresented groups, compare versions and draft impact lists for alternatives.

HUMAN MUST: Convene public deliberation, check representation, resolve conflict, decide pause/update/scale and remain accountable.

PAUSE: Do not scale when evidence is untraceable, key groups are absent, complaints fail or any of the six values materially deteriorates.

INDUSTRY ENGINE + PUBLIC VALUE

TRUSTWORTHY AI · OPEN-SOURCE TRANSLATION · EDGE ENERGY · URBAN AGENTS

INDUSTRY TESTING

Four industry scenarios define limits, accountability, audit, energy and exit conditions before any move from bounded tests to public interfaces.

TALENT DEVELOPMENT

Research, entrepreneurship, learning, living and public life form a low-threshold short loop at AI Origin.

URBAN ECONOMY

Dazhongsi places agent economy, cultural content, consumption and all-day public life within a human-takeover civic interface.

GLOBAL CASES 01—04

MECHANISM TRANSFER, NOT FORM COPYING

C01 · Punggol Digital District, Singapore

Industry, campus and digital infrastructure coordinate through an integrated operating framework. Translate into a shared testing ground in Zhongzhiyuan and a short knowledge-to-industry loop at AI Origin.

C02 · Smart Kalasatama, Helsinki

Organize innovation around resident time savings and real-life experimentation. Translate into six public values, rather than device counts, as scenario performance.

C03 · SHIFT Urban Test Network, London

Run real-district trials through partnership agreements and evaluation frameworks. Translate into pre-test agreements, public limits, human stop and version review.

C04 · Amsterdam Urban Living Labs

Government, knowledge institutions, enterprises and communities learn together around place. Translate into three place prototypes and a public version assembly.

GLOBAL CASES 05—08

MECHANISM TRANSFER, NOT FORM COPYING

C05 · Decidim Democratic Participation Contract

Open-source code, participation safeguards and democratic governance principles constrain one another. Translate into Open, Shared and Open Source levels with traceable version decisions.

C06 · Mila Responsible AI Research Mechanisms

Embed social impact, interdisciplinary judgment and responsible R&D in innovation. Translate into the Zhongzhiyuan audit street and the human-must field of every scenario.

C07 · London Knowledge Quarter

Connect knowledge assets through walkable proximity, institutional networks and shared agendas. Translate into AI Origin's knowledge loop and open classrooms.

C08 · Ontario Quayside Public-Audit Experience

Large smart-district proposals require continuing audit of data governance, public value and accountability. Translate into data minimization, no scaling by default, a public risk register and exit mechanisms.

PROJECT PACKAGES 01—05

REVERSIBLE DELIVERY + OPEN-SOURCE OUTPUTS

PKG01 · Second Track Open Markers and Temporary Switches

Marker, furniture, event-log and removal manuals. Site safety, heritage, ownership and event-permit checks.

PKG02 · Zhongzhiyuan Trusted Test Commons v0.1

Test protocol, pause conditions and review template. Formal site boundary, accountable operator, safety and infrastructure assessment.

PKG03 · AI Origin Open-Source Translation Season

Courses, prototypes, license checklist and contributor record. Space-sharing agreement, rights-cleared materials and mentorship mechanism.

PKG04 · Dazhongsi Dual-Channel Civic Living Room

Dual-channel service blueprint and accessibility checklist. Station-area survey, accessibility review and staffed-service roster.

PKG05 · All-Ages Wellness Loop Observation Period

Anonymous use observation, facility inspection and correction log. Existing walking/accessibility survey and extreme-weather plan.

METRICS EVIDENCE PAGE

RECOMPUTED VALUES + EXPLICIT UNKNOWN ITEMS

05 / 05

VALUES, METRICS + EVIDENCE

FROM PUBLIC GOALS TO RECOMPUTABLE MODELS AND BACK TO VERSION DECISIONS

01
Wellness

Support physical activity, mental restoration, thermal comfort and access to care.

02
Social Connection

Create low-threshold interfaces for encounter, collaboration, learning and intergenerational exchange.

03
Equity

Preserve non-digital channels, accessible continuity and affordable shared resources.

04
Safety

Constrain AI through data minimization, human review, pause mechanisms and clear accountability.

05
Resilience and Infrastructure

Organize compute, energy, utilities, mobility and emergency systems as replaceable and recoverable networks.

06
Ecology

Treat blue-green continuity, habitat, stormwater retention and low-carbon operation as spatial performance.

FEATURE → SCENARIO → PERSONA → METRIC → SOURCE → HUMAN REVIEW

PACKAGES + ASSUMPTIONS

SCALE ONLY AFTER EVIDENCE

PKG06 · Blue-Green Co-Stewardship Data Dictionary

Environmental data dictionary, sensitivity tiers and public observation protocol. Flood, utility, green-space and maintenance responsibility boundaries.

PKG07 · Public Intelligence Field Version Assembly

Annual version log and reasoned pause/update/scale decisions. Representation rules, public evidence, appeal and conflict disclosure.

PKG08 · Three-Area Switch Components v1.0

K/C/E/M/P/H component atlas with applicability limits. Test feedback, accessibility review, maintenance cost and site fit.

PKG09 · Second Track Annual Public-Event Protocol

Calendar template, open-call rules and conversion-tracking framework. Event approval, rights, safety, noise, mobility and funding confirmation.

PKG10 · Careful Scaling of the Jing-Zhang Public Intelligence Field

Replicable rules, non-replicable conditions, risk register and exit plan. Verified official boundary, controls, ownership, engineering, utilities, funding and prior six-value performance.

A-BOUNDARY-001

The current site and three key-area geometries use repository-supplied provisional boundaries only for generation, clipping, discussion and recalculable metrics.

KEEP CREATING THE FUTURE

FIRST TRACK + SECOND TRACK = PUBLIC INTELLIGENCE FIELD

CLOSING

Jing-Zhang evolves from railway infrastructure into public innovation infrastructure for the AI era, supporting industry while continuously recalibrating wellness, connection, equity, safety, resilience and ecology.

NEXT VERSION

When cleared boundaries, controls, engineering and operational data arrive, rebuild the geometry, metrics, figures and delivery roadmap as one system.
